

**OM**  
WALL-MOUNT

COLLECTION SERIES

Om features an almost vertical glass surface, completely flat and smooth. A square containing a circle: virtually an abstract painting, only hinting at its real function. Glass is the predominant material, with nearly invisible controls located beneath the glass that require only the lightest touch to illuminate and operate the various aspects of the hood. Halogen Lighting is contained in a slim profile of reflective stainless steel placed at the top of the large square. This mirror-like quality helps transform Om into a real light source, creating a fascinating atmosphere in the kitchen.

Om's 450 CFM blower is complimented with Perimeter Ventilation technology which draws air through a narrowed channel around the circular face plate. The engineered airflow significantly increases suction, without increasing blower speed or energy consumption.

**Perimeter Aspiration:** First developed by Elica, this technology literally turned the market 45 degrees and opened the door to hoods that could be mounted on the wall like picture frames. The technology draws air through a narrowed channel around a face plate, which increases suction, without increasing blower speed or energy consumption.
