Tall Tub Design

The tall tub interior holds more dishes and provides more room for items that are too big to fit in a standard dishwasher tub.

Tiered, Removable Upper Rack

The tiered upper rack offers room throughout the dishwasher. Remove the upper rack entirely to wash large items in the lower rack.

MasterClean™ Plus Wash System

The MasterClean™ Plus wash system combines high water pressure and high water flow to powerfully remove food from dishes.

Twice as Nice™ Silverware Baskets

Multiple loading options for the two silverware baskets (in the door, in the upper rack or in the lower rack) provide increased flexibility.
