

CLEAN CLOTHES, CLEAN CONSCIENCE

Our commitment to bringing affordable and efficient appliances to our customers is reflected in the resource-saving features of our high-efficiency top load pair.* Now you can use less water to get the same great clean, while also conserving energy. In addition, many of our other top load pairs offer large capacity and multiple cycles and options, so you always have the right space and settings for the load.

*Refers to NTW4750Y and NE/GD4700Y models only.

HIGH EFFICIENCY ALL AROUND

Our HE top load washer exceeds government standards for ENERGY STAR® qualification and meets CEE Tier 3* standards, helping you conserve resources and lower utility bills.

WASH AND DRY MORE AT ONCE

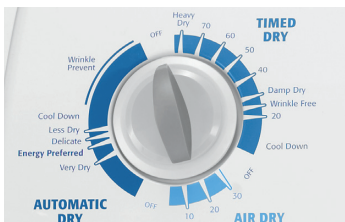

Our biggest capacity top load laundry pair fits more in every load. Now you can conserve resources and cut down on the time and energy spent doing laundry.

HIGH EFFICIENCY IN A TOP LOAD FORMAT

OUR HE WASHER USES UP TO 75% LESS WATER
AND 82% LESS ENERGY,** HELPING YOU SAVE OVER \$1,200
IN UTILITY COSTS OVER ITS LIFETIME.†

SENSES WHEN ITEMS ARE DRY

Automatic Dryness Control uses a sensor to monitor air temperature, automatically stopping the cycle when fabrics are dry to help reduce shrinking and overdrying.

CLEAN WITH LESS WATER

A low-water wash system cleans efficiently with as little as 13 gallons of water. Rather than filling the basket, a concentrated detergent and water mix penetrates fabrics to help remove soils and stains.

Note: Not all features included on all models. *Based on the Consortium for Energy Efficiency qualifying product list. Visit cee1.org for more information.
**Compared to pre-2004 traditional top load washers. †Compared to pre-2004 traditional top load washers, average use, normal cycle, 10-year life.

For every Amana® major appliance sold, a tree will be planted to help rebuild global deforested areas.™

*Indicates a retail-specific model

**During 2013, for every major appliance it sells in the U.S., Amana® will donate \$0.10 (the cost of each tree planted). Total donation is expected to plant over 2 million trees.
