

MINI OM

WALL-MOUNT

COLLECTION SERIES

Mini Om, the smaller version of Om, represents the same exciting synthesis of design, art and technology, but with the added advantage that, even if space is at a premium, you don't have to limit the scope of your creativity.

Mini Om features a 450 CFM blower that is complimented with perimeter aspiration technology which draws air through a narrowed channel around the circular face plate. The engineered airflow significantly increases suction, without increasing blower speed or energy consumption.

Mounted on the side and out-of-sight, electronic push button controls operate lighting and the 3-speed, 450 CFM blower. Mini Om is whisper quiet with only .3 sones at speed 1.

SPECIAL FEATURES

Perimeter Aspiration: First developed by Elica, this technology literally turned the market 45 degrees and opened the door to hoods that could be mounted on the wall like picture frames. The technology draws air through a narrowed channel around a face plate, which increases suction, without increasing blower speed or energy consumption.

Elica Deep Silence: An exclusive sound deadening technology that utilizes a patented filter design, which substantially eliminates air turbulence and ultimately reduces sound levels by over 40%, compared to typical range hoods.
