# JSP46SN GE® 30" Slide-In CleanDesign Electric Range

### Dimensions and Installation Information (in inches)

KW Rating	
240V	12.4
208V	9.3

**Note:** Cabinets installed adjacent to slide-in ranges must have an adhesion spec of at least 194° temperature rating.

**Note:** To reduce the possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation.

Receptacle Locations: For all 30" Slide-In Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

#### Optional Kits For Slide-In **Electric Ranges**

(Available At Additional Cost)
