

24 INCH VENTLESS HEAT PUMP DRYER

DHP24400W

Compact Washer & Dryer

Blomberg knows an upscale urban lifestyle often puts space at a premium, but that doesn't mean sacrificing style or superior performance. Our 24-inch compact washers and dryers fit in perfectly, offering flexibility and freedom in installation (including an optional stacking kit), plus all the functionality and finesse required for expert clothing care. Despite their compact size, these washers deftly handle 2.5 cu. ft. of laundry while the dryers dry 4.1 cu. ft. loads—both with a variety of cycles for different fabrics.

In Harmony with Nature

Commitment to living consciously should extend to clothing care, so Blomberg brings intelligent energy and water conservation to the laundry room. All our washers are ENERGY STAR® certified and offer automatic water adjustment for each load. The same is true for all our dryers, including Blomberg's best-in-class Heat Pump Dryer which made the **2017 ENERGY STAR Most Efficient** list for using **50% less energy** than conventional dryers. Thoughtful design and engineering is what earned Blomberg the ENERGY STAR® 2017 Partner of the Year Award.

In Harmony with Your Life

Ventless Heat Pump Dryer

Always in the vanguard, Blomberg was among the very first to bring innovative ventless heat pump technology to the market. The ultimate solution for compact spaces and dwellings where it's impractical or impossible to vent to the outside, this dryer uses a closed loop heat exchange system to dry at lower temperatures, saving money on energy bills and providing superior protection for clothes.

Stack Kit Included

Where and how you want to place your laundry equipment depends on your lifestyle preferences, as well as your home's unique style, layout, and space considerations. By furnishing this easy-to-install kit with every washer, Blomberg offers abundant flexibility and a safe way to keep aesthetic harmony between washer and dryer no matter where they fit in your life.

Anti-creasing Option

The gentle drum action of a Blomberg dryer separates and smooths out individual garments as they dry, so when the cycle finishes clothes come out wrinkle-free and ready to wear. But just in case you're not immediately available when the cycle stops, this clever option keeps the drum rotating periodically for up to two hours and keeps your clothes from creasing.

Gentle Care

Blomberg's closed loop heat exchange system means our heat pump dryers use a circulating air temperature that is consistently 40 percent lower than conventional dryers. This gentle care helps keep all fabrics—even woolens—at their best and extend garment life.

Quick Drying

Blomberg's advanced ventless heat pump dryers offer the epitome of more than just energy conservation. They save time. An 8.45 lb. load will dry in less than one hour. They also save your clothes. Faster drying and cooler temperatures reduce friction and shrinkage for clothes that look their best and last longer.

24 INCH VENTLESS HEAT PUMP DRYER

DHP24400W

Main Features

- Compact dryer
- 50% less energy saving. Most Efficient 2107
- Ventless heat pump dryer technology
- 16 drying programs
- Electronic Controls
- 4.1 cu-ft dryer capacity
- Child Lock
- Stack kit included
- Reversible door
- Direct draining
- Anti-creasing
- Quick drying
- Jeans cycle
- Gentle care
- Special drum paddles
- Easy access to lint filter
- Lifetime stainless steel drum

Dimensions
