- Premium Stylish Design
- Brilliant Blue Interior
- Black Glass WideView Oven Window®
- Available in Premium Stainless Steel

**Infrared Grill**

Stainless Steel

# ELECTRIC RANGE

## Cook Faster

With Infrared Grill, the infrared heating element gets your oven to broil temperature more quickly and takes 20% off your cooking time on common items like steaks and chicken breasts. Infrared cooking – which uses the same technology as premium outdoor grills – also allows your food to be juicier than traditional thermal cooking.

## Expand Your Options

The size of your oven shouldn't dictate what you can cook or for how many people. This Large-Capacity Oven gives you more space so you have the flexibility to cook more dishes at the same time. One of the largest oven capacities available at 6.3 cu.ft.

## Boil Faster

LG's fastest boiling element offers the most powerful element in the market at 3200 watts\*.

\*among leading brands, non-induction elements

## Bake and Roast Like a Pro

Great cooking takes time, but at least with this oven it takes less time. The True Convection Oven lets you pre-heat faster and provides even baking and roasting for delicious results.

## Keep It Warm

With three temperature settings, the warming drawer keeps your food hot and delicious until you're ready to serve.

## Smooth Operator

Easy to clean and smooth to the touch, the Glass Touch control panel makes this LG range sleek and practical.
