PLUS FEATURES

 **WIRELESS CONNECTIVITY** - Wireless technology allows the transmission of real time information about cooking (active zones, pots, temperature), to your hood. Elica hoods with STREAM technology will process data and function totally automatically.

 **TOUCH CONTROL** - Enjoy effortless cooking, and fully control each cooking zone with the tip of a single finger.

 **PERIMETER ASPIRATION** - This technology draws air through a narrowed channel around a face plate, which increases suction, without increasing blower speed or energy consumption.

 **LONG LIFE FILTER** - One of a kind odour filter, capable of regenerating itself and of lasting up to 3 years. To maintain these characteristics, the filter only requires simple maintenance: wash every 2 or 3 months with hot water and mild soap (also in dishwasher at 65 degrees) and dry in the oven for ten minutes at 100 degrees

 **TOP PERFORMANCE** - Excellent performance for models equipped with this plus. High fume capturing capacity with an average aspiration range of 600 CFM's and a noise level be tween 60-65 db(A)at maximum speed (reference point varies based on the hood category).

 **AMBIENT LIGHT** - Transforms a kitchen appliance into a true lighting element.
