Metric and Imperial measures are different. **DO NOT** crossover from one to another within a recipe.

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY:

- (a) **DO NOT attempt to operate this oven with the door open** since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- (b) **DO NOT place any object** between the oven front face and the door, or allow soil or cleaner residue to accumulate on sealing surfaces.
- (c) **DO NOT operate the oven** if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
 - (1) door (bent)
 - (2) hinges and latches (broken or loosened)
 - (3) door seals and sealing surfaces.
- (d) **The oven should not be adjusted or repaired** by anyone except properly qualified service personnel.

DO NOT use this oven to heat chemicals or other non-food products. **DO NOT** clean this oven with any product that is labelled as containing corrosive chemicals. The heating of corrosive chemicals in this oven may cause radiation leaks.

POWER SELECT SETTINGS

Your microwave oven is equipped with ten power select settings. This variety of settings offers you flexibility in microwave cooking. Listed on the right is the approximate percentage of cooking power at each power setting.

Press	Power Level	% Power
once	P10 (HIGH)	100%
twice	P9	90%
3 times	P8	80%
4 times	P7 (MEDIUM-HIGH)	70%
5 times	P6 (MEDIUM)	60%
6 times	P5	50%
7 times	P4	40%
8 times	P3 (MEDIUM-LOW)	30%
9 times	P2	20%
10 times	P1 (LOW)	10%

COOKING WITH YOUR COMBINATION OVEN

Microwave

Microwaves are a form of high frequency electromagnetic waves similar to those used by a radio. Electricity is converted into microwave energy by the magnetron tube. The microwaves travel from the magnetron tube to the oven cavity where they are reflected, transmitted or absorbed.

Bake

The convection bake oven has a heating element in the ceiling equipped with a fan to circulate the hot air into the oven cavity. This mode of cooking will provide the dry heat required to produce crisp, brown exteriors on baked and roasted products. Temperatures range from **200 - 450°F (100 - 230°C)**. Consult charts and recipes to determine temperature settings and cooking times. Many of your favourite recipes may be baked at their usual temperature, however, times may be slightly shorter.

For convection cooking, use the Oven Rack. Preheat with this rack on the Ceramic Tray.

Broil

Broiling is done with high heat to give foods a rich brown appearance. The oven must be preheated on the broil mode with the oven rack in place.

During preheating, prepare food and place on the spatter shield of your broiler pan to be ready for broiling.

Cooking on Combination

Combination cooking uses microwave energy in conjunction with a heater element. It will produce browning, maintain juiciness and reduce cooking time. Combination cooking is ideal for roasting meats and poultry, and for cooking casseroles and other recipes such as pies.

There are four combination settings which automatically regulate the oven temperature and the microwave energy.

Combination Setting	Oven Temperature	Microwave Energy (Approx.)
1	275°F (130°C)	30 % power
2	300°F (150°C)	
3	325°F (165°C)	
4	375°F (190°C)	

Consult the charts and recipes to determine which combination setting to use. This is described in the recipe method. When adapting conventional recipes to the combination cooking mode, find a similar recipe in the cookbook using the same quantities and ingredients. Use the combination setting and time in the cookbook.

When roasting, use the **Chicken Pieces** or **Whole Chicken** or **Beef-medium** or **Pork** of **Auto Convection** Button.

The combination system is used for manual combination and time or **Auto Convection** Button.

OVEN ACCESSORY

The oven comes equipped with an oven rack. Always follow specific directions given in the charts or recipes for use of the oven rack.

Oven Rack is used for Broil and Bake and Combination cooking.

Broil — For Broil, oven rack is placed on the Ceramic Tray. The oven is then preheated at **BROIL**. Food is placed on your broiler pan. Broiler pan is then placed on the oven rack after preheat time. You can purchase broiler pans from your local stores. Metal or teflon coated pans are available. The broiler pan may be sprayed with a non-stick cooking product to aid in clean-up. Program the oven according to the chart or recipe directions.

DO NOT use a broiler pan for microwave cooking.

Bake — The oven rack is placed directly on the Ceramic Tray. Preheat the oven according to the temperature recommended in the chart or recipe. Food in cooking container is then placed on the oven rack.

CONTAINER TEST

TO TEST A CONTAINER FOR SAFE MICROWAVE OVEN USE:

Fill a microwave safe cup with cool water and place it in the microwave oven alongside the empty container to be tested; **heat one (1) minute at P10 (HIGH)**. If the container is microwave oven-safe (transparent to microwave energy), the empty container should remain comfortably cool and the water should be hot. If the container is hot, it has absorbed some microwave energy and should NOT be used. This test cannot be used for plastic containers.

FOOD CHARACTERISTICS AND THEIR EFFECTS ON MICROWAVE COOKING

Bone and Fat

Both bone and fat affect cooking. Bones may cause irregular cooking. Meat next to the tips of bones may be overcooked while meat positioned under a large bone, such as a ham bone, may be undercooked. Large amounts of fat absorb microwave energy and the meat next to these areas may be overcooked.

Density

Porous, airy foods such as breads, cakes or rolls take less time to cook than heavy, dense foods such as potatoes and roasts.

Quantity

Two potatoes take longer to cook than one potato. As the quantity of the food decreases so does the cooking time. Overcooking will cause the moisture content in the food to decrease and a fire could result. Never leave microwave unattended while in use.

Shape

Uniform sizes heat more evenly. The thin end of a drumstick will be cooked more quickly than the meaty end. To compensate for irregular shapes, place thin parts toward the centre of the dish and thick pieces toward the edge.

Size

Small or thin pieces cook more quickly than thick pieces.

Starting Temperature

Foods that are room temperature take less time to cook than if they are at refrigerator temperature or frozen.

COOKING TECHNIQUES

Arrangement: Individual foods, such as baked potatoes, will be cooked more evenly if placed in the oven equal distances apart. When possible, arrange foods in a circular pattern. Foods should not be overlapped.

Browning: Foods will not have the same brown appearance as conventionally cooked foods. Meats and poultry may be coated with browning sauce, Worcestershire sauce, barbecue sauce or shake-on browning sauce. To use, combine browning sauce with melted butter or margarine, brush on before cooking.

Covering: As with conventional cooking, moisture evaporates during microwave cooking. Casserole lids or plastic wrap are used for a tighter seal. When using plastic wrap, vent the plastic wrap by folding back part of the plastic wrap from the edge of the dish to allow steam to escape. Loosen or remove plastic wrap as recipe directs for stand time. When removing plastic wrap covers, as well as any glass lids, be careful to remove them facing away from you to avoid steam burns. Various degrees of moisture retention are also obtained by using wax paper or paper towels. However, unless specified, a recipe is cooked uncovered.

Piercing: Foods with skins or membranes must be pierced, scored or have a strip of skin peeled before cooking to allow steam to escape. Pierce clams, oysters, chicken livers, chicken wing, whole potatoes and whole vegetables. Whole apples or new potatoes should have a 1-inch (2.5 cm) strip of skin peeled before cooking. Score sausages and frankfurters.

DO NOT Cook/Reheat whole eggs with or without the shell. Steam built up in whole eggs may cause them to explode, and possibly damage the oven or cause injury.

Reheating SLICED hard-boiled eggs and cooking SCRAMBLED eggs is safe.

Shielding: Thin areas of meat and poultry cook more quickly than meaty portions. To prevent overcooking, these thin areas can be shielded with strips of aluminum foil. Wooden toothpicks may be used to hold the foil in place.

Timing: A range in cooking time is given in the charts or recipe. The time range compensates for the uncontrollable differences in food shapes, starting temperature and regional preferences. Always cook food for the minimum cooking time given in the recipe and check for doneness. If the food is undercooked, continue cooking. It is easier to add time. Once the food is overcooked, nothing can be done.

Turning: It is not possible to stir some foods to redistribute the heat. At times microwave energy will concentrate in one area of a food. To help ensure even cooking, some foods need to be turned over once, halfway through cooking.

Stirring: Stirring is usually necessary during microwave cooking. We have noted when stirring is helpful, using the words once, twice, frequently or occasionally to describe the amount of stirring necessary.

Rearranging: Rearrange small items such as chicken pieces, shrimp, or hamburger patties by moving pieces from the edge to the center and pieces from the center to the edge of the dish.

Stand Time: Most foods will continue to be cooked by conduction after microwave cooking. In meat cookery, the internal temperature will rise 5 - 15°F (3 - 8°C) if allowed to stand, tented with foil, for 10 - 15 minutes. Casseroles and vegetables need a shorter stand time, but it is necessary to allow foods to complete cooking in the center without overcooking on the edges.

Testing for Doneness: The same tests for doneness used in conventional cooking may be used for microwave cooking. Meat is done when fork-tender or splits at fibers. Chicken is done when juices are clear yellow and drumstick moves freely. Fish is done when it flakes and is opaque.

SPECIAL FEATURES

Your oven can be set by Micro Power, Convection, Combination or Inverter Turbo Defrost with desired time. These methods are duplicated by the following preprogrammed special features.

Look for the symbol  to indicate recipes and charts with Sensor Cooking/Convection Cooking directions. Use these recipes and charts as a basis for determining which of your own similar conventional recipes may be converted to the Sensor Cooking/Convection Cooking method of cooking.

Sensor Reheat

Sensor Reheat is a quick and easy way to reheat refrigerated foods. Simply press the **Sensor Reheat** Button. There is no need to select cooking time or power.

Use a dish to correspond to the quantity of food being heated.

Sensor Cooking

The Sensor Cooking system works by detecting a build up of steam on the humidity sensor. As food is cooking in a microwave, steam is produced. When food is covered and vented, the steam will escape from the vent. The steam is detected by the humidity sensor and then the oven automatically calculates the remaining cooking time.

When the program is selected, it will be shown in the Display Window.

While the program is in use, opening the door may cause inaccurate cooking results. Once the steam is detected, the remaining cooking time immediately appears in the Display Window and begins to count-down. At this time, the oven door may be opened to stir turn or add foods.

Potatoes, Vegetables

For root vegetables such as potatoes, carrots and dense vegetables such as squash and turnips, **press** the **Sensor Cook** Button once. Potatoes and whole vegetables should be pierced several times before cooking and placed on a microwave-safe dish.

For other fresh vegetables, **press** the **Sensor Cook** Button twice. For canned vegetables, **press** the **Sensor Cook** Button three times. For frozen vegetables, **press** the **Sensor Cook** Button four times.

Rice, Pasta

There are two categories for rice and one for pasta.

Press the **Sensor Cook** Button five times is for **White Rice**.

Press the **Sensor Cook** Button six times is for **Brown Rice**.

Press the **Sensor Cook** Button seven times is for **Pasta**.

When cooking **Rice** or **Pasta**, add rice or pasta to hot tap water, salt and butter according to package directions.

Since this sensor detects a sudden burst of steam from the dish, the dish must be covered with a matching lid or loosely, but completely, with a microwaveable plastic wrap. When heating commercially prepared foods, check the cookware guide to determine if the container is suitable or follow manufacturer's directions.

Casserole 1, Casserole 2

This category is designed to cook casseroles automatically.

Press **Sensor Cook** Button eight times for **Casserole 1**.

Press **Sensor Cook** Button nine times for **Casserole 2**.

When cooking Casserole, choose cooking dishes that are both microwave and heat safe, as the last stage of the program uses the **Combination** feature. There are two sub-categories. **Casserole 1** is for foods such as gratin and lasagna. **Casserole 2** is for foods such as stew.

Sensor Cooking Hints

For proper cooking results for the Sensor cooking categories, use the directions given in the recipes and charts. Lids should fit properly.

Cover dishes without matching lids loosely, but completely, with plastic wrap except when using **Casserole**. Use non extendable plastic wrap for microwave ovens. Large dishes need two overlapping pieces of plastic wrap. Securely mold wrap around sides of dish. Foods with bones should not be pierced through the wrap. Steam builds up under plastic wrap and lids, so carefully remove them away from you to avoid steam burns.

Shield, if necessary, at the beginning of the cooking time.

DO NOT open the oven door longer than one minute when the category setting is in the display window.

Loosen or remove the plastic wrap for the stand time or according to the recipe directions.

Convection Cooking

Beef, pork and poultry

To use, select the category for the roast and then enter the weight.

Once the weight is programmed, the cooking time will appear in the display window.

Press **Auto Convection** Button once for **Chicken Pieces**.

Press **Auto Convection** Button twice for **whole Chicken**.

Press **Auto Convection** Button three times for **Beef-medium**.

Press **Auto Convection** Button four times for **Pork**. Place roasts fat-side down and whole poultry breast-side down on a microwaveable, heat-safe rack set in a microwaveable, heat-safe shallow dish.

Turn the meat and poultry over halfway through the cook time. The meat and poultry chapters describe special procedures to follow.

Chicken Pieces

Up to 2 lb (1 kg)

Whole Chicken

Up to 6 lb (3 kg)

Beef - medium

Up to 4 lb (2 kg)

Pork

Up to 4 lb (2 kg)

Cake

Oven temperature and time are automatically programmed when using this feature to bake butter cakes, quick bread loaves, chiffon, sponge and angel food cakes. Use cake mixes for your favorite recipes, or choose a recipe from the dessert section of this cookbook.

For cakes that will be conventionally baked in less than 28 minutes, press **Auto Convection** Button five times.

The display will show **Cake 1**.

For cakes that will be conventionally baked in 28 minutes to 55 minutes, press **Auto Convection** Button six times.

The display will show **Cake 2**.

For cakes that will be conventionally baked in 55 minutes or more, press **Auto Convection** Button seven times.

The display will show **Cake 3**.

Always use metal pans of standard shapes, such as a square, round, oblong or a shallow tube pan. Cook one pan at a time.

Place the Oven Rack on the Ceramic Tray. Place the cake on the Oven Rack and press **Start** Button.

The cake categories are not suitable for fudge cakes, brownies or traditional fruit cake recipes.

Pie

Oven temperature and time are automatically programmed to bake double-crust pies.

There are three sub-categories for **Pie**.

Press **Auto Convection** Button eight times for double-crust pies with fresh fruit filling. The display will show **Fresh Pie**.

Press **Auto Convection** Button nine times for double-crust frozen pies. The display will show **Frozen Pie**.

Press **Auto Convection** Button ten times for baking double-crust pies made with pre-cooked or canned pie filling. The display will show **Pre Cooked Pie**.

Always use a metal pie pan and bake one at a time.

Prepare pies so that they are less than 2-inches (5 cm) high. Refrigerated or frozen pie crusts are not recommended.

Frozen pies must be placed on a small cookie sheet on the Oven Rack for best results.

Place the Oven Rack on the Ceramic Tray. Place the pie on the Oven Rack and press **Start** Button.

Defrosting Techniques

Remove wrapper. Otherwise, the wrap will hold steam and juice close to the food, which can cause the outer surface of the food to cook.

Remove ground meat from its tray.

Place meat in an appropriate dish.

Place small items, such as chops, chicken pieces, shrimp, scallops or fish on a microwave roasting rack in a dish.

Place roast fat-side down and whole poultry breast-side down on a microwave roasting rack in a dish. The rack helps prevent the food from sitting in its own juice. The juice will get hot during defrosting and the bottom will begin to cook.

Inverter Turbo Defrost

Turbo Defrost can be used to defrost many cuts of meat, poultry and fish by weight. To use, simply press the **Inverter Turbo Defrost** Button and enter the weight of the food.

Items that can be defrosted, are meat (chops, ground or roasts), poultry (whole or pieces) and fish or seafood. Place meat on a microwave roasting rack in an appropriate sized dish. Remove ground meat from its tray.

Place roast fat-side down and whole poultry breast-side down on a microwave roasting rack in an oblong dish. The rack helps prevent the food from sitting in its own juice. The juice will get hot during defrosting and if the food is sitting in the juice, the bottom will cook. Place small items, such as chops, chicken pieces, shrimp, scallops and fish on a microwave roasting rack set in an oblong dish. Break apart small pieces, turn over roasts and remove thawed portions of ground meat. Should shielding be required, do it when the two-beep signal is heard. The oven will not stop operating and some items may not require attention.

Use defrost by time for food that is not recommended for Turbo Defrost.

Follow the times and information given in the meat, poultry, fish and seafood sections. Disinfect all surfaces that have come in contact with thawed meat, fish and poultry.

To prevent overdefrosting, thin areas or edges can be shielded with strips of aluminum foil. However, when using foil, allow at least 1-inch (2.5 cm) of space between foil and interior oven walls. Also, if using two or more small pieces of foil to shield, place at least 1-inch (2.5 cm) apart from each other. This is to avoid arcing.

The oven beeps during the defrosting cycle to signal that the food needs to be turned or rearranged. Follow the directions given in the chart for the best results.

APPETIZERS

ADAPTING RECIPES

Many of your favorite appetizer recipes can be cooked easily in your Dimension 4 Oven.

Bake temperatures may need to be 25°F (10°C) lower than conventional temperatures. Prepare appetizer according to the recipe directions. Place the Oven Rack on the Ceramic Tray. Place a dish on the Oven Rack. Check doneness at the minimum cooking time.

Combination 3 and **4** can both be used to cook appetizers. Prepare appetizer according to the recipe directions. Find a similar recipe in this cookbook and use it as a guideline. Generally, conventional recipes that require a temperature of

350°F (180°C) or 375°F (190°C) can be cooked on **Combination 3**, and recipes which require a temperature of 400°F (200°C) or 425°F (220°C) can be cooked on **Combination 4**.

Use a microwaveable and heat-safe dish. Place the dish in the oven. Appetizers that conventionally cook in about 15 minutes should be checked for doneness after cooking 10 - 12 minutes.

Microwave appetizers can be assembled and refrigerated until needed. Arrange in a circular pattern on a microwave-safe serving dish. To keep breads and crackers crisp, line dish with a paper towel.

SHRIMP OPEN-FACE SANDWICHES

½ lb	cooked shrimp, chopped	250 g
1 cup	fresh bread crumbs	250 ml
⅓ cup	finely chopped celery	80 ml
2 tbsp	minced onion	30 ml
2 tbsp	mayonnaise	30 ml
2 tbsp	chopped parsley	30 ml
1 tbsp	chili sauce	15 ml
1 tbsp	lemon juice	15 ml
1	egg, beaten	1
½ tsp	salt	2 ml
	dash cayenne pepper	
8	slices of toasted bread of your choice	8
¾ cup	grated Swiss cheese paprika	180 ml

To Cook by Combination: Preheat at 375°F (190°C). In a medium bowl, combine shrimp, bread crumbs, celery, onion, mayonnaise, parsley, chili sauce, lemon juice, egg, salt and cayenne pepper. Mix well. Divide mixture into eight portions and spread on toast. Top with cheese and sprinkle with paprika. Arrange 4 sandwiches on a microwave, heat-safe plate. Reset oven to **Combination 4**. Cook 5 - 7 minutes. Repeat with remaining sandwiches.

Makes: 4 servings

STUFFED MUSHROOMS

18	large mushrooms	18
¼ cup	bread crumbs	60 ml
¼ cup	ground walnuts	60 ml
¼ - ½	cup	60 -
	grated Edam cheese	125 ml
1 tsp	Worcestershire sauce	5 ml
¼ tsp	oregano	1 ml
	pepper to taste	
2 tbsp	onion, minced	30 ml

Remove stems from mushrooms. Chop enough stems to equal ½ cup (125 ml). Combine with remaining ingredients and stuff each mushroom cap.

To Cook by Combination: Preheat at 375°F (190°C). Arrange mushrooms on a heat-safe dish. Reset oven to **Combination 4**. Cook 5 - 7 minutes.

To Microwave: Arrange mushrooms on a dish. Cook at **P6** 5 - 8 minutes, or until mushrooms are tender.

Makes: 18 appetizers

BACON-WRAPPED SCALLOPS

10-12 24	slices bacon small scallops	10-12 24
-------------	--------------------------------	-------------

To Broil: Place oven rack on Ceramic Tray. Preheat on **Broil**. Cut bacon slices in half and wrap around scallops. Secure with a wooden tooth pick. Evenly space on spatter shield. Place broiler pan on rack. Cook on **Broil** 10 - 12 minutes. Turn and continue to broil until browned.

To Microwave: Cut bacon slices in half. Place on bacon rack or paper towel and cover with paper towel. Partially cook at **P7** 4 - 6 minutes. Wrap bacon around scallops and secure with a wooden tooth pick. Arrange half on a microwave-safe plate. Cover with a paper towel. Cook at **P4** 4 - 6 minutes. Repeat with remaining hors d'œuvres. Serve hot.

Makes: 24 appetizers

Variation:

Fresh shelled oysters may be substituted for scallops.

CHICKEN TERIYAKI

2 lb 8 oz	chicken wings, cut apart can of chunk pineapple clove garlic, finely chopped	1 kg 240 g 1
1	soy sauce	60 ml
¼ cup	packed brown sugar	30 ml
2 tbsp	salt	2 ml
½ tsp	ginger	1 ml

Arrange chicken in an 8" (20 cm) square dish with meatier portions toward edge of dish. In a small bowl, combine remaining ingredients; stir well. Pour sauce over chicken.

To Bake: Place oven rack on Ceramic Tray. Preheat at **400°F (200°C)**. Bake at **400°F (200°C)** 35 - 45 minutes. Stir once.

To Microwave: Cover with wax paper. Cook at **P7** 12 - 14 minutes, or until chicken is tender. Rearrange chicken halfway through cooking. Serve with sauce.

Makes: 10 servings

BRIE IN PASTRY

1	sheet of frozen puff pastry [half of a 17¼ oz (518 g) package]	1
1	round of Brie cheese [14 - 18 oz (420 - 540 g)] water	1
1	egg, beaten with 1 tbsp (15 ml) water, optional	1

To Bake: Place oven rack on Ceramic Tray. Preheat oven at **375°F (190°C)**. Thaw pastry 20 minutes, then unfold. Roll into a 12" (31 cm) square. Cut 1" (2.5 cm) strip from each side of square. Roll 3 of the strips to 18" (45 cm) length and braid or twist to make 1 strip. If desired, remove rind from top of Brie. Place Brie, top down, in center of square of dough. Wrap dough over cheese, completely enclosing cheese. Moisten edges of dough with water and seal well. Place sealed-side down on cookie sheet. Moisten bottom side of dough and gently press braid around side; press ends together to seal. Use remaining strip of dough to make decorative cut-outs for top. If desired, brush egg mixture over dough. Place cookie sheet on oven rack. Bake at **375°F (190°C)**, 32 - 35 minutes, or until pastry is puffed and lightly browned. Let stand 20 minutes before serving. Serve with crackers.

COCKTAIL MEATBALLS ▣

½ lb	ground beef	250 g
¼ cup	dry bread crumbs	60 ml
1	egg	1
2 tbsp	green onion, finely chopped	30 ml
1	garlic clove, chopped	1
½ tsp	salt	2 ml
½ tsp	Italian seasoning	2 ml
¼ tsp	basil	1 ml
	dash of pepper	
½ cup	grape jelly	125 ml
½ cup	chili sauce	125 ml
1 tbsp	prepared mustard	15 ml

In a medium bowl, combine ground beef, bread crumbs, egg, onion, garlic and seasonings. Mix lightly. Shape into 25 meatballs.

In a ½-quart (0.5 L) casserole dish, combine jelly, chili sauce and mustard. Add meatballs and coat with sauce. Cover.

To Cook by Sensor Cooking: Press **Sensor Cook** Button eight times, then **Start**.

To Microwave: Cook at **P6** 6 minutes, then at **P4** 9 minutes.

Serve with sauce.

Makes: 25 meatballs

SAUCES

CRANBERRY SAUCE

1 lb	fresh cranberries	500 g
1 cup	sugar	250 ml
1/3 cup	grated rind of 1 orange orange juice	80 ml

To Microwave: Combine all ingredients in a large bowl. Cook at **P7** 4 - 5 minutes, or until berries are soft. If desired, mash berries. Serve cold.

Makes: 3 servings

BASIC WHITE SAUCE

2 tbsp	butter or margarine, melted	30 ml
2 tbsp	flour	30 ml
1/4 tsp	salt, optional dash of white pepper, optional	1 ml
1 cup	milk	250 ml

To Microwave: In a 4-cup (1 L) bowl, combine melted butter, flour, salt and pepper. Gradually add milk; stir until smooth. Cook at **P6** 4 - 5 minutes, or until sauce is thickened. Stir occasionally.

Makes: 1 cup (250 ml)

Variations:

Cheese Sauce: Stir in 1/2 - 3/4 cup (125 - 180 ml) shredded cheese. Cook at **P4** 1 minute, if necessary, to melt cheese completely.

Velouté Sauce: Use chicken broth in place of half of the milk.

Cream Soup Base: Add 1 cup (250 ml) chicken broth, 1 cup (250 ml) puréed vegetables and seasonings.

CARAMEL SAUCE

1 cup	water	250 ml
1/2 cup	brown sugar	125 ml
2 tbsp	cornstarch	30 ml
1 tbsp	butter	15 ml
1 tsp	salt	5 ml
1 tsp	vanilla extract	5 ml

To Microwave: Combine all of the ingredients in a large bowl. Cook at **P7** 3 - 5 minutes, stirring twice. Should be thick and translucent.

Makes: 1 cup (250 ml)

HOLLANDAISE SAUCE

1/2 cup	butter or margarine	125 ml
1/4 cup	lemon juice	60 ml
4	egg yolks	4
	salt and pepper to taste	

To Microwave: In a medium bowl or cup, melt butter at **P7** 50 - 60 seconds. Combine lemon juice with egg yolks. Vigorously stir into butter with a fork or whisk. Cook at **P4** 50 - 60 seconds, stirring several times. Season to taste. May be reheated at **P4** 30 - 40 seconds, stirring twice.

Makes: 3/4 cup (180 ml)

SPAGHETTI SAUCE

2 tbsp	oil	30 ml
3/4 cup	chopped onion	180 ml
2	cloves garlic, finely chopped	2
1 (28 oz)	can of whole tomatoes, chopped	1 (840 g)
1 (2/3 cup)	can of tomato paste	1 (165 ml)
1/2 cup	water	125 ml
1	bay leaf	1
1/2 tsp	salt	2 ml
1/4 tsp	basil	1 ml

EGGS

COUNTRY BREAKFAST

2	medium potatoes	2
¼ cup	butter or margarine	60 ml
¼ cup	chopped green pepper	60 ml
¼ cup	chopped onion	60 ml
4	eggs	4
½ cup	milk	125 ml
½ tsp	salt	2 ml
⅛ tsp	pepper	0.5 ml
2	slices processed cheese, halved, optional	2

To Microwave: Cook potatoes according to directions on page 32. Let stand 5 minutes; peel and slice. Meanwhile, in an 8" (20 cm) round dish, combine butter, green pepper and onion. Cook at **P7** 3 - 4 minutes, or until vegetables are tender; add sliced potatoes. Beat eggs, milk, salt and pepper together; stir into potatoes mixture. Cook, covered with plastic wrap, at **P4** 5 - 6 minutes, or until eggs are set; stir twice. Top with cheese. Let stand, covered, 5 minutes before serving.

Makes: 4 servings

BASIC OMELETTE

1 tbsp	butter or margarine	15 ml
2	eggs	2
2 tbsp	milk	30 ml
⅛ tsp	salt	0.5 ml
	dash pepper	

To Microwave: Heat butter in a 9" (23 cm) pie plate, at **P7** 30 seconds, or until melted, turn plate to coat bottom with butter. Meanwhile, beat remaining ingredients together; Pour into pie plate. Cook, covered loosely, but completely with plastic wrap or a lid, at **P4** 2¼ - 3¼ minutes, or until omelette is almost set; stir after 1 minute. Let stand, covered, 2½ minutes. With a spatula, loosen edges of omelette from plate; fold into thirds to serve.

Makes: 1 serving

Variations:

Cheese omelette: before folding, sprinkle ¼ cup (60 ml) of shredded cheese down center of omelette.

Ham omelette: before folding, sprinkle ¼ cup (60 ml) of finely chopped cooked ham down center of omelette.

Herb omelette: blend in ⅛ tsp (0.5 ml) of basil, thyme or crushed rosemary with eggs and milk.

Jelly omelette: before folding, spoon ¼ cup (60 ml) of jelly down center of omelette.

SCRAMBLED EGGS

For each egg, add 1 tbsp (15 ml) milk, water or tomato juice and a dash of salt. Beat eggs. Pour into a greased bowl. Cook eggs according to the chart. Stir two or three times during cooking.

DIRECTIONS FOR COOKING MEAT BY MICROWAVE

For best results, select roasts that are uniform in shape.

Boneless roasts are cooked more evenly.

Season as desired, but salt after cooking. Flavor and color enhancers are best applied before cooking.

These may be soy sauce, barbecue sauce, pastes of herbs, oils and mustard, Kitchen Bouquet thinned with butter or margarine, and seasoned crumb coatings.

Tender roasts should be shielded at the ends with small pieces of aluminum foil. Narrow parts, where the bone and meat taper, should also be shielded. Press the foil against the meat or secure with a wooden tooth pick. Foil should not be allowed to come close to the oven walls. Shielding should be done at the beginning of the cooking time and removed halfway through the cooking; however it may be added halfway through.

Place the roast on a microwave-safe rack set in a cooking dish, so that meat will not sit in the juices.

Place beef roasts fat-side down and other roasts fat-side up. Turn the beef over halfway through the cooking time.

Beef and lamb roasts may be covered with wax paper to hold the heat and prevent spattering. Pork, ham and veal roasts will benefit from covering loosely, but completely, with plastic wrap.

Hams should be skinned about 20 minutes before the end of the cooking time. Score fat in a decorative pattern and glaze, if desired, and recover with the plastic wrap.

Drain juices occasionally and reserve for gravy.

Let stand, tented with a piece of foil, 10 - 15 minutes to make carving easier and complete cooking. Internal temperature will rise 5 - 15°F (3 - 8°C) on standing.

Pot Roasts should be placed in a deep casserole along with 1½ cups (375 ml) liquid such as broth, tomato juice, wine or water and seasonings. Add vegetables, if desired. Cover and cook as recommended. Let stand 10 minutes.

Final temperatures may be checked using an instant read thermometer. **DO NOT** use a conventional meat thermometer on the microwave mode.

DIRECTIONS FOR ROASTING MEAT ON COMBINATION

Choose tender and moderately tender cuts for dry roasting and less-tender cuts for pot roasting. Season as desired, but salt after cooking. Tie on bay leaves and make slits to insert slivers of garlic for flavor, if desired. Parchment paper may be used as a cover.

Beef, Veal, Pork and Lamb roasts should be placed fat-side down on a microwaveable, heat-safe roasting rack set in a shallow dish. Shield the cut edges, narrow ends and bony areas with small pieces of aluminum foil for half of the roasting time. Basting may be done near the end of the roasting time. Turn roasts fat-side up after half the cooking time.

Ham with skin, should be placed in a dish, with a narrow strip of aluminum foil around cut edge. After 60 minutes of cooking, remove skin and excess fat. Turn, shield cut edge and continue cooking. Glaze during the last 30 minutes of cooking. Canned and ready-cooked hams may be shielded as described and glazed during the last 10 minutes of cooking.

Pot roast should be placed in a microwaveable heat-safe casserole along with vegetables, seasonings and liquid. Cover with a lid. Use for less-

tender cuts of beef, veal or lamb. Turn roast. Place the dish on the Ceramic Tray.

To Cook by Time: Multiply the weight of the meat by the time recommended in the chart, using the recommended combination setting.

To Cook by Convection Cooking: Press the **Auto Convection** Button three times for Beef-Medium. For pork press the **Auto Convection** Button four times, then enter the weight.

After cooking, let stand tented with foil, 10 - 15 minutes to complete cooking and make carving easier. During stand time, check the internal temperature of the roast using a microwave or conventional thermometer. The thermometer should not touch bone or fat. If it does, the reading could be inaccurate. If the temperatures are lower than desired, return the roast to the oven and cook for a few more minutes at the recommended Combination Setting. **DO NOT use a Microwave or Conventional meat thermometer in the oven when cooking on Combination.**

DIRECTIONS FOR BROILING MEAT

Preheat the oven on **BROIL**. Place the Oven Rack on the Ceramic Tray.

To prepare steaks and chops, trim the excess fat from the meat. Trim and slash fat at regular intervals around the edge to prevent curling during broiling. Broiling is best for tender cuts of beef, pork and lamb. Less tender cuts such as blade or round steak should be marinated several hours to tenderize before broiling.

Place meat on a spatter shield. Put the spatter shield on the broiler pan.

Broiling times will vary, therefore, use the guide as a recommendation. Turn meat over after half of the broiling time.

To check, touch the surface. Softer meat is less cooked than firm meat. Red color indicates rare, pink is medium and gray is well done, when meat is cut.

To prevent the surface from drying, butter or oil may be brushed on ham, lamb or pork. Bacon slices may be wrapped around filet mignon, rib eye slices and beef or lamb patties.

COOKING MEAT PORTIONS

To Microwave: Meat may be brushed with browning sauce mixed with equal parts of melted butter to enhance appearance. Pierce sausage links with a fork, and score wieners before cooking. Arrange food in a single layer in a dish. A rack may be used to elevate fatty meats. Cover most meats with wax paper, and pork with

plastic wrap. Place bacon on a rack and cover with a paper towel. When not using a rack, up to six bacon slices may be placed between layers of paper towels. Cook according to the time given in the chart, below. Turn, or rearrange, as required. Let stand according to the recommended time in the chart, below.

1	clove garlic, minced	1
4	green onions, sliced	4
2	stalks celery, sliced	2
8	mushrooms, sliced	8
1	green or red pepper, sliced	1
4 cups (5 oz)	spinach, shredded	1 L (150 g)

To Microwave: Beef may be partially frozen to make cutting easier. Cut meat across grain in 4 x ¼" (10 x 1 cm) strips. In a 3-quart (3 L) shallow casserole, combine beef, water, cornstarch, sugar, and bouillon. Cover and cook at **P7** 2 minutes. Stir, cover and cook at **P4** 3 minutes. Stir in remaining ingredients, except spinach. Cover and cook at **P6** 4 - 5 minutes, or until ingredients are tender. Add spinach and cook at **P6** 2 - 4 minutes. Serve over rice or fine noodles.

APPLE STUFFED PORK CHOPS

4	pork chops, 1" (2.5 cm) thick	4
¼ cup	butter or margarine, melted	60 ml
½ cup	chopped apple	125 ml
1	slice bread, torn in bits	1
¼ cup	Cheddar cheese, grated	60 ml
2 tbsp	orange juice	30 ml
2 tbsp	celery, chopped	30 ml
1 tbsp	onion, chopped	15 ml
1 tbsp	raisins, chopped	15 ml
1 tsp	sage, divided	5 ml
¼ tsp	salt	1 ml
½ tsp	black pepper	2 ml

Cut pocket in each chop. In bowl, combine butter, apples, bread, cheese, orange juice, celery, onion, raisins, ½ tsp (2 ml) sage, and salt; mix well. Fill each pocket with stuffing and close the opening with wooden toothpicks. Sprinkle chops with remaining sage and pepper.

To Cook by Combination: Preheat at **375°F (190°C)**. Reset to **Combination 3** and cook 28 - 30 minutes.

To Microwave: Arrange pork chops in 10" (25 cm) square dish. Cover with plastic wrap. Cook at **P4** 15 - 18 minutes.

To Complete: Let stand, covered, 5 minutes. Place remainder of stuffing in bowl. Cover loosely, but completely with plastic wrap. Cook at **P4** 2 - 3 minutes, or until hot.

DIRECTIONS FOR ROASTING POULTRY BY COMBINATION

Wash poultry and pat dry. Whole poultry may be roasted stuffed or unstuffed. Tie the legs together with cotton string. Close openings with wooden tooth picks or cotton thread. Season as desired, but salt after cooking.

Place poultry on a microwaveable, heat-safe rack in a shallow dish. Shield leg ends and wings with small pieces of aluminum foil. Birds over 2 lbs (1 kg) should be turned over halfway through cooking.

Turkey and chicken should be basted several times during roasting. Excess liquid may be removed during roasting. Cornish hens may be brushed with a glaze if desired.

Duck should have the skin pierced liberally all over to allow the grease to drain during cooking. Drain juice once or twice during cooking.

Place the dish on the Ceramic Tray.

To Microwave: Multiply the ready-to-cook weight of the poultry by the minimum recommended cooking time.

To Cook by Convection Cooking: Press the **Auto Convection** Button once (Chicken Pieces) or twice (Whole Chicken) and enter the weight.

After cooking, let stand, tented with foil, 10 - 15 minutes. This stand time allows for easier carving. During stand time, test for doneness. Small poultry is cooked when juices run clear and the drumsticks readily move up and down. Large poultry should be checked with an instant read thermometer inserted in the meaty part of both thighs.

If thermometer touches bone, the reading may be inaccurate. **DO NOT use a Conventional or Microwave thermometer in the oven when cooking by Combination.** If the poultry is undercooked, cook a few more minutes at the recommended Combination Setting.

POULTRY

DIRECTIONS FOR COOKING POULTRY ON MICROWAVE

Whole poultry may or may not be stuffed. To close opening use cotton thread or wooden tooth picks. Tie legs together with cotton string. Place breast-side down on a microwave rack in a casserole dish.

Season as desired, but salt after cooking. Flavor and color enhancers are best applied before cooking. Paprika and butter rubbed on chicken skin will give an attractive color after cooking. Browning sauce and Kitchen Bouquet should be mixed with equal parts of butter or oil before rubbing on. Other sauces such as barbeque, tandoori, teriyaki or spaghetti will provide flavor.

Shield the leg ends, wings, the breast area or where flesh is thin with small pieces of aluminum foil. Shield for half the cooking time.

Cover with wax paper, plastic wrap or lid after cooking time to keep in heat.

Cook by time and power.

Turn poultry breast-side up halfway through the cooking time.

Less tender hens should be cooked in liquid or broth. Use ¼ cup per lb (125 ml per kg) of liquid along with seasonings and grated vegetables for flavor. Cover dish.

Poultry pieces should be placed in a single layer with the meatier portions toward the edge of the dish. Rearrange pieces halfway through the cooking time.

To Microwave: Multiply the ready-to-cook weight of the poultry by the minimum time recommended in the chart below and program the oven accordingly. Cover poultry with wax paper.

When poultry is cooked, the meat will be tender; when pierced, the juices will run clear. If the juices are pink, return the poultry to the oven for additional cooking.

The drumsticks of whole poultry will readily move up and down. Check the temperatures of large birds with a thermometer in both thigh muscles.

Let poultry stand, tented with foil, 10 - 15 minutes.

DIRECTIONS FOR BROILING CHICKEN

Place the Oven Rack on the Ceramic Tray. Preheat the oven on **BROIL**.

Brush chicken with butter, margarine, oil or sauce before and during broiling. Basting helps prevent chicken from drying out.

Place the chicken skin-side down on the broiler pan. Place the broiler pan on the Oven Rack on the Ceramic Tray.

Broil according to the recommended time in the chart below.

Halfway through the cooking time, turn chicken skin-side up.

Season after broiling.

To test for doneness, cut into poultry. Poultry should be white in color, and juices should be clear.

FISH AND SEAFOOD

DIRECTIONS FOR COOKING FISH AND SEAFOOD BY MICROWAVE

Clean fish before starting the recipe. Arrange fish in a single layer; do not overlap edges. Place thicker pieces toward outside edge of dish. Shrimp and scallops should be placed in a single layer.

To Microwave: Cover the dish with plastic wrap. Cook on the power level and for the minimum time recommended in the chart. Halfway through cooking, rearrange, stir shrimp or scallops and turn fish steaks over. Let stand, covered, 5 minutes.

Test for doneness before adding extra cooking time. Fish and seafood should be opaque in colour and fish should flake when tested with a fork. If undercooked, return to the oven and continue to cook for 30 - 60 seconds.

Arrange fish in a single layer.

Cover dish with plastic wrap.

Test for doneness before adding extra cooking time.

CASSEROLES

ADAPTING RECIPES

Casseroles which are generally baked and browned in a conventional oven can be cooked by Sensor using the **Sensor Cook** Button (Casserole 1 or 2). Casseroles prepared on the range-top, such as Mermaid's Imperial Delight (P 30) or casseroles which do not require browning, are best prepared by **MICROWAVE**.

To cook your own casserole recipe by Sensor Cooking, prepare casserole according to the recipe directions. Use a casserole dish which is microwave safe and ovenproof. Place the casserole on the Ceramic Tray. Cover with lid and cook by Sensor Cooking by pressing **Sensor Cook** Button eight times or nine times, then **Start**. In general, casseroles with a conventional cooking time of 30 minutes or less will cook for approximately the same time. For casseroles with a conventional cooking time longer than 30 minutes, the combination time will be approximately half the conventional cooking time.

Casseroles are cooked when the edges are hot and bubbly. The center temperatures should be approximately 160°F (70°C).

MICROWAVE cooked casseroles save time. Prepare casserole according to the recipe directions. Most casseroles can be cooked covered. Casseroles with toppings are best cooked uncovered. Sprinkle cheese such as grated Parmesan or shredded Mozzarella on the casserole after cooking. Cook casseroles with milk base at **P4**; others can be cooked at **P7** Cooking time will vary depending on the starting temperature, quantity and density of the food. Generally, casseroles which have just been assembled with precooked meats and noodles will take 8 - 15 minutes. Casseroles are cooked when they are hot and bubbly.

CHICKEN ENCHILADAS

1	large onion, chopped	1
½ cup	chopped green pepper	125 ml
2 cups	finely chopped cooked chicken or turkey	500 ml
½ cup	chopped ripe olives	125 ml
2	cans mild enchilada sauce, divided	2 (300 g ea.)
(10 oz ea.)	shredded Cheddar cheese, divided	375 ml (180 g)
1½ cups	large corn tortillas	8
(6 oz)	Shredded lettuce, optional	
8	Sour cream, optional	

In a medium glass bowl, combine onion and green pepper. Cover with plastic wrap. Cook at **P7** 3 minutes, stir once. Stir in chicken, olives and ½ cup (125 ml) enchilada sauce. Cover with plastic wrap. Cook at **P7** 2 minutes, or until hot. Stir in ½ cup (125 ml) cheese. Let stand, covered. Arrange two tortillas, side-by-side on paper towel. Cover with another paper towel. Repeat with remaining tortillas stacking one layer on top of the other. Heat at **P7** 1 minute. (This softens tortillas and makes them easier to roll.) Spoon about ⅓ cup (80 ml) chicken filling down center of each tortilla. Roll up tortilla and place seam-side down in 11 x 7" (28 x 18 cm) dish. Pour remaining sauce over tortillas.

To Cook by Sensor Cooking: Top enchiladas with remaining cheese. Cover with lid. Place dish on Ceramic Tray.

Press **Sensor Cook** Button eight times, then **Start**. Serve garnished with lettuce and sour cream.

VEGETABLES AND SIDE DISHES

DIRECTIONS FOR COOKING FROZEN VEGETABLES BY MICROWAVE

Frozen Vegetables

For 9 - 10 oz (270 - 300 g) packages, remove vegetables from their package and place in 1 - 1½-quart (1 - 1.5 L) casserole. Follow manufacturer's directions for amount of water to add to the dish. A minimum of 2 tbsp (30 ml) water should be added to frozen vegetables. Cover with a lid or plastic wrap. Cook at **P7** for 5 - 9 minutes, or until slightly tender. Stir halfway through cooking and before stand time. Let stand, covered, 3 minutes before serving.

Frozen Vegetables in a Pouch

Remove pouch from the package and place on a microwave-safe plate. Cut small slit in the center of pouch. Cook at **P7**, following times on the package directions (approximately 3½ - 7 minutes, depending on vegetable). Let stand, 2 minutes, before serving.

To Cook by Sensor Cooking: Cover with a lid or wax paper. Press the **Sensor Cook** Button four times. Stir once when time appears in the Display Window and let stand 3 minutes.

DIRECTIONS FOR COOKING FRESH VEGETABLES BY MICROWAVE

Weights given in the chart for fresh vegetables are the purchase weight before peeling and trimming. Prepare vegetables for cooking. Cut, slice, or trim as directed in the chart. Place vegetables in the casserole. Add amount of water recommended in the chart. Add salt to water or salt after cooking. Whole vegetables, such as potatoes or eggplant, should be pierced with a fork several times before cooking. Arrange on a microwave-safe dish in the oven. Arrange potatoes in a circular pattern on the dish. Cook potatoes, uncovered, by Microwave and Sensor Cooking.

To Microwave: Cover with a lid or plastic wrap. Cook according to the recommended time in the chart. Two-thirds of the way through cooking, stir, rearrange, and/or turn vegetables over.

To Cook by Sensor Cooking: With Sensor Cooking it is not necessary to know the weight of vegetables. Except potatoes, cover with a lid or cover loosely, but completely, with plastic wrap. Choose the appropriate vegetable category, then press **Start** Button.

For root vegetables, such as potatoes and carrots, press the **Sensor Cook** Button once. For fresh vegetables, press the **Sensor Cook** Button twice. For canned vegetables, press the **Sensor Cook** Button three times. For frozen vegetables, press the **Sensor Cook** Button four times. If softer or firmer vegetables are preferred, use the Doneness Control. When time appears in the Display Window, stir vegetables.

To Complete: After cooking, stir vegetables. Let stand, covered, before serving. Vegetables that are cut into pieces should stand 3 minutes. Whole vegetables should stand 5 minutes.

ADAPTING RECIPES

To convert your own pasta recipes, follow these guidelines.

To Bake:

Choose a recipe that is traditionally cooked in the oven. Prepare recipe according to the recipe directions. Set the oven temperature 25 - 50°F (10 - 25°C) lower than conventional temperatures. Place the Oven Rack on the Ceramic Tray. Preheat the oven at the recipe recommended temperature. Place a dish on the Oven Rack. Check doneness 10 - 15 minutes before the recipe's minimum recommended cooking time. Recipes that "set" are best cooked by **Bake**.

To Cook by Combination:

Choose a recipe that is traditionally cooked in the oven. Prepare recipe according to the recipe directions. Place a dish in the oven. Cook on **Combination 3**. Check doneness 10 - 15 minutes before the recipe's minimum recommended cooking time.

To Microwave:

Choose recipes that are prepared on the range-top or oven. Use our charts as guidelines for the amount of liquid needed, dish size and power to use. Rice needs time to reconstitute, so it is best cooked at **P3**.

PEPPERED SESAME NOODLES

8 oz	vermicelli	240 g
2 tbsp	sesame oil	30 ml
2 tbsp	peanut oil	30 ml

DIRECTIONS FOR COOKING CAKES, CUPCAKES, MUFFINS AND QUICK BREADS ON MICROWAVE

For packaged mixes, prepare batter according to the recipe on package directions. When unsure about converting conventional recipes follow a similar recipe.

Use recommended dish size. Glass dishes allow the bottom of baked goods to be checked visually for doneness. After cooking, visually check the bottom for doneness. Microwaveable plastic or ceramic may also be used.

Grease bottom of the dish when cakes are served from the dish. Grease the bottom and sides, and line bottom of the dish with wax paper, when the food is inverted from the dish. Never flour the dish.

Use only 2¼ cups (560 ml) of batter (half full) for a 8 - 9-inches (20 - 23 cm) round or square dish. Cook the second layer immediately after the first. The remaining batter can be used for cupcakes.

Shield square dishes with triangles of foil on each corner; mold around dish. When necessary, shield ends of loaf dishes with 3-inches (7.5 cm) strip of foil. Remove foil approximately halfway through the cooking time.

When cooking cupcakes and muffins, line microwave muffin pans with paper baking cups or grease solid cups. Fill cups ⅔ full.

Cover with wax paper when indicated in the chart or recipe. Most packaged mixes, and some recipes, benefit from 2-stage cooking. We have given 2-stage cooking directions where they are helpful.

Check during cooking since recipes and cooking times vary. After cooking, tops may be sticky, but a toothpick, inserted near the center should come out clean.

Let stand, uncovered, on a flat surface for 10 - 15 minutes. Stand time is important to allow the food to finish cooking. When left in the pan longer, cakes may be difficult to invert out of the pan.

Cakes and breads that are to be inverted should be loosened from the sides of the dish. Carefully turn the food out of the dish and peel off the waxed paper. Store, covered, until ready to serve.

ADAPTING RECIPES

Your favorite yeast and quick bread recipes can be baked in this oven on **BAKE**. Just follow our guidelines.

BAKE temperatures may be 25 - 50°F (10 - 25°C) lower than conventional temperatures. For quick breads prepare batter according to the recipe directions, and reduce the recommended baking temperature by 25°F (10°C). For muffins, bake at **375°F (190°C)**. Place the Oven Rack on the Ceramic Tray. Preheat the oven according to the temperature recommendations. Place a dish on the Oven Rack. Check doneness 5 - 10 minutes sooner than minimum conventional baking times. Bake muffins 12 - 18 minutes. Quick breads and muffins are done when a toothpick inserted near center comes out clean.

Bake yeast breads and rolls at **325°F (165°C)**. Prepare recipe according to directions. Place the Oven Rack on the Ceramic Tray. Preheat the oven to **325°F (165°C)**. Place a dish on the Oven Rack in the oven. Check yeast breads 5 - 10 minutes sooner than minimum conventional baking times. Check yeast rolls 5 minutes sooner than minimum conventional baking times. Yeast breads and rolls are done when the top is nicely browned and bread sounds hollow when tapped on bottom.

Baking cakes, cupcakes, muffins, quick bread and yeast breads on convection

Place the Oven Rack on the Ceramic Tray. Preheat the oven. Use the temperature indicated in the recipe or reference panel of prepared mix. Baking temperatures correspond to most conventional cookbook recipes. Use only one cake layer, 12-cups (3 L) muffin pan or two loaf pans at one time. For two cake layers, bake one after the other. Use **metal pans** when baking.

To prepare cake pans, either grease and flour the bottom or place a circle of wax paper on the bottom and grease. For muffins and cupcakes, grease or line cups with paper. Bread pans should have the bottom and sides greased.

When cakes, muffins, brownies and quick breads are cooked, they will spring back when touched on the top, the sides will pull away from the pan and a toothpick inserted near the center will come out dry. Yeast breads and rolls will be browned on all sides and sound hollow when tapped.

Proofing (rising) of homemade yeast bread dough

Select a yeast bread recipe that yields one or two loaves. Prepare dough according to recipe directions.

Place the dough in a well greased large bowl. Brush top of the dough with oil. Cover loosely with plastic wrap.

Place 3 cups (750 ml) of warm water in a 10½" (26.5 cm) glass or glass ceramic pie plate or square dish. Place a bowl with the dough in the water.

Heat at **P1** 25 - 30 minutes, or until dough doubles in size. Dough has risen when two fingertips lightly pressed into dough leave an impression.

Punch dough down. Let rest, covered, 15 minutes. Shape into loaves as recipe directs. Place dough into the well greased 8½ x 4½ x 2½" (22 x 11 x 6 cm) loaf dishes that will fit into a 10" (25 cm) square dish. Bake according to recipe directions.

2-stage microwave defrosting and proofing (rising) of frozen bread dough

Fill a 12 x 9" (31 x 23 cm) glass dish with 4 cups (1 L) hot tap water. Heat at **P7** 4 minutes.

Generously grease one or two 8½ x 4½ x 2½" (22 x 11 x 6 cm) glass loaf dishes and oil all sides of frozen bread dough. Place the dough in the loaf dish, set in hot water. Cover with wax paper.

Heat at **P4**, 2 minutes.

Turn dough over.

Heat at **P6**, 2 minutes.

Let stand in oven 10 minutes. Dough should be defrosted and slightly warm. If needed, continue heating at **P6** in 1 minute intervals, until defrosted.

To rise, heat at **P4**, 1 minute. Let stand in oven 15 minutes. Repeat procedure until dough rises 1" (2.5 cm) above dish. Procedure is usually repeated 3 - 4 times.

Bake according to recipe directions.

BRAN MUFFINS (refrigerator)

3 cups	bran	750 ml
1 cup	boiling water	250 ml
½ cup	vegetable oil	125 ml
½ cup	molasses	125 ml

OATMEAL-HONEY BREAD

5¾ -		1.43 -
6¼ cups	all purpose flour, divided	1.56 L
2	packages dry yeast	2
1 cup	milk	250 ml
¾ cup	water	180 ml
1 cup	oats	250 ml
⅓ cup	honey	80 ml
⅓ cup	butter	80 ml
1½ tsp	salt	7 ml
2	eggs, separated	2

In a large bowl, combine 2 cups (500 ml) flour and yeast. Set aside. In a medium microwavable bowl, combine milk, water, oats, honey, butter and salt. Heat at **P7** 1 - 1½ minutes, or until warm [120°F (50°C)]. Add to flour mixture and stir. Set aside egg whites. Beat egg yolks into mixture at low speed 30 seconds, then at high speed 3 minutes. Gradually, stir in remaining flour with a spoon. Turn dough onto floured surface. Knead until smooth and elastic. Shape into a ball. Place in a greased bowl and roll to grease surface. Cover with a towel and allow to rise until double in bulk in a warm place or according to microwave proofing directions. When risen, punch down and divide in two. Cover with a towel, let rise 10 minutes. Place in two greased loaf pans or shape in one round and place on baking sheet. Cover and let rise until double.

To Bake: Place Oven Rack on Ceramic Tray. Preheat at **350°F (180°C)**. Brush loaves with beaten egg white and sprinkle with oats. Bake 35 - 40 minutes. Remove from pans and cool on rack.

DIRECTIONS FOR BAKING CAKES AND PIES USING ONE TOUCH BAKING

One Touch Baking takes the guesswork out of baking cakes or pies. There is no need to select cooking time or oven temperature. The oven does it automatically.

Auto Cake

Prepare batter according to the package or recipe directions. For best results, use recipes from the dessert section of the cookbook. Cook one cake at a time. Use metal pan for best results.

The Auto Cake feature is sub-divided into two categories:

Auto Convection Button five times is for cakes that will bake in 25-35 minutes. **Auto Convection** Button six times are for cakes that will bake in 45-65 minutes.

The cake categories are not suitable for fudge cakes, brownies or traditional fruit cake recipes.

To Bake Cakes: Place the Oven Rack on the Ceramic Tray. Place cake on the Oven Rack, choose the appropriate cake category and press **Start** Button.

Auto Pie

There are three sub-categories for the Auto Pie feature. To use press **Auto Convection** Button seven times for double crusted pies with fresh fruit filling. Press **Auto Convection** Button eight times for double crusted frozen pies [no larger than 2 lb 5 oz (1150 g)]. Press **Auto Convection** Button nine times for baking double crusted pies with precooked or canned pie filling.

ADAPTING RECIPES

Cake and cookie recipes can be baked on **Bake**. Bake temperatures may be 25 - 50°F (10 -25°C) lower than conventional temperature for cakes and cookies. For layer cakes, use **325°F (165°C)**. For pound cakes or cakes baked in a fluted tube pan, bake at **300°F (150°C)**. For fruit cake, use **250°F (120°C)**. Prepare cake and cake pans according to the recipe directions. Always use metal pans for best results. Place the Oven Rack on the Ceramic Tray. Preheat the oven according to the recipe temperature recommendations. Place a dish on the Oven Rack.

Check doneness a few minutes sooner than the minimum conventional baking time. Cakes are done when a toothpick inserted near center comes out clean. Prepare recipe and cookie sheet or pans according to the recipe directions. Place the Oven Rack on the Ceramic Tray. Preheat the oven according to the temperature recommendations. Place cookie sheet on Oven Rack. Check doneness at the minimum recommended cooking time.

UP - SIDE DOWN PEAR CAKE

Topping:

1/3 cup	butter	80 ml
1 cup	brown sugar	250 ml
2 tbsp	red wine	30 ml
1/4 tsp	cinnamon	1 ml
1/4 tsp	cloves	1 ml
2	Bosc pears, peeled and sliced	2
1/4 cup	ground walnuts	60 ml

Cake:

2 cups	flour	500 ml
1/2 tsp	salt	2 ml
2 tsp	baking powder	10 ml
1/2 cup	butter or margarine	125 ml
2/3 cup	sugar	165 ml
2	eggs	2
1 tsp	vanilla extract	5 ml
2/3 cup	milk	165 ml

In a 9" (23 cm) round cake pan, combine butter, brown sugar, wine, cinnamon and cloves. Cover with wax paper. Heat at **P7** 2 - 3 minutes, or until sugar is melted. Stir well. Arrange pear slices attractively on mixture. Sprinkle with nuts in between slices; set aside.

In a small bowl, combine flour, salt and baking powder. Cream the butter and sugar with an electric mixer at high speed, until creamy. Beat in the eggs and vanilla. Alternately add milk and flour mixture. Pour over pears.

To Bake: Place Oven Rack on Ceramic Tray. Preheat oven at **350°F (180°C)**. Place cake on Oven Rack and bake, 30 - 35 minutes, or until toothpick inserted near center comes out clean.

To Microwave: Cook at **P4** 10 minutes, then **P7** 2 minutes, or until toothpick inserted near center comes out clean.

To Complete: Let stand 5 - 10 minutes; invert onto a serving plate and serve warm.

Cooking pudding and pie filling mixes

In a container twice the volume of the mix, combine ingredients according to the package directions. Cook at **P4** according to the time recommended in the chart. Stir twice during cooking time.

Chill before serving. Stir rice or tapioca pudding occasionally. Egg custard, rice pudding and tapioca pudding will thicken as they chill.

Item	Approx. Cooking Time at P4 (in minutes)
Regular Pudding and Pie Filling 4 servings [3¼-4⅛ oz (98-124 g)] 6 servings [4¾-5½ oz (142-165 g)]	5 - 7 9 - 11
Egg Custard* [3 oz (90 g)]	5 - 6
Rice Pudding* [3¾ oz (112 g)]	7½ - 9
Tapioca Pudding* [3½ oz (105 g)]	7 - 8½

* Mixture will thicken as it chills.

Preparing Pie Crusts

To Bake: For single pie shell.

Place Oven Rack on the Ceramic Tray. Preheat at **425°F (220°C)**. Prepare pastry using your favourite recipe, prepared mix or frozen pie shell. Use a metal pie plate. Prick the bottom and sides with a fork. Bake according to time in the chart.

To Microwave: For single pie shell. Substitute some whole wheat flour for white flour. If desired, add a few drops of yellow food coloring or browning agent to the liquid to improve the color.

Crusts may also be brushed with dark corn syrup or molasses for sweet fillings or Worcestershire or soy sauce for savory fillings. Use a microwaveable plastic, glass or ceramic pie plate. Prick the bottom and sides with a fork. Let rest 10 minutes before cooking. Cook according to time in the chart. Visually check for doneness. Pastry crusts should be opaque. If crust is undercooked, add cooking time in 15 second increments.

Crust	Microwave	Bake
Homemade or mix	P6 3½ - 5 min.	425°F (220°C) 8 - 10 min.
Frozen	P4 4 - 5½ min.	375°F (190°C) 7 - 10 min.
Graham Cracker or Cookie Crust	P4 1 - 2 min.	325°F (165°C) 5 - 8 min.

ADAPTING RECIPES

For pie baking, follow directions given here and in the recipes in this cookbook. Place the Oven Rack on the Ceramic Tray before preheating the oven. Use homemade or package pie crust mixes.

DO NOT use refrigerated or frozen pie crusts, as these do not cook properly. Roll out dough to ⅛-inch (0.5 cm) thickness. Use 9-inches (23 cm) aluminum pie plates. For fruit pies, preheat the oven to the temperature a similar recipe recommends. Oven Rack should be on the Ceramic Tray. Bake 40 - 60 minutes, or until crust is brown and juice bubbles. Pie edges may be shielded with a 2 - 3-inches (5 - 7.5 cm) strip of foil to prevent excess browning.

PIE CRUST

1 cup	flour	250 ml
½ tsp	salt	2 ml
⅓ cup	shortening	80 ml
3 -		45 -
4 tbsp	cold water	60 ml

In a medium bowl, combine flour and salt. Cut in shortening until mixture resembles coarse crumbs. Add water, a tablespoon at a time, stirring lightly with fork. Gather dough into a ball. Roll dough ⅛" (0.5 cm) thick.

To Bake: Place Oven Rack on Ceramic Tray. Preheat oven at **375°F (190°C)**. Gently place crust in a 9" (23 cm) pie plate. Trim edge so ¾" (2 cm) overhang remains. Roll overhang down to rim of pie plate. Flute edge. Prick bottom and sides of crust with fork. Place pie plate on Oven Rack. Bake at **375°F (190°C)**, 14 - 16 minutes, or until crust is golden brown. Cool completely before filling.

To Microwave: Gently place crust in a 9" (23 cm) glass pie plate. Trim edge, so ¾" (2 cm) overhang remains. Roll overhang down to rim of pie plate. Flute edge. Prick sides and bottom of crust with fork. Let stand 10 minutes. Place dish on inverted pie plate. Cook at **P7** 3½ - 5 minutes, or until crust is opaque. If crust is undercooked, add cooking time in 15-second increments. Let stand until cool.

Makes: one 9" (23 cm) pie crust

NOTE:

For two crust pie, use 2 cups (500 ml) flour, 1 tsp (5 ml) salt, ⅔ cup (165 ml) shortening and 5 - 7 tbsp (75 - 105 ml) water. Prepare as directed above. Cut dough in half. Roll out into two crusts.

PIES

TROPICAL PIE

1	envelope unflavoured gelatin	1
¾ cup	pineapple juice	180 ml
1¾ cups	toasted coconut	430 ml
3 tbsp	butter or margarine, melted	45 ml
1 (3½ oz)	package tapioca pudding mix	1 (105 g)
¾ cup	milk	180 ml
3	eggs, separated	3
1 (8 oz)	can crushed pineapple, undrained	1 (240 g)
2 tbsp	sugar	30 ml
	Sweetened whipped cream, optional	

To Microwave: In a 2½-quart (2.5 L) glass bowl, sprinkle gelatin over pineapple juice, let stand 5 minutes. Meanwhile, in a 9" (23 cm) pie plate, toss together coconut and melted butter. Press coconut into bottom and up sides of dish to make a crust. Add pudding mix and milk to gelatin mixture, stir until well blended. Cook at **P6** 5 - 7 minutes, or until mixture boils. Beat egg yolks slightly. Stir a small amount of hot mixture into egg yolks, return to hot mixture, beating until well blended. Stir in undrained pineapple. Chill until mixture mounds slightly, about 40 minutes.

In a small bowl, with electric mixer at high speed, beat egg whites until soft peaks form. Gradually beat in sugar, continue beating until stiff peaks form. Fold egg whites into pudding mixture. Turn into prepared crust. Chill until firm, about 3 hours. Garnish, if desired, with toasted coconut and whipped cream.

APPLE PIE

1	Pastry for 2-crust 9" (23 cm) pie	1
2 lb	fresh baking apples or peaches	1 kg
1 tbsp	lemon juice	15 ml
¾ cup	sugar	180 ml
2 tbsp	flour	30 ml
1 tsp	cinnamon	5 ml
⅛ tsp	nutmeg	0.5 ml
⅛ tsp	salt	0.5 ml
2 tbsp	butter or margarine	30 ml

To Bake: Place Oven Rack on Ceramic Tray. Preheat oven at **400°F (200°C)**. Roll out half of pastry and line 9" (23 cm) aluminum pie plate. Roll out top crust; set aside. Peel, core and slice each apple into sixteenths; toss with lemon juice. In small bowl, combine sugar, flour, cinnamon, nutmeg and salt; add to apples and toss until well coated. Place in lined pie plate. Dot with butter. Fit top crust and flute edges; cut 4 vent holes in top crust. Place pie plate on Oven Rack in oven. Bake at **400°F (200°C)**, 40 - 45 minutes, shielding pie crust after 30 minutes. Bake until crust is brown and juice bubbles through slit.

FRUIT AND ZABAGLIONE

4	egg yolks	4
¼ cup	sugar	60 ml
¼ cup	Marsala or dry sherry	60 ml
4 cups	cut-up mixed fresh fruit such as: strawberries, melon, blueberries, peaches and nectarines	1 L

To Microwave: In a medium glass bowl, beat egg yolks and sugar 3 minutes, with electric mixer at high speed, or until thick and lemon-colored. Meanwhile, heat Marsala at **P7** 1 minute, or until wine boils. With mixer at high speed, gradually beat hot wine into egg yolk mixture. Cook wine mixture at **P6** 1 - 2 minutes, or until thickened and smooth and mixture mounds when dropped from wire whisk, beat every 30 seconds with whisk. With mixer at high speed, beat cooked mixture 2 minutes until light and fluffy.

NOTE:

Mixture should double in volume. Spoon some fruit into stemmed dessert glasses, top with some sauce. Repeat layering ending with fruit. Serve immediately.
