Gas Supply: This cooktop is factory set for use with Natural gas. Cooktop can be converted to LP gas. Provide a gas supply line of $\frac{3}{4}$ " (1.9 cm) rigid pipe to the cooktop location. A smaller size pipe on longer runs may result in insufficient gas supply. Pipe-joint compounds that resist the action of LP gas must be used. Do not use TEFLO™ tape. With LP gas, piping or tubing size can be $\frac{1}{2}$ " minimum. Usually, LP gas suppliers determine the size and materials used in the system.

Electrical: A 120 volt, 60 Hz., AC only, 15-amp fused, electrical circuit is required. A time-delay fuse or circuit breaker is also recommended. It is recommended that a separate circuit serving only this cooktop be provided.
