Built to perform as beautifully as they're designed.

2012 Home Appliances Full Product Line

BOSCH

Invented for life

A German take on engineering.

Every design element is the visual manifestation of a deeply thought-out engineering principle. Our approach is to build a product that works in tandem with the way you live. Every appliance promises you quality engineering, performance and efficiency in a beautifully designed package.

Quality
Bosch builds reliable, dependable appliances that are engineered to the highest standard. All of our premium products are made from the best materials that will last with you through the years.

Sustainability
Our focus is to produce the best, utilize the least and be a brand of substance. Our concern for the greater good pushes us to engineer products that use the least possible amount of energy and water without sacrificing performance.

European design
We bring clean and modern European design to your kitchen. Our philosophy: elegant design language through simplicity and symmetry in everything we build. The flush, built-in capability of our kitchen appliances gives your home an unmatched sleek and sophisticated look.

Technology

For over 125 years we've developed technologies that are engineered to make your life easier. It's technology with you in mind, technology with purpose. We ensure that the way your kitchen runs is a testament to our forward-thinking spirit.

Performance

Our appliances are developed to perform through precision and efficiency, not raw power. With a comprehensive approach to everything we engineer, our appliances are built to offer the best of all worlds.

Silent confirmation
of an age-old question.

Dishwashers
If a dishwasher is on and no one hears it, do your dishes still get clean? The only way you'll know the truth is to try a Bosch. We are the quietest brand in the U.S., and we're not shy about it. With a record low of just 39 dBA, we're barely above a whisper. And with all of this quiet, you still get the performance you expect from a Bosch.

Quietness

Quietest brand

As the quietest dishwashers in North America,* **Bosch has a silence rating as low as 39 dBA** and there is no quieter dishwasher at any Bosch price point.** Noise is measured in decibels (dBA). A whisper is about 30 dBA, and a normal conversation is about 60 dBA. All Bosch quiet levels are certified by an independent lab.

Example:

+3 dBA

44 dBA   **47 dBA**

A three-decibel increase is the auditory equivalent of running two dishwashers at once.
Solid molded base

Solid construction and enhanced insulation **reduce vibration** and add to overall noise reduction.

Two-pump motor system

By using **two small pumps** to individually wash and drain instead of a single large one, vibration and noise are dramatically reduced.

Suspension motor

We've suspended our two-pump motor system using **rubber hammocks to help absorb** and minimize any vibration and noise.

InfoLight®

Sometimes your dishwasher will be so quiet, you won't know it's on. That's why there's InfoLight, **a small red light projected onto the floor** to indicate that your dishwasher is still in one of its cycles.
*Bosch offers the quietest dishwashers in North America, and no major brand offers a quieter model at any Bosch price point, June 2012. Price point defined by similarly priced and designed models of major brands, obtained from competitors' websites, June 2012.
**Based on noise measured as acoustic power per IEC standard.
***Based on standard-sized dishwashers of major manufacturers on energystar.gov, April 2012.

Efficiency

Most water-efficient

Bosch makes water work better by using less of it, as little as two gallons per cycle. Our dishwashers can save nearly two gallons per cycle—about half as much as the average dishwasher and 125% better than ENERGY STAR® standards— without sacrificing cleaning performance. Bosch dishwashers can save **400 gallons of water** a year.***

Most energy-efficient

The 800 Plus is the **most efficient dishwasher in the U.S.***** At 180 kilowatt hours per year, the 800 Plus far exceeds the federal standard for efficiency.

ActiveWater™

Technology that utilizes design, water pressure and efficiency to turn **two gallons of water into the cleaning power of more than 1,300**.

Flow-through water heater

Bosch dishwashers channel 100% of the water through tight coils in **a confined heating chamber**, which heats the water quickly and efficiently.

Half-load

Use this cycle when washing small, lightly soiled loads that fill half or less of the dishwasher's capacity. The Auto Cycle uses **sensor decisions** to dramatically reduce energy and water consumption.

EcoSense®

Adjusts water and heat usage automatically to reduce energy usage by up to 20% while minimizing water usage.

Industry Average	Bosch Ascenta®	Bosch 800 Plus
4.12	1.17 gallons saved	1.90 gallons saved
	2.95	2.22

ENERGY STAR AWARD 2012
SUSTAINED EXCELLENCE
Bosch water usage vs. industry average usage, in gallons per regular wash cycle (2010, AHAM shipments).

Quality

German-engineered quality

When we talk about German engineering, we're talking about our commitment to producing the world's best products. That's why Bosch is a **best value and ranked #1** by a leading consumer publication.

Good Housekeeping Seal

For more than 100 years, the Good Housekeeping Seal of Approval has been reassuring consumers that they've made the **smart choice**. Which is why we're proud that Bosch dishwashers are backed by the Good Housekeeping Seal of Approval.

Quality testing

100% of our dishwashers are tested at our New Bern, North Carolina, factory, and go through **485 individual quality control tests** before being shipped. We test dishwashers through their traditional lifespan, up to 4,000 wash cycles, the equivalent of 10 years' use.

Self-latching door

The self-latching door on our Ascenta dishwasher **holds at any position**, and if your door is open at less than 20°, the door will automatically close and latch shut.

Stainless steel tub

Bosch dishwashers' high-quality stainless steel construction retains heat better than plastic tubs, which helps **dry dishes faster** and more efficiently. They also come with a lifetime warranty against rust-through, because not all stainless steel tubs have the same quality.

Custom panel

Pairing a custom cabinet panel with your dishwasher enhances your kitchen's look by giving it a minimalist, avant-garde feel. Its sleek look **disappears into your cabinetry** for a quietly flush installation.

Performance

Variable spray pressure

Higher and lower spray pressure allows for **better load customization** and enhanced cleaning performance, based on the cycle that is selected.

Extra Tall Item sprinkler

Hand-washing large items becomes a thing of the past, thanks to this handy innovation. Simply **remove the top rack** and place your serving platters, cookie sheets, hood filters and refrigerator shelves that are up to 22" high in the bottom rack.

ActiveTab® system

Innovatively designed and integrated into the middle of the dishwasher, ActiveTab **helps dissolve detergent tablets** more efficiently and effectively.

Water softener

The 800 Plus has a water-softening system that softens the water to the optimal level and **eliminates spots** caused by lime deposits left behind by hard water.

Triple-filtration system

The triple-filtration system uses a three-step process to **remove even the finest dirt particles** from the washing cycle, for sparkling-clean dishes and glasses every time. And all three filter elements are self-cleaning for worry-free operation.

Auto Wash

By detecting the amount of water and debris that is drained from the dishwasher each cycle, Auto Wash is able to **optimize the amount of new water** for following cycles, helping to maximize water and energy efficiency while maintaining top performance.

Capacity

800 Plus third rack

Our unique V-shaped rack design helps to separate silverware, making it easier to clean, while **providing extra room** for large, odd-shaped cutlery and small dishes.

Place settings

Each Bosch dishwasher is designed to maximize space and flexibility. With some models able to hold up to **15 place settings** in one load, you get the space you need to organize your dishes and clean them more efficiently.

RackMatic® and RackMatic Plus

The RackMatic and RackMatic Plus upper-basket height adjustment allows for one-step adjustment of the racks when loaded. In two simple steps, customize loading flexibility to accommodate large platters and tall glasses.

Silverware basket

The removable silverware basket can be placed anywhere in the dishwasher, adding space for other items. Plus, the **flexible basket can be split into two pieces**, placed side-by-side or back-to-back, for the ultimate flexibility in loading.

Safety

AquaStop® and AquaStop Plus

Bosch is the only U.S. manufacturer to offer a high-tech leak-protection system in their dishwashers. AquaStop is a precisely engineered tub and sensor system that detects leaks in the solid molded base of the dishwasher, shuts down operation and automatically pumps out water so it cannot make contact with the floor. This eliminates the risk of costly water damage.

The AquaStop Plus, available on the 800 Plus Series, includes an electro valve at the water tap and a unique, double-walled hose system for the **most comprehensive safety system available**.

SaniDry™ condensation drying system

Condensation drying works by heating the dishes with **hot water from the final rinse**. The closed system does not draw outside air into the dishwasher, which makes it the most sanitary way to dry dishes.

24/7 overflow protection system

Only the Ascenta® 24/7 overflow protection system **senses leaks** even if the dishwasher is turned off. If water levels get too high, the dishwasher pumps the water out of the tub and closes the water inlet.

No exposed heating element

Our concealed flow-through water heater **prevents plastic items on the bottom rack from melting** and protects you from accidental burns during unloading.

Sanitize option

By operating at a higher temperature, the sanitize option meets **National Sanitation Foundation (NSF)** standards of cleanliness, eliminating 99.9% of bacteria, and enhances your drying results as well.

Stainless Steel Door
This high-quality stainless steel door provides an attractive and contemporary finish.

Anti-tarnish Silverware Cassette
This specially designed cassette provides the best wash results and protection for your fine silverware.

Dishwasher Accessory Kit
This all-in-one bundle includes the Extra Tall Item sprinkler, vase/bottle holder, three plastic item clips and a small-item basket.

SGZ1005UC (Optional door with polished and round handle)

SGZ1006UC (Optional door with flat and matte handle)

Cooking

Ovens | Microwaves | Warming Drawers | Cooktops | Ranges | Ventilation

Cooking that's so hot, it's cool. It's been said that baking is a science, while cooking is an art. At Bosch, we're built for both. We take the leading science and technology and couple it with a beautiful aesthetic for lasting style. From convection ovens to cooktops, every Bosch kitchen appliance is designed to perform beautifully, ensuring perfect cooking results every time. With our full line of cooking appliances, we've got you covered every step of the recipe. Explore our kitchen and see why you should make it yours.

Bosch is more than hot.

Ovens | Microwaves | Warming Drawers

It's thoughtful and productive. Bosch engineers its ovens, microwaves and
warming drawers to strict standards of performance and design.

Ovens

With the largest capacity in their class, efficient convection capabilities and the fastest preheat settings available, it's no wonder Bosch ovens are a top choice for European chefs. Discover for yourself how Bosch performance and design make a delicious addition to your kitchen.

Quality

Telescopic rack

This full-extension rack **glides easily on ball bearings** and extends over the open oven door for easy access, allowing you to baste large cuts of meat and poultry safely without reaching into the oven.

Exclusively recommended

German engineering and precise cooking results have made us the industry's only recommended wall oven by a leading consumer publication.

RECOMMENDED
by a leading
consumer publication

ClearTouch® glass touch controls

Bosch ovens offer smooth glass touch controls that are as easy to use as they are beautiful. And with **up to 14 heating modes**, the perfect program is available at your fingertips, no matter what dish you want to cook.

Good Housekeeping Seal

All Bosch ovens are backed by the Good Housekeeping Seal—**a two-year limited warranty.**

LIMITED WARRANTY to CONSUMERS
· GOOD ·

REPLACEMENT or REFUND if DEFECTIVE

Performance

#1 in capacity

At 4.7 cubic feet, our oven is **the largest in its class**. An expansive viewing window and bright halogen lighting system make monitoring the progress of your meal easier than ever.

Recessed heating element

A recessed top heating element and a fully concealed bottom heating element allow **unprecedented safety when removing dishes** and extremely easy cleaning.

Genuine European Convection with ACS

Our Advanced Circulation System (ACS) allows food to be **cooked more evenly in up to 30% less time** by optimizing heat circulation. And a powerful 2,000-watt third heating element surrounds the convection fan, circulating preheated air throughout the oven.

Fastest preheat

With the **fastest preheat on the market***, Bosch ovens are ready to cook in about seven minutes.

Meat probe

This built-in temperature gauge is perfect for keeping tabs on large roasts and poultry dishes. When your dish reaches the preset internal temperature, the oven beeps and turns itself off — giving you **optimal temperature control**.

*Based on cavity sizes of 4.3 cubic feet and larger.

Microwaves

For a seamless, stylish display, we have developed a trim kit that allows you to integrate your microwave into any cabinetry. This way, you can extend your appliances' flush, built-in look to your microwave.

Convection

Bosch convection microwaves offer you **faster and more even cooking results** than traditional microwaves.

Multiple recipes

Our microwaves offer **multiple recipe settings** to make cooking easier.

Warming Drawers

Convenient. Functional. Stylish. Bosch offers a warming drawer with four settings for prewarming dishes, heating rolls or keeping food hot for late arrivals.

Three brilliant ways to cook.
One superior way to engineer them.

Induction | Gas | Electric

We know the importance of precision in cooking, and we also recognize the importance of design. There is no kitchen more sophisticated than one brandishing a Bosch cooktop. For some, an open flame brings out their inner chef, and for others, modern meals are best interpreted through induction glass. Bosch approaches the kitchen in as personal a way as you do, because we know your meals are being prepared for the most important people in your world.

On/Off   Wipe Prot. /
          Child Lock   Timer

Induction Cooktops

Induction cooktops are a revolutionary way of cooking that use the power of electromagnetic waves to quickly and efficiently turn the bottom of a pot into an active heating surface, rather than the cooktop. Induction cooktops use 60% less energy than cooking with gas and heat food over two times faster than electric cooktops.

Safety

ChildLock
Bosch induction cooktops take safety up a notch. The ChildLock function **prevents the cooktop from being accidentally switched on**.

Anti-overflow system
Sensors in the glass can **detect large spills or excessive overflow**, automatically shut off the cooktop, and sound an alarm to alert you of the situation.

Automatic shut-off system
Safety comes first. So Bosch induction cooktops are designed to **automatically switch off** when the unit exceeds a maximum temperature limit.

Heat indicator
A light on the cooktop **warns if the surface is hot** due to any residual heat from cooking vessel.

Safe Start
This safety feature accurately **distinguishes between pots or pans and smaller items like utensils** that may accidentally be left on the cooktop, and ensures that each cooking element will only heat up if a pot is detected on the cooking surface.

Clean Lock
Clean Lock **prevents unwanted changes** to settings while you clean spillovers.

Quality

PreciseSelect™
Easily change the heat level of the cooktop by simply selecting any of the **17 different levels** with a single touch.

SteelTouch™ controls
Offers **more responsiveness** than glass controls while providing a seamless, sharp stainless steel design.

AutoChef®
Patented AutoChef technology takes the guesswork out of cooking by **maintaining the ideal temperature** for perfect cooking results every time.

CountDown™ timer
The days of working over a hot stove are long gone, thanks to this ingenious function that allows you to **preset a cooking time for each individual heating element**. Now you can multitask in the kitchen, and the cooktop will automatically shut off individual cooking elements when their programmed time has expired.

Performance

Class-leading 11" element

Conducting up to 4,400 watts of power, the 11" element on the 36" cooktop is the **most powerful in its price class**.

SpeedBoost®

For time savings as well as energy savings, the SpeedBoost function can **heat water twice as fast** as a conventional ceramic cooktop.

Efficiency

PotSense™

Bosch induction cooktops detect if a pot is placed on a cooking element and **automatically adjusts the cooking field** to the size of the pot bottom. This makes your kitchen cooler, more energy-efficient, and safer.

Gas Cooktops

To create a variety of dishes, you need a versatile cooktop. High-BTU-output burners deliver power for searing, while a separate, low-output burner provides gentle simmering. The large knobs are easy to adjust to get the perfect flame. Multiple-size burners accommodate all cooking styles. And the burners' sealed, recessed design contains spills and makes cleanup easy.

Performance

Continuous grates

These are the **same types of grates found in restaurant kitchens**, letting you slide and move pots off of an active burner or rearrange them without fear of tipping or spilling. They also give the cooktop a high-grade, quality appearance that really makes an impression.

PowerSim® burner

This feature, available on our largest burner, uses a diffuser cap to output a large flame of up to **18,000 BTU for quick heating**, and can gently simmer like a small burner.

30" five-burner gas cooktop

The industry-leading 30" five-burner provides **high performance and versatility** in a 30" space.

OptiSim® burner

This Bosch burner heats at a low BTU to delicately simmer even the most sensitive sauces or melt chocolate by **evenly spreading the flame** across the bottom of the pot to help prevent scorching.

Safety

Automatic reignition

The automatic reignition will **generate a spark and reignite** the burner if the flame should go out.

Electric Cooktops

From the simple elegance of the ceramic-glass cooking surface to the exciting performance features, Bosch electric cooktops are the very image of understated sophistication for the kitchen. Whether you choose the refined touch-control models or the familiarity of our rotary-dial units, you'll find a model that suits your design aesthetic and cooking style.

Quality

PreciseSelect™
Easily change the heat level of the cooktop by simply selecting any of the **17 different levels** with a single touch.

SteelTouch™ controls
Offers **more responsiveness** than glass controls while providing a seamless, sharp stainless steel design.

AutoChef®
Patented AutoChef technology takes the guesswork out of cooking by **maintaining the ideal temperature** for perfect cooking results every time.

CountDown™ timer
The days of working over a hot stove are long gone, thanks to this ingenious function that allows you to **preset a cooking time for each individual heating element**. Now you can multitask in the kitchen, and the cooktop will automatically shut off the individual cooking elements when their programmed time has expired.

Glass touch control
This touch-sensitive control panel uses the **most advanced technology** on the market. It has a digital readout of the chosen power setting and residual heat indicator to prevent accidental injury.

Performance

PowerStart®
This feature temporarily increases and holds the temperature at the most powerful setting. Then it gradually declines to your preset level. This **reduces cooking time** and offers the convenience of one-button operation.

Keep Warm function
When this function is selected, it enables you to reduce the cooking power to as little as 3% of normal—much greater temperature control than conventional cooktops offer you. **This brings the heat to a perfect level** to keep meals warm, or to simmer soups.

Dual-element burners
Burners provide solutions to multiple cookware sizes. They are designed to **use the cooking space more efficiently** than single elements.

Triple-element burners
The burners are available in 6"/8"/12" configurations, and are designed to efficiently accommodate a wide variety of cookware **without wasting energy unnecessarily**.

Bridge element
Connects two burners, creating an **elongated cooking surface** for larger, oval-shaped pans.

Safety

ChildLock

Bosch electric cooktops take safety up a notch. **The ChildLock function** prevents the cooktop from being accidentally switched on.

Automatic shut-off system

Safety comes first. So Bosch electric cooktops are designed to **automatically switch off** when the unit exceeds a maximum temperature limit.

Clean Lock

Clean Lock **prevents unwanted changes** to settings while you clean spillovers.

Heat indicator

A light on the cooktop **warns if surface is hot** due to any residual heat from cooking vessel.

Cooktops

***Recommended by a leading consumer publication, April 2012.

® approved.

The only thing that's not optional is the unbelievable convenience.

Dual-fuel | Gas | Electric

While our legendary quality makes a Bosch range the easy choice, deciding which type you want may not be so simple. At Bosch, we've built the perfect appliances for any kitchen and any chef. It's part of our commitment to you and your culinary vision. It's time to turn up the heat in your kitchen, and we want to make sure you have precise control of it.

OFF   OFF   Light   12:16 PM   Cooking Mode   OFF   OFF

Time   Temperature

Off   Start

Choose between the following, in both slide-in or freestanding:

Gas Ranges

Unleash your cooking instincts with a Bosch gas range. Pro-style cooking grates let you slide your pots easily among the featured griddle and five burners. A 17,000-BTU PowerBoil™ burner delivers fast boiling and precise control. In short, prepare yourself for an amazing culinary experience.

Dual-fuel Ranges

Dual-fuel ranges from Bosch offer performance and convenience. Their gas-on-glass design features burners mounted on a ceramic-glass cooktop, making cleanup easy. Powerful PowerSim® burners deliver up to 16,000 BTU for fast boiling and excellent searing, while optimized burner spacing keeps every pot optimally positioned for maximum convenience. And the Genuine European Convection with ACS oven cooks up to 25% faster.

Electric Ranges

Bosch electric ranges deliver power and functionality that help them perform as good as they look. They feature a glass-ceramic cooktop with UltraSpeed™ ribbon elements that heat up as fast as gas. Add the performance of Genuine European Convection and a concealed bake element, and it's clear that every meal you prepare with a Bosch electric range is certain to be a hit.

Convenience

Full-extension rack

With our convenient, full-extension telescopic rack, you can easily view, check and baste your dishes without having to reach into the oven. Our rack glides smoothly and easily, **extending fully** over the open oven door—even when holding up to 35 pounds. Plus it fits any of our six rack positions and is removable for easy cleanup.

Bridge element

Connects two burners, creating an elongated cooking surface for larger, oval-shaped pans.

Optimized burner spacing

We've revolutionized cooktop design with our unique burner spacing, which offers enhanced versatility. In addition to the **PowerSim® burner**, our cooktop has a true-simmer rear burner that is offset to the right—ultimately providing more space for larger pots, while leaving plenty of room for your creativity and cooking prowess.

Oval burner

Oval-shaped burner in the center of the cooktop heats food evenly across a large area. **Perfect for your griddle** or other oversized cookware.

Large warming drawer

With three electronically controlled temperature settings ranging from 140° to 220°F, our stainless steel warming drawer gives you the ideal warming temperatures. Smoothly gliding on steel ball bearings, the drawer fully extends for easy access to its **1.3 cubic feet** of usable space.

Performance

PowerBoil™ burner

The PowerBoil™ burner is the ultimate in power and finesse. It can generate a blazing **17,000 BTU for fast boiling or quick searing**. At the other extreme, the built-in diffuser distributes heat evenly to let you simmer delicate sauces or melt chocolate without scorching.

OptiSim® burner

This OptiSim burner cooks at a low BTU to delicately simmer even the most sensitive sauces or melt chocolate, evenly spreading the flame across the bottom of the pot to help prevent scorching.

Triple-element burners

The burners are available in 5"/7"/9" and 6"/9"/12" configurations, and are designed to efficiently accommodate a wide variety of cookware without wasting energy unnecessarily.

Good Housekeeping Seal

All Bosch slide-in ranges are backed by the **Good Housekeeping Seal**—a two-year limited warranty.

Concealed bake element

The oven cavity floor hides an eight-pass bake element, offering **maximized heat distribution** for more even cooking. Since the element is not exposed, you get more usable space for that extra sheet of chocolate-chip cookies. Flexibility doesn't stop here, since the hidden bake element also makes for the easiest way to clean the inside of your oven.

Warming zone

100-watt warming zone—**perfect for keeping food ready to serve** or prewarming dishes.

Genuine European Convection with ACS

This feature offers a powerful 1,100-watt third heating element that surrounds the convection fan, **circulating preheated air throughout the oven**. By optimizing heat circulation within the oven cavity, our Advanced Circulation System (ACS) allows food to be cooked more evenly in up to 30% less time.
Convection oven

360° cooking saves time and energy. A fan provides even heat distribution throughout the cavity for superior cooking results.

Full-meal cooking

Thanks to our large capacity and Genuine European Convection, **you can cook a feast in your oven**. Furthermore, the convection technology prevents fusion of flavors. So your cherry pie won't taste like garlic potatoes, and your pork roast will taste like...pork roast. You're only limited by your imagination.

Meat probe

Our built-in automatic meat temperature probe will allow you to cook more accurately and enjoy perfect meals all the time. When foods reach the preset internal temperature, the oven beeps and turns itself off—giving you **optimal temperature control**. And by not overcooking, your food also maintains its nutritional value. Food tastes better, and you eat healthier.

Quality

ClearTouch® glass panel

This touch panel features **high-quality materials and elegant design**, while giving complete access to all of the range's many features. Easy to use and even easier to clean, the control indicators will never fade because they are sealed under the glass surface, guaranteeing a beautiful appearance for years to come.

Widest oven in its class

At 25 inches, our oven is the **widest in its class**. Incredibly accommodating, not only can you cook with a variety of cookware sizes simultaneously, it lets you cook an entire meal—including a large bird with all the trimmings. And with our well-lit oven, checking on your meal is a pleasurable eye-opener.

Gas-on-glass burners

This ingenious design mounts **gas burners on color-matched ceramic glass**, creating a sleek, handsome cooktop that's patterned to conceal smudges while being significantly easier to clean.

Cooktop elements

The electric cooktop features our **state-of-the-art UltraSpeed™ ribbon elements**. Instantly responding to the controls, these elements boast a three- to five-second heat-up time. There are multiple-sized elements, including a triple, all of which are adjustable to accommodate a variety of cookware styles.

Touch and Turn®

Operating your oven with our exclusive Touch and Turn control system is a breeze. Performance is now at your fingertips. You can access an **array of cooking modes in fewer steps**, and even self-clean your oven with a single intuitive control knob. No more guesswork. Just great results every time.

Endless cooking possibilities

With up to nine preset cooking modes, the options are as vast as they are easy to operate. Our precisely programmed oven functions let you choose from **bake, broil, convection bake, convection broil, convection roast, dehydrate or keep warm** to complement your diverse cooking needs. All models even include a Sabbath mode.

Every meal now comes with a breath of fresh air.

Wall | Island | Custom Insert | Downdraft

We vent, so you don't have to. When you cook, you want things to be perfect. You don't want to be bothered by the hum of a loud vent. That's why we design our ventilation systems to work as quietly as possible. So you can talk while putting together your next masterpiece. Whisper-quiet and very effective, they give your kitchen extra style and a lot more room to breathe.

Island Ventilation

Flaunting crisp lines and glass accents, our island hood offers sophisticated design that blends into any kitchen.

Wall Ventilation

Whether you prefer under-cabinet or chimney-style ventilation, we offer a complete line of stylish wall hoods with varying CFM levels so you can choose the one that is right for you.

Custom Insert Ventilation

Our flush-fitting custom insert hoods are designed with minimalist styling that make them barely visible. And their powerfully quiet fans make them barely audible.

Downdraft Ventilation

The perfect solution for very high ceilings, island installation or simply a lack of space, our downdraft rises from behind your cooktop. A rise of over 13" allows for efficient capture of steam and smoke. Our recirculation kit option allows venting through the toe-kick of the cabinet.

Quality

Your meal should be memorable, not its odor. With Bosch's line of quiet, efficient, **high-quality ventilation products**, you can quickly remove steam, odors, grease and smoke, improving your home's overall air quality.

Performance

Steam, smoke, grease odors—nothing resists our efficient ventilation systems. With **four-speed fans, dual blowers and a wide CFM range**, you can adjust the fan to the desired amount of exhaust power.

Quietness

The sound you don't hear might just be cleaning your air. All of our ventilation products are designed to be **extraordinarily quiet**.

Fall in love with the tall, silent, efficient type.

Built-in Refrigeration | Standard-depth French Door | Counter-depth Side-by-Side

You might say we're redefining cool. Just like the perfect meal that uses only the best ingredients, every Bosch refrigerator is built using only the finest materials. With seamless design and numerous counter-depth options, our line is filled with stunning features that convey a stylish, built-in look for your kitchen. It's just one more reason why our refrigerators are a perfect part of the ultimate kitchen.

Built-in Refrigerators

Built-in refrigerators meet German engineering. Completely flush with your cabinetry and roomy enough for almost any-sized family, the 36" French door and new 30" bottom freezer redefine Continental cool. While you'll first notice how well Bosch preserves your dairy and produce, what you might not notice is its hidden hinges that seamlessly enhance the built-in look.
Design

Flexible exterior options

With a **fully flush installation**, the refrigerator lines up exactly with your cabinets, providing a sleek appearance. The **framed installation option** makes for a classic built-in, semi-flush design that works with 24"-depth cabinetry.

Framed

Flush

Extra-tall doors

Our doors extend all the way up to the top of the unit, so all you see is stainless steel with a fully integrated French door that has **no visible hinges or exhaust grille**.

OptiFlex® hinge

Designed to open out and away from the cabinetry, this ingenious hinge construction allows doors to be **mounted flush, yet open to 115˚**, without touching or nicking surrounding cabinets.

All-level LED sidewall lighting

The days of reaching into a dark refrigerator are over. Brilliantly designed LED lights are placed up front, so you'll never again block the bulb in the back of the refrigerator with that club-store-sized block of cheese.

Food preservation

Dual evaporator and dual compressor

Separate compressors and evaporators for the refrigerator and freezer sections prevent the transfer of odors and provide improved humidity levels for **better food preservation**.

Air filtration

Bosch refrigerators constantly filter the air of bacteria that cause your food to go bad more quickly than it should. With Bosch, efficiency doesn't stop at the power source.

SuperCool™ and SuperFreeze™

These features quickly balance temperatures between the chilled and frozen items already in your refrigerator and the new items that you introduce. This helps keep food fresh and flavor in—so when you're ready to prepare a meal, you'll be preparing the best meal possible.

Efficiency

Most energy-efficient

The 30" Bosch built-in bottom freezer is the most energy-efficient in its class.* It is certified CEE Tier 2—an important recognition for brands dedicated to efficiency and high-value offerings.

ENERGY STAR® qualified

Every Bosch refrigerator is ENERGY STAR® qualified. With efficient features such as an alarm indicating that the door is ajar, Vacation Mode and Economy Mode, Bosch can significantly **reduce your energy bills**.

*Based on comparison of built-in bottom freezers with a 30" width (or larger) listed on energystar.gov, December, 2012.

Standard-depth French Door Refrigerator

Preserving freshness is the most important function for refrigeration. With Bosch, VitaFresh® technology automatically keeps food fresher, longer. By keeping fruits and vegetables at the perfect humidity and temperature, we help preserve food budgets almost as well as food.

Style

Hidden hinges

The hidden door hinges present **uninterrupted stainless steel luxury** while providing sturdy support and smooth, easy opening.

All-level LED lighting

With **fully integrated LED lighting**: lighting from above for the overall interior of the refrigerator, in the VitaFresh® drawers, in the deli drawer, and in the bottom freezer.

Gallon door bins

Milk and other oversized items are placed in the large adjustable gallon door bins, **freeing up space** on the shelves for additional storage.

Ice and water dispenser

Frameless ice and water dispenser provides pure, cold, filtered water plus crushed and cubed ice.

SteelTouch™ controls

The controls—incredibly responsive with **sharp stainless steel minimalist design**—make temperature adjustments and other features accessible with the touch of a button.

Efficiency

ENERGY STAR® qualified

With the efficient features you expect from Bosch, this refrigerator is ENERGY STAR® qualified—which **keeps energy costs low** while providing superior performance.

EcoControl

Saves energy with **easily accessible exterior controls**. Independently change the refrigerator and freezer without ever opening the refrigerator or bottom freezer drawers.

Food preservation

VitaFresh®

At Bosch we know about maintaining the right balance of temperature and humidity for your food. Unlike other refrigerators that just keep things cold, smart VitaFresh technology maintains the optimal temperature and humidity levels automatically, allowing food to stay fresher longer. VitaFresh drawers provide optimal food storage, keeping up to **14% more vitamin C** in your food and **retaining 20% more moisture content** than conventional refrigerators.*

Directional airflow system

An ingenious airflow system utilizing a special ventilation channel allows air to pass over and around the produce drawers. This keeps **temperatures at a consistent, ideal level** for the contents within. And keeps your food well chilled and even better preserved.

Automatic humidity control

A unique lining maintains the ideal humidity for all types of produce by **regulating how much or how little moisture is required** for the produce stored in the drawers, keeping foods crisp, healthy and delicious.

Refrigeration

*VitaFresh® results are based on an independent study performed against Bosch conventional refrigerators.

Counter-depth Side-by-side Refrigerators

The Bosch counter-depth refrigerator is perhaps the most attractive combination of convenient technology, superior food preservation and intelligent design ever made. With its polished design, easy installation and a variety of convenient features, this is more than just a beautiful face.

Efficiency

ENERGY STAR® qualified

Every Bosch refrigerator is ENERGY STAR® qualified. With efficient features such as an alarm indicating that the door is ajar, Vacation Mode and Economy Mode, Bosch can **significantly reduce your energy bills**.

CoolGlow™ LED interior lighting

The interior of the Linea 800 Series shines with exceptionally bright LED lighting for easier viewing.

CoolPaks™

CoolPaks are made to keep food and beverages cold while in a cooler. The two reusable CoolPaks will keep a 10-quart cooler chilled, and they can even **keep your refrigerator cool during power outages**. An added bonus: CoolPaks conveniently store in their own compartment in the freezer door.

Convenience

EasyLift™ shelves and door bin

Is the cake platter too tall? Simply **lower or raise shelves without unloading and removing them**.

Water and ice dispenser

This advanced filling station dispenses water, crushed ice and ice cubes. Use the QuickIce function when entertaining large groups. A water filter ensures the **freshest tasting water** and an exceptionally bright LED light makes filling a small glass or an oversized pitcher easier than ever.

Food preservation

Dual evaporator

No one wants their ice cream to taste like fish. Thanks to innovative Bosch technology, which has a **separate evaporator for the refrigerator and freezer** compartments, this isn't a problem. Dual evaporators not only prevent the transfer of flavors, they also optimize humidity for improved freshness.

AirFresh Filter®

This activated carbon air filter helps food retain its flavor and keeps ice tasting fresh. To save space, the filter is **built into the vents that circulate air through the refrigerator** several times per hour, helping clean the air of any unwanted odors.

FreshProtect™ Box

Cool, tailor-made solutions for fish, meat, produce or dairy products. The precise temperature settings—31°F, 34°F or 37°F—**help food stored in the FreshProtect Box stay fresh longer**. The drawer extends smoothly on telescopic rails and has a net capacity of five gallons. Independent of the remaining refrigerator section, the temperature is set via the control panel on the door exterior.

Quality

Bosch has evolved into the leading manufacturer of washers worldwide. Our success is built on our commitment toward producing washers with the highest standards in mind. And with 100% of our washers and dryers tested at our facilities, it's no wonder that Bosch has won numerous accolades for their superior quality and value.

One-piece stainless steel drum
The high-quality one-piece drum in Bosch washers and dryers **protects your fabrics and extends the life of your clothes**.

Touch Controls
Bosch's European-size laundry units are extremely easy to use, thanks to their convenient Touch Controls. These controls are **incredibly responsive and easily activate** with just the touch of a button.
ENERGY STAR® qualified
Bosch clothes washers are ultra-efficient. In fact, they **exceed ENERGY STAR® requirements by up to 68%**.

Good Housekeeping Seal
Bosch washers and dryers are backed by the Good Housekeeping Seal, which provides an independent **two-year limited warranty**.

Convenience

Combining simple installation with a compact form, Bosch gives you the flexibility to place your washer in an area that's most convenient to you.

Condensation drying
Offering the latest technology on the market, condensation drying condenses the moisture in the hot air and releases it through the water drain. This way, **no ducting and no blower are necessary** to help expel hot air. This makes installation easy, fast and cost-effective.

Capacity
Even with our small footprint, our washer holds more than most. With up to a 17.6-pounds-per-load capacity, it easily **fits up to 14 pairs of jeans in one load**. Plus, an expansive viewing window and lightweight door make loading and unloading a snap.

Easy installation
You can stack or install your laundry appliances side by side, on a pedestal, in the closet or under the counter. Bosch washers and dryers offer **endless installation possibilities**, as you only need one electrical line to run both appliances.

Extra-fine Lint Filter
The wearing and washing of textiles causes lint, which becomes detached during drying. The unique double-walled extra-fine lint filters **reduce the amount of lint buildup** inside the machine and ensure greater wear comfort. It is also very easy to clean and maintain.

WrinkleBlock®
Featuring advanced WrinkleBlock technology, our dryers ensure that your clothes **stay wrinkle-free in the dryer** for up to two hours.

Performance

Leveraging our technological expertise, Bosch has created a washer line that **performs at elite standards**. And by utilizing features like customizable wash cycles, we're keeping our commitment toward efficiency and the environment.

Automatic wash system

This cycle **automatically determines the weight of clothing and suds**. The automatic wash system then adjusts the water level, temperature and spin speeds to manage your cleaning tasks, and ensures that **no extra water or energy is wasted**.

Intelligent drying system

An intelligent network of sensors ensures perfect drying results by **maintaining the exact drying temperature**, monitoring moisture left in your clothes and preventing wrinkles before they start.

Raindrop-structured drum

Bosch washers feature an **innovative raindrop drum pattern** that delivers a tailored solution for all fabric types, for powerful cleaning that protects your clothes. Depending on the cycle, the **washer adjusts the direction of the drum rotation**, using the steeper edges for heavy duty or shallow edges for delicate fabrics that require gentler care.
Gentle drying
The design of the drum surface **creates an air cushion** between the textile and the drum, ensuring gentle results.

Quiet operation
The 3D sensors in Bosch washers monitor the load weight and movement of the drum in three dimensions to **eliminate extreme imbalances**. Additionally, the circular pattern of the AntiVibration™ sidewalls reinforces its strength, making the drum much more stable. The result is up to 30% less vibration.

Wool Cycle
Special program with low spin speed, short program time and reduced temperature to **safely clean your washable wool**. Reduce your trips to the dry cleaner—clothes come out beautifully and you can save time and money.

Sanitary Cycle
Using a thermostat-controlled, **intelligent sensor for improved precision**, this innovative cycle heats up to 161°F and maintains this temperature for three minutes. After killing 99% of most common household bacteria, the water temperature is reduced to prevent fabric breakdown.

Tailored washing programs
With up to **15 different tailored washer programs** and up to **11 different tailored dryer programs**, Bosch offers the flexibility and fabric care that specifically meet your everyday needs.

Coffee Machines | Kitchen Machines

Take it from our engineers: there's inspiration in that first cup of coffee.

And we've got the machines to get your day started, and to get you through the rest of it. Beautifully designed, our small appliances make a big impact on the look and feel of your kitchen, and offer the quality performance and engineering you expect from Bosch.

Tassimo® Single-serve Coffee Machines

Smart bar code scanner
Each T DISC® has a unique bar code that the Tassimo machine reads. It then adjusts the brew temperature and amount of water to make the **perfect cup every time**.

Large variety of high-quality beverages
Tassimo is the only home brewing system that gives everyone exactly what they want. Creating the **perfect caffe crema, espresso, coffee, latte, cappuccino, tea, and hot chocolate** has never been easier.

Customized beverage strength
You can **interrupt or extend the cycle** of your coffee, cappuccino, latte, macchiato, hot chocolate or tea to your taste.

Flow-through water heater
Near-instant brewing the moment the machine is powered on means no preheat time. And when you're ready to enjoy another cup, there's virtually no wait time between beverages.

Benvenuto® Built-in Coffee Machine

AromaSwirl®
This special system **completely engulfs the coffee grounds** in hot water and then brews them in a pressurized chamber. The result is coffee made under perfect conditions.

Your brew, your way
By using the coffee selection knob, you can choose the **exact size and strength** of beverage. Brewed for you, by you.

Choose your perfect grind
The Benvenuto works **equally well with whole beans or pre-ground coffee**. You have complete control over the amount of coffee used for each cup, as well as the coarseness of the grind.

One-touch operation
The Bosch Benvenuto is **so simple, anyone can use it**. You can start the entire brewing process with just the push of a button.

Universal Kitchen Machine

Powerful motor function
800 watts of motor power and a 6.5-quart mixing bowl can handle up to **15 pounds of dough**.

Mixing protection
Safety is important. The mixer is designed so it **works only when the top is closed**. Strong suction feet on the base add stability.

Dishwasher-friendly
All parts and accessories are **safe for the dishwasher**, and the removable axle makes it a lot easier to clean.

Optional blender
To **add more versatility**, such as making frozen drinks, smoothies, milkshakes or sauces and dips, the blender is the perfect accompaniment.

Easy-on and -off accessories
From food processors perfect for chopping and mixing, to meat grinders that allow you to grind and mince fresh meats, to noodle attachments that **allow you to create** pasta in a variety of shapes, our accessories can prepare food in almost every conceivable manner.

Refrigeration Dimensions and Installation

Built-in Refrigerators

B36BT830NS

** Door handle must be added to this dimension.

B30BB830SS

** Door handle must be added to this dimension.
A: Area for installation of power connection.
B: Area for running the water line. It is recommended that the waterbox is placed adjacent to the installation cavity, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed waterbox adjacent to the water supply socket elevated at the heights as referenced in areas A and B.
C: Niche depth depends on kitchen design.
