Water Valve

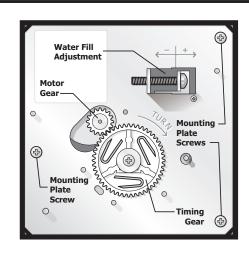

Line

Neutral

(Where Applicable)

Test Cycling: Remove cover by inserting screwdriver in notch at bottom and prying cover from housing. Use screwdriver to rotate motor gear counterclockwise until holding switch circuit is completed. All components of ice maker should function to complete the cycle.

Water Fill Volume: The water fill adjustment screw will change the fill time. One full turn is equal to 20cc (.68 oz.). The correct fill is 102 to 130cc (3.4 to 4.3 oz.). When a water valve is replaced, the fill volume must be checked.

⚠ CAUTION

3

4

All electrical parts and wiring must be shielded from torch flame. DO NOT allow torch to touch insulation; it will char at 200°F and flash ignite (burn) at 500°F. Excessive heat will distort the plastic liner.

SERVICE DATA SHEET

ICE & WATER - AUTOMATIC DEFROST BOTTOM FREEZER - R134a

IMPORTANT: PLEASE RETURN THIS SHEET TO ITS ORIGINAL LOCATION.

Error Codes		ror Codes	Special Modes			
Display				Display		Activate/Deactivate
FZ	FF	Interpretation	Mode	FZ	FF	(press for up to 10 sec. simultaneously)
	OP	Open FF Thermistor	Manual Defrost	d	F	+ and - / same to deactivate
OP		Open FZ Thermistor	Display / Showroom	77 77		Λ and - / Power-on-Reset (POR)
	SH	Shorted FF Thermistor	Sabbath	Sb Sb		V and + / same to deactivate
SH		Shorted FZ Thermistor	System Diagnostic	No FF or FZ display, all UI LEDs on.		∧ and V/ + to deactivate
SY	CF	UI to Main Control Board communication failure; on start up	FFIM Diagnostic	tic Numerical display of first test		
SY	CE	Ul Main Control Board communication error; after a period in operation	Notes: Always check for pin back-outs, pinched or damaged wires before replacing components. Determine whether failure is caused by the component, main control board or wiring.			
SY	EF	Evaporator Fan Failure	Contact TID before replacing main control board. • Refer to Service Manual for additional information.			

	Fresh Food Ice Maker Diagnostic Mode			
Activate: Press A and V temperature pads for up to 10 sec. simultaneously. Press + or - to move forward or backward through tests.				
Deactivate: Press + for up to 10 sec. FFIM Diagnostic Mode will automatically deactivate after 5 min. of inactivity. NOTE: Silence alarm.			nostic Mode will automatically deactivate after 5 min. of inactivity.	
		Test	To activate test	Passing Result
		Activates automatically	FZ display shows temperature sensed by Ice Maker Thermistor. "OP" if open; "SH" if short	
55C	55C Water Valve Set		Set	Remove ice tray to collect water into a measuring container to measure water fill. If collecting water into ice tray, first perform test 63C to empty ice tray.
57C	57C Evaporator Fan (FFIM) Se		Set	"On" on FZ display when fan activated, "OFF" when deactivated.
Ice Level Sensor		Activates automatically	Remove ice bucket. Allow bail arm to drop freely. Pass if no alarm when tray returns to "home" position. Hold bail arm up. Pass if alarm sounds when tray returns to "home" position. This test runs continuously until another test is selected.	
63C	Twist 7	Ггау	Set	Remove ice bucket. FZ display shows "1" and "GOOD".

Variable Capacity Compressor (VCC) Diagnostics (select models) If test 38 fails, diagnose as follows:

System Diagnostic Mode					
ctivate:	Press Λ and V for up to 10 sec. simultaneously.				
	Press + for up to 10 sec. Diagnostic Mode will automatically deactivate after 5 min. of inactivity. Note: Silence alarm.				

- Tests marked with "*" may not be applicable to this unit and will not be displayed in System Diagnostic Mode.
- Tests displayed in diagnostic mode but not described below are for internal purposes only; advance through.
 View UI display for "on," "off," "CL," "OP," "SH," "LO," "HI" or numerical results of tests.
- Listen for operating sounds; feel for heat or air flow as appropriate to determine results of tests.

IMPORTANT SAFETY NOTE

The information provided herein is designed to assist qualified repair personnel only. Untrained persons should not attempt to make repairs due to the possibility of electrical shock. Disconnect power cord before servicing this appliance.

IMPORTANT

If any green grounding wires are removed during servicing, they must be returned to their original position and properly secured.
