**2021**

**elica**  
aria nuova

\*The product images shown are for illustration purposes only and may not be an exact representation of the product.

AIR IS PRECIOUS.  
THIS EVERYDAY AWARENESS, HAS DRIVEN ELICA'S DESIGN  
SENSE, SUPPORTED BY THE MOST ADVANCED TECHNOLOGY  
IN THE FIELD. ALL ELICA SERIES ARE ABLE TO MEET THE  
NEEDS RELATED TO THE DIFFERENT WAYS OF LIVING AND  
COOKING ALL AROUND THE WORLD.

# WHY ELICA

The history of our brand began back in 1970 in Fabriano, Italy, where **our passion for design and quality** was born. An unmistakable style along with the meticulous studies of the air and its qualities, are our distinctive traits.

From the very beginning we have been inspired by the principles of Italian Design, combining the most innovative technologies in the creation of our range-hoods.

Over the years we have revolutionised the image of the hoods and the Elica brand can be found in homes all over the world. Our evolution has taken us into the world of cooking providing unprecedented, industry first solutions before anyone else that **never cease to amaze**. Our long history of cutting edge design and technology has led to numerous patents, which have helped drive the future of appliances. At our global design center and the Elica Propulsion Laboratory, experts study air, moisture and heat, where they are researching and developing the products of tomorrow. Elica is now represented on five continents with manufacturing plants and commercial offices.

We are the market leader, we produce 20.7 million pieces ranging from hoods to motors every year. We are now represented in our plants worldwide in Italy, Poland, Mexico, India, China and Russia, and our brand being present in all five continents.

**These are some of the Awards where our products have been recognized:**

## AIR COOKING

**NIKOLATESLA** is the first Elica exclusive Aspiration Cooktop, which combines functionality of two technologies: Induction + Ventilation System into one single appliance. No other cooking technology is faster than the induction elements, Nikola Tesla series makes a reality to boil 1L of water in less than 60 seconds. Elica's Air Cooking line offers all the benefits of the induction wonders: safety, cleanliness, energy saving, PLUS the aspiration system of a powerful hood. Save time and space, uncover this elegant hi tech design.

# ELICA'S EXCLUSIVE PLUS FEATURES

## COOKTOP

Switch off all the cooking zones at once.

Exclusive sound deadening technology that effectively reduces sound levels.

## COOKTOP

Auto aspiration system automatically adjusts to the number and power of cooking zones used.

Offers installation flexibility that will accommodate most construction requirements, plus provided options related to ventilation power and sound generation.

## COOKTOP

Homogeneous cooking: cooktop surface adapts to the type of pot being used.

An exclusive sound deadening technology that utilizes a patented filter design, which substantially eliminates air turbulence and ultimately reduce sound levels.

## COOKTOP

Turns off cooktop when zone is not being used and turns on when pot is placed.

ADA compliant Remote Control provides added convenience to the user, as well as full function access for those with limited mobility.

## COOKTOP

The cooktop can be used with three programs (42, 72 or 92 degrees) to always ensure a perfect cooking.

Multi function electronic touch control behind sleek black glass and illuminate soft blue when activated.

## COOKTOP

Once the Airmatic function is activated, the product's intelligent sensor system detects the quantity - but above all the quality - of the fumes produced by the type of cooking and sets the most suitable aspiration power.

The technology draws air through a narrowed channel around a face plate, which increases suction, without increasing blower speed or energy consumption.

CFM Reduction System: enables user to reduce directly the maximum blower CFM, to meet local code requirements.

Achieve filtering thresholds of 82% against market average of 60%.

Very high performances for models with aspiration capacity between 600 and 1200 CFM's. The ideal complement of PRO ranges.

Professional grade Stainless Steel Baffle Filters designed for high airflow cooking, trap volumes of grease which is collected in trays for easy removal and cleaning.

High fume capturing capacity with an average aspiration range of 600 CFM's with low noise levels (1.2-1.7 sones at working speed).

A baffle shaped stainless steel filter with mesh backing allows air to pass but blocks grease, which drops into the high capacity baffle cavities.

# ELICA'S EXCLUSIVE PLUS FEATURES

LONG LIFE FILTER

Air filter that can be regenerated and keeps characteristics for up to 3 years, avoiding unnecessary replacements and waste. It has level of efficiency of around 60%.

EASY INSTALLATION

Installation of the hood is easier, through an adjustment of the appliance alignment between the cabinets.

3X LAYER MESH FILTER

Aluminum mesh filters are step above competition, featuring triple layered, anodized aluminum that is woven into a highly dense mesh.

UNIQUE MATERIALS

Products designed with special materials and finishes with great aesthetic impact but also with practical and durable characteristics, perfect for the kitchen.

AMBIENT LIGHT

Ambient light not only lights the cooktop, but the entire kitchen space and so the hood is transformed: from a kitchen appliance to a true lighting element.

SEAMLESS LOOK

Heavy gauge stainless steel "seamless" construction that delivers superior quality and Italian craftsmanship.

TUNE WHITE

Choose preferred shade of white to create the right atmosphere. The Kelvin degrees regulation starts from a very warm tone up to a cold color.

CLEAN FILTER ALARM

When activated, your hood will emit a "beep" signal to let you know when is time to clean your filters. For some models, an intermittent light will remain active until cleaning filter action is completed. See instructions manual to activate feature.

LED REPLACEABLE

Enables typical homeowners to replace LED lamps in seconds.

REPLACE FILTER ALARM

When activated, your hood will emit a "beep" signal let you know when is time to replace the carbon filters. See instructions manual to activate feature.

LED LIGHT

Expected lifetime of over 20,000 hours, represents the most remarkable advantage of LED light bulbs.

WIRELESS CONNECTIVITY

Wireless connection ensures constant communication between the induction cooktop and the hood.

HEAT GUARD

Safety feature: when sensing extreme temperatures, will automatically adjust the blower speed to HIGH and then adjust back once temperature drop to a safe level.
