BUILT-IN GRILLS

EXPERTS IN GAS & INFRARED GRILLING

[napoleongrills.com](http://napoleongrills.com)

## THE STORY

It all began in 1976 when a small steel fabrication business launched by Wolfgang Schroeter started manufacturing steel railings in Barrie, Ontario, Canada. At that time, no one could imagine the incredible future that lay ahead for Wolf Steel Ltd. and eventually Napoleon® Fireplaces and Napoleon® Gourmet Grills. Since the first wood stove rolled off the production line over 36 years ago, Wolf Steel's commitment was to be distinctive and successful in everything they do. The original stove featured a solid cast iron two-door design and was produced in a one thousand square foot manufacturing facility. By 1981, the name "Napoleon" was born and with it, the first single glass door with Pyroceram high temperature ceramic glass – a first in the industry. This was the first of many milestones for Wolf Steel Ltd and over the next few years, the demand for Napoleon's wood stoves grew beyond Ontario's borders to the rest of Canada, the United States, Europe and the United Kingdom. Napoleon® is an ISO9001 – 2008 registered company and operates with 750,000+ square feet of manufacturing space and over 700 employees. Napoleon® is North America's largest privately owned manufacturer of quality wood and gas fireplaces (inserts and stoves), gourmet gas and charcoal grills, outdoor living products, waterfalls and a complete line of heating and cooling equipment.

A photograph of a wooden deck at night. In the foreground, a tall, silver patio heater stands on the left. A Napoleon grill is on the deck, with a small fire burning inside. A bicycle is leaning against the railing. The background shows a dark sky and trees.

## CREATIVE SPIRIT, PERFORMANCE & QUALITY

A passionate dedication to grilling.

Napoleon®, a two generation family owned Canadian company, has been providing home products for over 36 years, committed to designing and manufacturing only the finest high efficiency grills, fireplaces and outdoor living products you can depend on.... Proudly backed by the President's Limited Lifetime Warranty.

Superior technology, rock solid performance, balanced design and unparalleled customer service are the hallmark of the Napoleon® name. Your Napoleon® grill is designed to excel, offering a cooking experience as gratifying as the wonderful meals you'll create with it.

In the pages ahead, you'll discover the beauty and simplicity of Napoleon® style - the ideal complement to your patio environment.

Wishing you many unforgettable meals - grilled to perfection.

# CEDAR PLANKED SALMON WITH SCALLOP CRUST

- 4 Atlantic Salmon fillets (10-12 oz), pin-bones and skin removed
- ¼ cup (60 mL) Country Herb Spice

## Crust

- 1 large red onion, finely diced
- ½ cup (125 mL) thinly sliced green onion
- ¼ cup (60 mL) chopped fresh dill
- 3 cloves garlic, minced
- ¼ cup (60 mL) Fire Roasted Garlic Sauce
- 1 tbsp. (15 mL) Country Herb Spice
- 8-10 pieces fresh scallops (1 lb / 454 g)
- to taste, coarsely ground black pepper
- 1 lemon, cut into wedges
- 1 - 12" Cedar Plank soaked in water for one hour minimum

## INFRARED TECHNOLOGY

The intense heat of Napoleon's infrared technology instantly locks in the juices for an amazing taste sensation! Over 11,000 flame ports produce up to 1800°F for optimum searing. See page 19 for more details.

Natural Gas and Propane Available

Doors and drawers are optional. Island not included.

Flush Mount Stainless Steel Double Door  
N370-0503

 Proudly Made in Canada

Preheat grill to medium-high heat.

Rub salmon all over with Country Herb Spice, gently pressing the spices into the meat. Place the salmon, evenly spaced, on the plank.

In a large bowl combine red onion, green onion, dill, garlic, Fire Roasted Garlic Sauce and Country Herb Spice. Mix well and divide topping evenly onto the salmon fillets, gently pressing topping into the fillets to adhere.

Using a sharp knife, slice the scallops into 4 round slices. Season scallops with coarsely ground black pepper to taste. Arrange 6-8 scallop slices evenly onto each salmon on top of the red onion crust.

Carefully place the plank on the grill and close the lid.

Plank grill for 12-15 minutes, or until salmon is just cooked through and the scallops are golden.

Remove plank from grill and serve immediately with wedges of lemon and extra Fire Roasted Garlic Sauce on the side.

Serves 4

Cart model available

Doors and drawers are optional. Island not included.

Proudly Made in Canada\*

Proudly Made in the USA\*

Pat chicken thighs dry with paper toweling. Season the chicken with Chicken and Rib Spice, pressing the seasoning into the meat.

To prepare the glazing sauce, place the vegetable oil and sesame oil in a medium saucepan over medium-high heat. Sauté the garlic and ginger until tender and fragrant, about 3 to 4 minutes. Stir in the soy sauce, honey and rice vinegar. Bring to a boil, reduce heat to low and simmer for 10 minutes. Remove from heat and whisk in Wasabi powder. Set aside and allow to cool.

Preheat grill to medium-high heat.

Spray chicken lightly with non-stick cooking spray and place onto grill. Sear chicken thighs for 2 to 3 minutes per side. Transfer chicken thighs to the top rack of the grill, turn grill down to medium heat and close lid. Roast chicken thighs for 20 to 30 minutes over indirect heat basting every 10 minutes with lots of the glazing sauce. Baste chicken thighs one final time with glaze and remove from grill.

Sprinkle chicken with toasted sesame seeds and serve with pickled ginger and extra glazing sauce on the side.

Stainless steel smoker box adds a true smoked flavour to your meals

Heavy duty cover included

Integrated dual side burners

Doors and drawers are optional. Island not included.

Deluxe Flat Stainless Steel Door Kit N370-0361-1

Proudly Made in Canada

Using a sharp heavy knife, cut between every bone to form chops about ¾" thick.

Place Tandoori Injector Sauce, chopped fresh mint, olive oil and lime juice into a medium bowl and whisk to combine. Place chops into a sealable plastic bag, pour in marinade, seal bag and place into refrigerator to marinate for 2-3 hours, turning occasionally.

In a medium-sized mixing bowl, mix red onion, diced cucumber, minced garlic, yogurt, lime juice and mint. Season to taste with salt and coarsely ground black pepper. Cover and refrigerate until needed.

Preheat grill to medium-high heat.

Remove chops from the marinade. Carefully shake off excess marinade and place lamb chops onto grill. Grill lamb chops for 2 to 3 minutes per side, for medium rare doneness, basting continuously with extra marinade.

Remove from the grill and allow to cool for 1 minute. Serve immediately with Raita Dunk.

## STUFFED PORK CHOP

- 4 Bone-In Pork Loin Chops - 2" thick (10-12 oz, 300-360 g)
- 2 tbsp. (30 mL) Creole Cajun Seasoning

### Stuffing

- 2 slices multi-grain bread - toasted, cooled, and cut into ½" cubes (about 3 cups/750 mL diced)
- 1 cup (250 mL) ground sausage meat, breakfast style
- ½ cup (125 mL) finely diced white onion
- ¼ cup (60 mL) finely diced celery
- ¼ cup (60 mL) Sauvignon Blanc
- ¼ cup (60 mL) Fire Roasted Garlic Sauce
- ½ cup (125 mL) shredded mozzarella cheese
- 1 tbsp. (15 mL) chopped fresh thyme
- 15 mL (1 tbsp.) chopped fresh sage
- 30 mL (2 tbsp.) Creole Cajun Seasoning

### STAINLESS STEEL TUBE BURNERS

Tube burners run front to back for precise heat control, allowing for independent use of each cooking zone for direct or indirect cooking.

# MIRAGE™ SERIES

## BIM730RBI, BIM605RBI & BIM485RB

Up to 96,000 BTU's  
Up to 6 burners

Doors and drawers are optional. Island not included.

JETFIRE™ Ignition

i-GLOW™ Backlit Control Knobs

Ceramic Infrared Rear Burner  
(BIM730RBI & BIM605RBI)

Infrared SIZZLE ZONE™ Bottom Burner  
(BIM730RBI & BIM605RBI)

INFRARED  
**SIZZLE ZONE**

In a large bowl, combine cubed bread, ground sausage, diced onion, diced celery, Sauvignon Blanc, Fire Roasted Garlic Sauce, shredded mozzarella cheese, chopped fresh thyme, chopped fresh sage, and Creole Cajun Seasoning. Mix well.

Using a sharp knife, make a 2-3" deep incision on the side of each pork chop to form a pocket in the center, taking care not to cut through the other side.

Stuff each pork chop with about ½ – ¾ cup of the stuffing mixture, packing stuffing tightly into each pocket. Season pork chops with Creole Cajun Seasoning, pressing the seasoning into the meat to adhere. Place stuffed pork chops onto a tray, cover and refrigerate for a minimum of one hour to allow the stuffing to set.

Preheat grill to medium heat.

Grill pork chops for 10-12 minutes, turning once, until lightly charred. Move chops to top rack of grill, close lid and allow to roast for an additional 8-10 minutes, turning every 2 minutes and basting with Fire Roasted Garlic Sauce, or until pork is fully cooked and stuffing is hot throughout. Remove from grill and allow to cool for 1-2 minutes. Serve immediately with extra Fire Roasted Garlic Sauce on the side.

Serves 4

### OVEN-LIKE PERFORMANCE

Napoleon's LIFT EASE™ roll top lid tucks neatly back giving you more space on your patio or deck. The tightly sealed lid will not be compromised by prevailing winds. Maximum heat is retained in the streamlined, double-walled lid for oven-like performance.

## FINDING THE PERFECT STEAK

When buying a large steak, choose one that has a uniform thickness of about 1 ½ inches. Buy a top quality cut that is well marbled to ensure tenderness. The better the quality of beef, the tastier your steak will be. For a quick sauce, jazz up store-bought BBQ sauce by adding chopped chilies, a little Worcestershire sauce, a splash of vinegar, some chopped fresh onions or garlic, or get creative.

### ALL SEASON GRILLING

The secret to grilling success in any season, is preparation. Always locate your grill away from the wind in a well-ventilated location to ensure consistent heat. Don't let the heat escape by constantly lifting the lid to check; instead use your thermometer. And, don't be afraid to use the warming rack to keep food warm or to finish cooking, if the rest of your food continues to cook on the main burners.

# THE MOST VERSATILE COOKING STYLES AVAILABLE

### Direct Cooking

This method of cooking utilizes all burners, cooking the food directly above the flame "GRILLING" style, for searing steaks, other meats or vegetables. Keeping the lid down reduces the cooking time and cooks through to the center faster than with the lid up. Anything that is less than 2 inches in thickness should be cooked by direct grilling. These are things that generally cook quickly and benefit from the fast cooking of a hot grill. Front to back burners were designed for precise heat control, allowing for independent use of each cooking zone.

### Indirect Cooking

Indirect grilling is similar to baking. The food is placed above the unlit burner instead of directly over the flame. This can be achieved by only igniting some of the burners – light one side on high and cook the food on the other. The food will cook more evenly as it is not exposed to direct heat from the burners. This is an excellent way to cook tough cuts of meat, like brisket and ribs, that require long, slow cooking at a low or moderate heat. Indirect grilling allows you to work over a more moderate temperature (275° to 350°) and makes it easy to introduce a smoker pipe for extra flavour. For chicken, game, turkey, roasts, ham, vegetables, bread or combinations, the indirect cooking method gives great results every time. There is little need to turn the food. You can place the food directly on the grids or in a cooking pan.

### Charcoal Cooking

Unique to Napoleon! Optional charcoal trays, give you the freedom to switch from gas to charcoal with relative ease. With charcoal you can utilize indirect cooking as well as direct cooking.

### HERBS & SPICES

Dried herbs and spices make wonderful aromatics for grilling. Soak them for about 5 minutes, squeeze out the moisture, and sprinkle them either directly on the coals, or even in the water pan if you're cooking over indirect heat. Watch out for seeds, such as mustard and coriander. Heat makes them pop.

— NAPOLEON —  
**EXPERTS IN  
GAS & INFRARED  
GRILLING**

## Rotisserie Cooking

Rotisserie cooking allows the food to self-baste, sealing in the juices while browning the outside surface. Use the rotisserie method of cooking for large cuts of meat like roasts, poultry or legs of lamb. There are so many advantages to rotisserie cooking. Meats are generally juicier, self-basted and slow roasted. You can use the rotisserie method if your grill comes with a rear rotisserie burner, which requires much less attention than any other cooking method. The rotisserie burner is a nice feature because it automatically sets you up for direct, even heating.

## Infrared Bottom Burner Cooking

Do you want to make the perfect steak? The intense 1800° heat instantly sears the meat, locking in the juices. Larger cuts of meat may be moved to the side of the grill to continue cooking.

## Smoking

Place wet wood chips into the smoker tube and place over the left burner, then turn the burner on. Place your meat over the right burner, but do not turn on that burner. You are using the indirect cooking method. Smoke the meat for several hours under a closed lid. To achieve maximum flavour, fresh wood chips may be added several times during the cooking process.

## "DONENESS" TEST

Take your left forefinger and touch it to the tip of your left thumb. Don't apply pressure, just use the lightest touch with your finger, touching the base of the meaty part of your thumb. This feeling is similar to the consistency of rare steak. Now compare it by touching the steak. For medium done, use the second finger of your left hand to touch the tip of your left thumb. Well done, use the third finger of the left hand.

# COOKING WITH CHARCOAL ON YOUR GAS GRILL

Charcoal is the traditional way of infrared cooking that we are all familiar with. It provides a feeling of nostalgia you can't escape with the smoky flavour you've loved for so long. The glowing briquettes emit infrared energy to the food being cooked, with very little drying effect.

At Napoleon®, we are proud experts in infrared grilling but as fans of all ways to grill we know you can't replace the experience and smoky flavour of grilling with charcoal.

As this is a bonus, we wanted to combine the two masters of grilling. With our charcoal trays you can now experience the smoky flavour and raw grilling of charcoal but with easier heat up, less mess and even heating on your gas grill.

## Still want the convenience of gas, but long for that charcoal flavour?

No problem! Napoleon's charcoal tray lights easily with your

gas burner. Before you begin to use your charcoal tray, you will need to determine how much charcoal you are going to need to complete the meal. Approximately one layer for burgers or steaks and two layers for roasts or chicken. Pour enough charcoal into the tray to make the layers needed. Stack charcoal into a cone shape. Remove one sear plate, light the gas burner directly under the charcoal tray and burn on high until the charcoal is glowing red and then turn off the gas burner. Let coals burn until all coals are white on the surface. With a long handle instrument, spread the coals evenly across the coal grate. Close lid, wait 5 minutes and start cooking!

Tips: Never add lighter fluid to burning coals. Even if there is no flame, the heat will vaporize the lighter fluid and can cause a serious flare-up the second the vapor encounters a flame.

## Want That Smoky Goodness?

Enjoy that delicious smoked meat flavour at home with your own grill and a few pointers from Napoleon®. When using gas grills, it's best to put presoaked wood chips in our smoker tube, available at Napoleon® grill retailers. This keeps your grill from filling up with ashes and clogging the jets. If you are using a charcoal tray, then you can either put the wood directly on the preheated coals or place them in a smoker tube. Experiment a little to find what works best for you.

Fill the stainless steel smoker tube with wood chips. Submerge in water for at least half an hour. Place the smoker tube over the left burner and turn it on. Place your meat over the right burner, but do not turn on the burner. You are using the indirect/smoking cooking method.

Smoke the meat for several hours under a closed lid. To achieve maximum flavour, add fresh, pre-soaked wood chips several times during the cooking process.

## OVEN-LIKE PERFORMANCE

Your gas grill can also be used as a conventional or convection oven. Bread, buns, cakes and pizzas can be cooked to perfection under the grill lid. For convection cooking, follow the same instructions as for the indirect cooking method. Your grill comes with a tightly sealed lid for heat retention, giving oven-like performance.

— NAPOLEON —  
**EXPERTS IN  
GAS & INFRARED  
GRILLING**

# HOW DOES INFRARED COOKING WORK?

Since the discovery of fire, man-kind has been striving to improve taste and perfect the grilling experience. Infrared grilling is simply the relationship between the type of food, heat, and time. Infrared cooking uses high-efficiency radiant energy, much like the sun. High-frequency electromagnetic waves from the invisible end of the light spectrum travel from the infrared source to the food.

Napoleon® infrared grills use ceramic burners with thousands of evenly spaced flame ports to generate infrared radiant energy. The flame energy is absorbed by the ceramic, which then glows and heats up to an incredible 1800°F. This remarkable SIZZLE ZONE™ heat intensity quickly sears your food to lock in moisture and flavour. The results are unmistakable - succulent, flavourful food in a much-reduced grilling time! Napoleon's infrared grilling technology makes serving the perfect meal quick and easy each and every time.

## Versatile

Grill anything like a professional, from steaks to seafood, fish to vegetables.

## Great Retention of Flavour and Moisture

Infrared provides the heat necessary to lock in the juices with little or no preheating time. Radiant energy is delivered more directly to the food, and warms less air. Therefore, the food cooks very quickly, resulting in a greater retention of food weight. Food cooked in its own juices is more succulent, tender and tasty.

## More Efficient

Infrared heats the object not the air so it cooks twice as fast as traditional burners while using less fuel. Because infrared heats food directly, not the air around it, grilling year round is much easier.

## The Environmental Choice!

Because the infrared burners are ready to grill in under a minute and grilling time is drastically decreased, cooking your food with Napoleon's advanced infrared technology can reduce your gas consumption by up to 50%.

## BTU/FUEL CONSUMPTION

TRADITIONAL  
GRILLING

NAPOLEON®  
INFRARED GRILLING

## How To Cook The Perfect Infrared Steak

Pick a steak that is well marbled, the more marble there is inside, the more flavourful and tender your steak will be. A perfect steak size is about 1 ½ to 2 inches thick and about 12 to 16 ounces each, depending on the cut.

1. Lift lid of grill or side burner.
2. Ignite infrared burner.
3. Warm up for one minute.
5. Place thick, juicy steak on grids.
6. Wait two - three minutes, flip steak with tongs. (You do not want to use a fork and pierce the steak as this will let out the juices the infrared has locked in).
7. Wait another two - three minutes, turn off the red knob.
8. You now have a medium rare steak.

Bon Appetite.

Note: Never cut a steak to see if it is done - use a meat thermometer. Cutting allows all the natural juices to escape.

— NAPOLEON —  
**EXPERTS IN  
GAS & INFRARED  
GRILLING**

## TROUBLE-FREE GRILLING

If you take the time to give your grill a thorough check-up in the spring and once more in the fall, you will enjoy years of trouble-free grilling. If you can't fit both check-ups in, choose the springtime, just before the busy summer grilling season starts, to get at least one good check-up.

# INSTALLATION SPECIFICATIONS

Oasis™ Modular Island Sample

Countertops must be ordered and supplied locally by the homeowner.

The countertop material must be non-combustible if a grill is to be installed into it. They can be ordered in advance by drawing out the floor plan of how the cabinets will be situated and adding up the width measurements, allowing 1-2 inches of countertop overhang. Most countertop manufacturers are willing to come and take measurements after assembly of the cabinets is complete to ensure a perfect fit. For best results the countertop thickness should be between ¾ to 1 ½" thick. The built-in grill head comes with stainless steel brackets and hardware that allow the unit to rest on the countertop above the corresponding island cabinet for that unit. Granite is an excellent choice of countertop materials. Decorative countertops made of ceramic tile set on top of cement tiling board can be selected to match your surrounding backyard furniture colour.

## BUILT-IN PROPANE GAS HOOK-UP

The piping up to the gas grill is the responsibility of the installer and piping should be located as shown in the built-in instructions. The installation must comply with CAN B149.1 Natural Gas and Propane installation code in Canada, or to the National Fuel Gas code, ANSI Z223.1 in the United States. The tank can not be stored below the gas grill. Built-in units are supplied with a drip pan which holds only a minimal amount of grease. To prevent grease fires, the pan must be cleaned after each use.

# INSTALLATION SPECIFICATIONS

\* Additional clearance may be required for openings. See owners manual

Please use manual to properly assemble your built-in grill. Refer to the main manual for operating, cleaning, and maintenance instructions. This grill is designed for non-combustible enclosures only (unless the Napoleon® zero clearance kit is utilized), and must be installed and serviced by a qualified installer to local codes.

Drawings for reference only. Minimum 6" clearance required between grill and other appliance. Specifications subject to change without notice.

## BUILT-IN NATURAL GAS HOOK-UP

The piping up to the gas grill is the responsibility of the installer and piping should be located as shown in the built-in instructions. Do not use hose to connect the unit. It must be connected with rigid pipe, copper tube or an approved flexible metal connector which complies with Z21.4 /CSA 6.10. The installation must comply with CAN B149.1 Natural Gas and Propane Installation Code in Canada, or to the National Fuel Gas Code, ANSI Z223.1 in the United States. The gas supply pipe must be sufficiently sized to supply the BTU/h specified on the rating plate, based on the length of the piping run. If installing a side burner, a separate line must be branched off to the side burner unit and enter the side burner opening at the specified location.
