# MAKE EVERYDAY BETTER

GE<sup>®</sup> appliances answer real-life needs. Define trends. Simplify routines. And upgrade the look and feel of the living space. Through ingenuity and innovation, next generation features are solving real-life needs. With a forward-thinking tradition that spans over 100 years, today's GE appliances sync perfectly with the modern lifestyle.

# GE CAFÉ<sup>™</sup> SERIES

GE Café gives both aspiring and seasoned cooks reasons to rejoice. Every appliance is made to be the perfect chef's complement. Equipped with details purposefully designed to help meals become masterpieces. With inspired aesthetics and impressive power that mimics great restaurants, GE Café is dream come true for people who love to live in the kitchen.

# GE PROFILE<sup>™</sup> SERIES

Striking. Distinguished. Bold. GE Profile represents the cutting-edge of modern design. Each offering is crafted to make a sophisticated statement. Attract the eye. Perfectly complement modern finishes, materials and colors. By blending artistic details with brilliant features, GE Profile is helping infuse style and ease into daily life.

# LET YOUR KITCHEN HELP YOU SAVE BY REDUCING ENERGY COSTS UP TO 20%\*

The ecomagination kitchen suite of appliances is the first to include cooking products that improve overall home efficiency.

\* As compared to standard products without these energy efficient features. \*\* Based on average usage, savings will be approximately \$3/year.

\*\*\* As compared to non-qualified dishwashers.

† As compared to non-gualified refrigerators.

the Based on DOE test procedure and comparison of a 50-gallon standard electric tank water heater using 4879 kWh per year vs. the GeoSpring hybrid water heater using 1830 kWH per year.

# Here's how the ecomagination kitchen suite of appliances helps you save:

**Double Oven Electric Ranges** save time and up to 25% energy use by preparing meals in the upper oven, which pre-heats faster and more efficiently than the lower oven.

**Refrigerators** Starting in 2012, more than 85% of GE refrigerators will use cyclopentane insulation. This high-performance foam material will replace the widely-used hydrofluorocarbon fillers that have been linked to global warming.

**Over the Range Microwaves** reduce annual microwave energy use by over 20%\*\* by activating the Power Saver feature between uses.

**ENERGY STAR® qualified dishwashers** save an average of 17%\*\*\* in overall energy and water use.

**ENERGY STAR qualified refrigerators** save an average of 20%<sup>†</sup> in overall energy use.

**GeoSpring™ hybrid water heaters** deliver \$325 in annual savings<sup>††</sup>

#### ENERGY STAR AWARD 2012 SUSTAINED EXCELLENCE

GE appliances help you conserve energy and save money. We're honored to be named 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011 and 2012 ENERGY STAR® Partner of the Year for our commitment to creating energy-efficient, high-performance household appliances and lighting products. Our continued leadership in helping change our environment for the better has also earned us a 2012 ENERGY STAR Sustained Excellence Award.

Compliant with the American Disabilities Act

Appliances that are assembled in America are designated by this icon.

Appliances that are part of the ecomagination kitchen suite are designated by this wordmark.

# ecomagination

New in 2011, GE Appliances is the FIRST appliance manufacturer to partner with the U.S. Environmental Protection Agency in their Responsible Appliance Disposal (RAD) Program. As a RAD partner, GE is taking a leadership position to develop a market based solution to reduce emissions of greenhouse gases and landfill waste, protecting our air and water.

GE has a policy of continuous improvement of its products and reserves the right to change materials and specifications without notice.

# **FRENCH-DOOR BOTTOM FREEZERS**

A refrigerator with the most advanced water and ice means raising a glass to your healthy family.

# **Explore French-door refrigerators**

Seamless stainless steel dispenser with pullout tray Gives you a streamlined look while easily filling tall items.

Hands-free Autofill Lets you walk away while the dispenser automatically fills any container with filtered water.

Showcase LED lighting Positioned throughout the interior and under fresh food doors to spotlight foods inside the refrigerator and in the freezer.

Space-saving icemaker Located on the door with integrated bins to create more usable storage space.

TwinChill<sup>™</sup> evaporators Separate climates in the fresh food and freezer sections help maintain temperature and humidity levels to keep foods fresh.

TurboCool<sup>™</sup> and TurboFreeze<sup>™</sup> settings An extra boost of cold air restores interior to set temperature for optimum food freshness.

Advanced filtration system GE's exclusive filtration system removes harmful pharmaceuticals from water and ice.

Full-width electronic temperaturecontrolled drawer 5 accurate settings deliver the optimal temperatures for keeping foods fresh.

QuickSpace<sup>™</sup> shelf Functions as a normal full-sized shelf when needed and easily slides down for instant storage flexibility.

Provide a touch of style and a variety of shelf configurations for simple food storage.

In-the-door filter Located in the door for more available space in the fresh food section and easy replacement.

Drop-down tray Allows for extra door storage when you need it and tucks away when you don't.

Adjustable glass shelves with chrome accents

# **BUILT-IN COOKING**

Double ovens with the right combination of performance and power means great results the whole family will enjoy.

## Explore built-in double wall ovens

Glass touch controls

Smooth controls are easy to use and add a sophisticated style to the kitchen.

### **Convection Roast**

Optimal for larger cuts of meat, this setting rotates the heat around all sides, sealing in the juices, producing rotisserie results.

**PreciseAir<sup>™</sup> convection system** A reversing fan circulates heat and air for evenly browned and baked foods.

### Heavy-duty roller racks

Racks provide easy access to items inside the oven by simplifying loading and unloading.

**Convection Bake** This setting is excellent for baking casseroles or lasagnas, yeast breads, pies and pizzas with no need to turn the pan.

## **Black gloss oven interior**

Oven interior is black to provide a clean look and add a bold touch to the kitchen.

**Double oven 8.8 cu. ft. total capacity** More room for cooking more dishes at once.

## Auto Recipe<sup>™</sup> conversion

Automatically converts standard recipe temperatures to proper convection settings, eliminating the guesswork.

## Self-clean oven with hidden bake oven interior

Conveniently cleans the oven cavity without the need for scrubbing and the hidden bake element makes cleanup even easier.

**Oven meat probe** Meat probe connects to oven, displays the internal temperature of the meat and signals when it's done.

### 3600-watt broil element

TrueTemp<sup>™</sup> oven system

precise oven control.

Provides even heat distribution and

The 3600-watt broil element is 50% more powerful than before\* to help prepare great meals in less time. \*Compared to PT916SMSS

### 19 power levels

Choose from 19 different power levels to select the temperature that is perfect for your meal.

### Pan detect

Only heats the area of the element that comes in contact with the pan.

Power Boost Offers powerful cooking capabilities on all elements to boost power by 20% to 30%.

Control lock capability Provides the ability to lock the

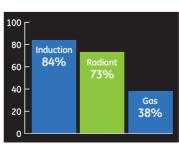

cooktop's controls, helping protect from unintended activation.

11" induction element

The 3700-watt induction element is our most powerful element available.

Scan this code with your QR reader to learn how induction makes cooking fast and efficient.

Induction cooking delivers 84%<sup>†</sup> of the total energy produced directly to food, while just 16% is released as heat into the kitchen. As a result, induction technology is more than two times as efficient as gas.

Induction technology

†Testing done using water. Total energy delivered to water, divided by total energy delivered to the cooktop, using 6 qts. water.

<u>/arming drawers/</u>

## Built-in induction cooktops

# DROP-IN RANGES

#### **Convection Bake**

This setting is excellent for baking casseroles or lasagnas, yeast breads, pies and pizzas with no need to turn the pan.

#### Convection Roast

Optimal for larger cuts of meat, this setting rotates the heat around all sides, sealing in the juices, producing rotisserie results.

**PreciseAir<sup>™</sup> convection system** A reversing fan circulates heat and air for evenly browned and baked foods.

TrueTemp<sup>™</sup> oven system Provides even heat distribution and precise oven control.

**6"/9"/12" tri-ring element** Three heating elements in one allow you to choose either a 6", 9" or 12" element for your cookware.

# Self-clean oven with hidden bake oven interior

Conveniently cleans the oven cavity without the need for scrubbing, and the hidden bake element makes cleanup even easier.

# PD968

# GE Profile<sup>™</sup> 30" convection range

- PreciseAir convection system—accurate heat circulation ensures evenly baked foods
- Convection Bake (single- and multi-rack)—optimal setting for baked goods and casseroles
- Convection Roast-even roasting with rotisserie results
- Self-clean oven-cleans the oven cavity without the need for scrubbing • Self-clean heavy-duty oven racks-double-coated racks can stay
- in oven during the self-clean cycle • 6"/9"/12" tri-ring element-three heating elements offer flexibility
- Bridge element-combines cooking elements into one cookina area
- Optional backguard kit (JXS37) and other kits available at additional cost<sup>†</sup>

PD968SPSS PD968DPBB

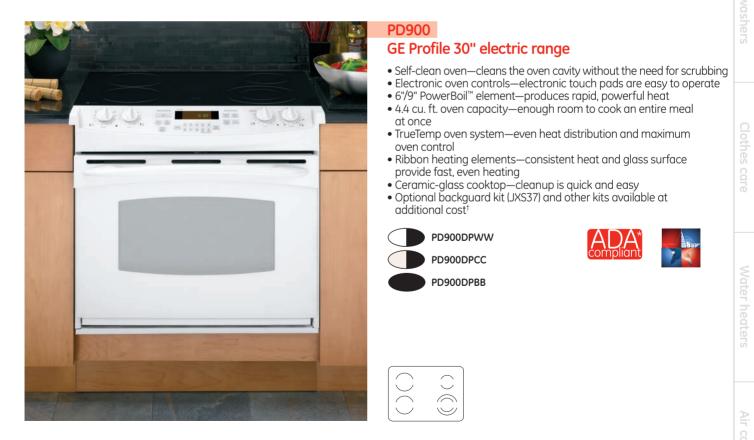

Backguard kitattaches to the back of range when unit is installed in 30" free-standing cutout. Kit JXS37.

# FREE-STANDING GAS RANGES

A range with multiple cooking features means it's perfect for a simple meal or a dinner party.

## Circulates the air to keep the heat consistent, enhancing the baking or roasting results.

Gas convection oven

Explore free-standing gas ranges

6.7 cu. ft. total capacity 2.4 cu. ft. upper oven capacity Provides additional baking space. 4.3 cu. ft. lower oven capacity

Gives consumers the room they need to cook large meals.

Deep-recessed cooktop Helps contain spills in one area for easy cleaning.

Center oval burner Adds a fifth burner to the center of the cooktop to accommodate large cookware and deliver ideal results.

Reversible cast-iron griddle/grill Provides the flexibility to sear meats on the grill and cook delicate meals on the griddle.

Tri-ring burner Features a versatile three-in-one burner design for 19,000 to 20,000 BTUs boiling or gentle 140° simmering.

PowerBoil<sup>™</sup> burner Delivers 15,000 to 17,000 BTUs of intense heat for rapid boiling.

## Dishwasher-safe, continuous grates Allow for easy movement of pots and

pans between burners and don't require hand-cleanina.

Offers an additional 1.0 cu. ft. of capacity

for convenient baking from 140° to 450?

#### Removable drawer liner Provides additional convenience for quick and easy cleaning.

Bakina drawer

Precise Simmer burner Delivers a low setting of 140° ideal for delicate foods and sauces.

## Self-clean oven with hidden bake oven interior

Conveniently cleans the oven cavity without the need for scrubbing, and the hidden bake element makes cleanup even easier.

Prevents gas flow to cooktop and locks out oven controls, helping prevent unintended activation.

Black gloss oven interior Black oven interior adds a stylish touch to any kitchen.

Certified Sabbath mode Allows consumers to keep cooked foods warm on the Jewish Sabbath and Jewish holidays.

# ADVANTIUM® OVENS

A 4-in-1 oven with Speedcook™ technology means faster foods with slow-cooked taste.

## Explore Advantium ovens

#### Four ovens in one

Speedcook oven, True European Convection oven, sensor microwave oven and warming oven provide multiple cooking options.

Advantium Speedcook technology Delivers oven-quality food up to eight times faster than a conventional oven. (The Advantium 120 models deliver up to four times faster).

Preprogrammed recipes Provides quick and easy access to over 175 pre-set food selections and allows programming of up to 30 custom recipes.

Glass touch controls Feature a smooth glass design that is easy to operate and easy to clean.

Easy Set control dial Allows quick, accurate adjustment of cooking settings with a simple touch, turn and tap of the dial.

Stainless steel interior Durable surface that cleans quickly with a simple wipe of a towel.

#### Multi-level cooking Removable rack allows cooking

multiple dishes at once.

Specialized mode allows dough to rise quickly and efficiently.

#### Family-size capacity

Each Advantium has a large 1.7 cu. ft. capacity, allowing you to bake larger quantities of your family's favorites.

## **MICROWAVE OVENS**

A microwave with power-saving capabilities means it takes less energy to put food on the table.

## Explore Spacemaker® microwave ovens

#### **Easy clean interior** Porcelain enamel interior makes it easier to clean dried-on foods. Non-porous surface also makes cleaning spills and splatters a snap.

**Power Saver mode** This mode delivers a reduction in standby power while the unit is not in use. The clock continues to operate on schedule, while Power Saver is activated and during power failures.

**USDA "MyPlate.gov" menu** 5 food groups, 19 foods and 44 pre-programmed food combinations assist in healthy meal preparation.

Two-piece design with hidden vent Creates a streamlined look for a smooth finish and no more reaching into difficult areas to keep your microwave oven spotless.

Powerful four-speed-with-boost

Allows you to adjust ventilation

levels according to your needs.

Boost allows selection of highest

400-CFM venting fan

CFM with one touch.

**Recessed turntable with on/off** Offers the flexibility to use cookware

of different sizes. An on/off button controls turntable operation.

Steam cook button

A variety of food selections and power levels help to perfectly prepare steamed favorites, like asparagus, broccoli and more, for maximum nutrition retention.

Sensor cooking controls Automatically adjust time and power for delicious cooking results.

Microwave ovens

## COUNTERTOP MICROWAVE OVENS

A countertop microwave that takes the guesswork out of time and power level settings means you can enjoy foods just the way you like them.

**Convection/combination cooking** Combines microwave with traditional radiant heat to bake and roast foods with accuracy.

Inverter technology

Convenience cooking

everyday foods.

Offers preprogrammed settings

for reheating and defrosting of

Delivers constant power for precise performance, even on low settings such as "warm."

**Double-grill technology** Uses top and bottom radiant heating elements to ensure even browning on both sides of food.

**Top-browning capability** Crisps food on the surface by using a top heating element.

Auto and Time Defrost Automatically defrosts for a specified amount of time or weight.

Sensor cooking Uses built-in sensors to automatically set power and time based on food moisture levels.

**Soften and Melt** Worry-free setting for softening or melting butter, caramel, chocolate, cheese, ice cream and cream cheese.

4.3 DOE\* cu. ft. stainless steel capacity Tilted stainless steel basket handles big loads, reducing the total time you spend in the laundry room.

**Dryer features** 

#### 7.5 cu. ft. stainless steel capacity

Stainless steel drum can take on everything the washer sends its way.

#### SteamRefresh/Steam Dewrinkle

SteamRefresh helps reduce wrinkles and odors and rejuvenates clothes. Steam Dewrinkle conveniently helps reduce wrinkles and freshens your clean clothes.

SteamRefresh/Steam Assist SteamRefresh helps reduce wrinkles and odors and rejuvenates clothes, while Steam Assist penetrates fabrics to dissolve soils and helps remove tough stains.

#### **Adaptive Vibration Control** Considers floor type and location of washer in the home to adapt and optimize spin

patterns, reducing vibration and sound.

Scan this code with your QR reader to learn more.

Specialty cycles

24 specialty cycles provide specific care for performance fabrics, fleece, comforters, pet bedding, athletic shoes, hosiery and bras.

#### eWash option

Energy-saving option uses a coldwater wash on select cycles without sacrificing performance.

SmartDispense<sup>™</sup> technology\*\* Pedestal holds up to 6 months of detergent\*\*\* and 95 ounces of fabric softener and dispenses the right amount at the right time.

\*Department of Energy. \*\*SmartDispense technology is not available without a SmartDispense pedestal which must be purchased separately

## DuoDry<sup>™</sup> system

Dual motors, dual moisture sensors and dual thermistors monitor air temperature and provide even heat.

#### eDry option

Energy-saving option reduces dry temperatures on select cycles without sacrificing performance.

frontload matching dryers.<sup>†</sup>

**Baffle Dry** 

and delicates.

#### CleanSpeak<sup>™</sup> communication system

The washer communicates electronically with the dryer to preset dry cycles and help save time.

Built-in drying rack and hanger clip design

add drying options for hard-to-dry items

## High-efficiency clothes care systems

# WATER HEATERS

A water heater with hybrid technology means saving money is as easy as a day at the beach.

# Explore GeoSpring<sup>™</sup> hybrid water heater

#### **ENERGY STAR®** qualified

Exceeds ENERGY STAR standards with a 2.4 energy factor rating in Hybrid mode, which saves \$325 every year.\*

#### Hot water recovery

Hybrid technology offers the same amount of water recovery as traditional 50-gallon electric water heaters, while using less energy.

#### Hybrid mode

While the unit uses the heat pump as its primary means to heat the water, the standard electric elements may activate if a faster water temperature recovery time is needed.

#### Vacation mode

While you're away the system will drop the temperature to save energy, then automatically heat the water the day before you return.

. HEAT PLIMP IONIN HYBRID

HIGH DEMAND

ELECTRIC (FAN OFF)

HIGH DEMAND

ELECTRIC (FAN OFF)

VACATION

#### HYBRID

- HIGH DEMAND
- ELECTRIC (FAN OFI
- VACATION

#### **High Demand mode**

The water heater will be faster to react to temperature recovery by cycling on the heating elements sooner and for a longer duration of time.

#### Same connections

Offers easy replacement of a standard electric water heater by using existing water and electrical connections.

# Heat pump mode

Advanced hybrid technology allows water to be heated solely from the heat pump without using traditional electric elements.

HEAT PUMP ION

HIGH DEMAND

ELECTRIC (FAN OFF) VACATION

HYBRID

#### Remote access

Offers remote functionality to control modes and temperatures when connected to GE's Nucleus<sup>™</sup> energy manager. Also sends product alerts when maintenance is required.

#### Removable filter

Filter prevents dust and debris from depositing on the evaporator and fans to keep the heat pump running efficiently.

# Limited 10-year warranty

Protects your appliance and offers dependability for years.

#### Filter button

Clean filter when light is illuminated, then press the button to reset filter indicator.

\*Based on DOE test procedure and comparison of a 50-gallon standard electric tank water heater using 4879 kWh every year vs. the GeoSpring hybrid water heater using 1830 kWh every year.

# GeoSpring<sup>™</sup> hybrid water heater

### **GEH50DEEDSR**

#### GeoSpring hybrid water heater

- Saves \$325 every year\* in water heater expenses
- Uses up to 62% less energy than a standard electric water heater
  Proudly assembled in Louisville, KY
- Provides the same hot water recovery as a traditional 50-gallon standard electric water heater with 65-gallons-first-hour rating
  Installs like a standard electric water heater with the same water
- and electrical connections
- Limited 10-year warranty provides peace of mind and dependability
- ENERGY STÁR<sup>®</sup> qualified—exceeds federal guidelines for energy efficiency and provides year-round energy and money savings
- Offers remote functionality to control modes and temperatures when connected to GE's Nucleus<sup>™</sup> energy manager

\*Based on DOE test procedure and comparison of a 50-gallon standard electric tank water heater using 4879 kWh every year vs. the GeoSpring hybrid water heater using 1830 kWh every year.

# All the hot water. For a whole lot less.

The new GeoSpring hybrid water heater has been designed to deliver maximum energy savings without sacrificing any hot water. By utilizing advanced heat pump technology in combination with traditional electric elements, this innovative product can significantly cut annual energy costs.

<text>

#### Standard

# Save \$325 every year\*

Did you know the water heater is the second biggest energy consumer in the house? That's why the GeoSpring can have such an impact on utility bills—helping save hundreds of dollars every single year.

# WINDOW AIR CONDITIONERS

Window air conditioners with improved convenience and versatility mean comfort for the whole family.

# Explore GE<sup>®</sup> electronic room air conditioners #1 preferred brand of room air conditioners.\*

#### R-410A refrigerant

R-410A meets 2010 U.S. Environmental Protection Agency requirements for the phase-out of ozone-depleting hydrochlorofluorocarbons (HCFCs) found in the older R-22 refrigerant.

**Energy Saver feature** When the room is cool enough, the compressor and fan shut down temporarily, saving energy and money.

**ENERGY STAR® qualified** Meets energy efficiency standards and provides seasonal energy and money savings.

Following an outage, the unit automatically resumes operation at the prior temperature setting.

Power interruption restart

#### Timer

Programmable timer lets you tell the air conditioner when to turn "on" or "off," even if you're not around.

**Remote control** Hand-held controller makes operating the air conditioner extra easy.

From the date	materials or workmanship. During this <b>limited one-year</b>
of the original	warranty, GE will provide, <b>free of charge</b> , all labor and
purchase	related service costs to replace the defective part.
Second through	Racks or Electronic Control Board, if either the racks
fifth year	or electronic control board should fail due to a defect in
From the date	materials or workmanship. During this <b>additional four-</b>
of the original	year limited warranty, you will be responsible for any
purchase	labor and related service costs.
Lifetime of	Tub or Door Liner, if either the tub or door liner should fail
product	due to a defect in materials or workmanship. During this
From the date	limited product lifetime warranty, GE will provide, free of
of the original	charge, all labor and related service costs to replace the
purchase	defective part.

#### GE Profile/GE<sup>®</sup> 18" and GE dishwashers

OL I TOILE/OL	
For the period of	GE will replace
	Any part in the dishwasher which fails due to a defect in
From the date	materials or workmanship. During this limited one-year
of the original	warranty, GE will provide, free of charge, all labor and
purchase	related service costs to replace the defective part.

#### Compactors

For the period of	GE will replace
One year	Any part in the compactor which fails due to a defect in
	materials or workmanship. During this limited one-year
of the original	warranty, GE will provide, free of charge, all labor and
purchase	related service costs to replace the defective part.

#### Disposers

For the period of	GE will replace
<b>One year</b> From the date of the original purchase	The entire disposer if there is a defect in materials or workmanship relating to functional parts only (appearance parts are excluded). During this <b>limited one-year warranty</b> , GE will also provide, <b>free of charge</b> , all labor charges related to replacing the original disposer <b>along with the</b> <b>replacement disposer within the first year</b> .

#### Disposers

For the period of	GE will replace
Additional	Models GFC520V, GFC525V: If there is a defect in materials or
one year	workmanship relating to functional parts only (appearance
From the date	parts are excluded). During this <b>one-year extended limited</b>
of the original	<b>warranty</b> period, you will be responsible for all installation
purchase	charges related to the replacement disposer.
Additional	Models GFC530V, GFC535V: If there is a defect in materials or
two years	workmanship relating to functional parts only (appearance
From the date	parts are excluded). During this <b>two-year extended limited</b>
of the original	<b>warranty</b> period, you will be responsible for all installation
purchase	charges related to the replacement disposer.
Additional	Models GFC720V, GFB760V: If there is a defect in materials or
four years	workmanship relating to functional parts only (appearance
From the date	parts are excluded). During this <b>four-year extended limited</b>
of the original	<b>warranty</b> period, you will be responsible for all installation
purchase	charges related to the replacement disposer.
Additional	Model GFC1020V: If there is a defect in materials or
six years	workmanship relating to functional parts only (appearance
From the date	parts are excluded). During this <b>six-year extended limited</b>
of the original	<b>warranty</b> period, you will be responsible for all installation
purchase	charges related to the replacement disposer.

#### GE Profile topload washers

For the period of	GE will replace
<b>One year</b> From the date of the original purchase	Any factory specified part of the washer which fails due to a defect in materials or workmanship. During this limited one-year warranty, GE will provide, free of charge, all labor and related service costs to replace the defective part.
Second through fifth year From the date of the original purchase	The suspension rod and spring assembly, and main electronic control board, if any of these parts should fail due to a defect in materials or workmanship. GE will also replace the washer lid or cover, if they should rust under operating conditions. During this additional four-year limited warranty, you will be responsible for any labor and related service costs.
Second through tenth year From the date of the original purchase	The shaft and tube assembly and outer tub, if any of these parts should fail due to a defect in materials or workmanship. During this additional nine-year limited warranty, you will be responsible for any labor and related service costs.
Lifetime of product From the date of the original purchase	The washer basket, if it should fail due to a defect in materials or workmanship. During this <b>product lifetime</b> <b>limited warranty</b> , you will be responsible for any labor and related service costs.

#### – GE Profile Harmony™ topload washers

For the period of	GE will replace
<b>One year</b> From the date of the original purchase	Any part of the washer which fails due to a defect in materials or workmanship. During this <b>limited one-year</b> warranty, GE will provide, <b>free of charge</b> , all labor and related service costs to replace the defective part.
Second through fifth year From the date of the original purchase	The suspension rod and spring assembly, and main electronic control board, if any of these parts should fail due to a defect in materials or workmanship. GE will also replace the washer lid or cover, if they should rust under operating conditions. During this additional three-year limited warranty, you will be responsible for any labor and related service costs.
Second through tenth year From the date of the original purchase	The direct drive motor and outer washer tub, if any of these parts should fail due to a defect in materials or workmanship. During this <b>additional nine-year limited</b> warranty, you will be responsible for any labor and related service costs.
Lifetime of product From the date of the original purchase	The washer basket, if it should fail due to a defect in materials or workmanship. During this <b>product lifetime</b> <b>limited warranty</b> , you will be responsible for any labor and related service costs.

#### **GE Profile frontload washers**

For the period of	GE will replace
<b>One year</b> From the date of the original purchase	Any part of the washer which fails due to a defect in materials or workmanship. During this <b>limited one-year</b> warranty, GE will provide, <b>free of charge</b> , all labor and related service costs to replace the defective part.
Second through fifth year From the date of the original purchase	The suspension strut assembly, motor and motor controller, if any of these parts should fail due to a defect in materials or workmanship. GE will also replace the <b>washer top panel, front panel or service panel</b> , if they should rust under operating conditions. During this <b>additional three-year limited warranty</b> , you will be responsible for any labor and related service costs.
Second through tenth year From the date of the original purchase	The outer tub and driven pulley, if any of these parts should fail due to a defect in materials or workmanship. During this <b>additional nine-year limited warranty</b> , you will be responsible for any labor and related service costs.
Lifetime of product From the date of the original purchase	The washer basket, if it should fail due to a defect in materials or workmanship. During this <b>product lifetime</b> <b>limited warranty</b> , you will be responsible for any labor and related service costs.

#### GE washers, frontload washers, non-coin commercial washer and SmartDispense™ pedestal

For the period of	GE will replace
One year	Any part in the washer which fails due to a defect in
From the date	materials or workmanship. During this limited one-year
of the original	warranty, GE will provide, free of charge, all labor and
purchase	related service costs to replace the defective part.

fifth year	of these parts should fail due to a defect in materials or
From the date	workmanship. During this <b>additional four-year limited</b>
of the original	warranty, you will be responsible for any labor and
purchase	related service costs.

#### GE dryers, frontload dryers and non-coin commercial dryer

For the period of	
One year	Any part in the dryer which fails due to a defect in materials
	or workmanship. During this <b>limited one-year warranty</b> ,
of the original	GE will provide, <b>free of charge,</b> all labor and related
purchase	service costs to replace the defective part.

#### GeoSpring<sup>™</sup> hybrid water heater

For the period of	GE will replace
<b>One year</b> From the date of the original purchase	Any part of the GeoSpring hybrid water heater which fails due to a defect in materials or workmanship. During this <b>limited one-year warranty</b> , GE will also provide, <b>free</b> of charge, all labor and related service to replace the defective part.
Second through tenth year From the date of the original purchase	Any part of the GeoSpring hybrid water heater which fails due to a defect in materials or workmanship. During this <b>limited ten-year parts warranty</b> , labor and related service to replace the defective part are not included.

#### Air conditioners (built-in)

For the period of	GE will replace
<b>One year</b> From the date of the original purchase	Any part in the air conditioner which fails due to a defect in materials or workmanship. During this <b>limited one-year</b> warranty, GE will provide, <b>free of charge</b> , all labor and related service costs to replace the defective part.
Five years From the date of the original purchase	Sealed Refrigerating System, if the Sealed Refrigerating System (compressor, condenser, evaporator and all connecting tubing) should fail due to a defect in materials or workmanship. During this <b>limited five-year warranty</b> , GE will provide, <b>free of charge</b> , all labor and related service costs to replace the defective part.

#### Air conditioners (window)

For the period of	GE will replace
One year	Any part in the air conditioner which fails due to a defect
From the date	in materials or workmanship. During this <b>limited one-year</b>
of the original	warranty, GE will provide, free of charge, all labor and
purchase	related service costs to replace the defective part.

#### Dehumidifiers and air purifiers

For the period of	GE will replace
One year	During this <b>limited one-year warranty</b> , GE will replace
From the date of the	the dehumidifier or air purifier if there is a <b>defect in</b>
	materials or workmanship.

#### What GE will not cover:

- Service trips to your home to teach you how to use the product.
- Improper installation.
- Replacement of house fuses or resetting of circuit breakers.
- Failure of the product if it is abused, misused or used for anything other than the intended purpose or used commercially.
- Damage to product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage caused by possible defects with this appliance.

**EXCLUSION OF IMPLIED WARRANTIES**—Your sole and exclusive remedy is product repair as provided in this Limited Warranty. Any implied warranties, including the implied warranties of merchantability or fitness for a particular purpose, are limited to one year or the shortest period allowed by law.

\*See written warranty for complete details.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA. In Alaska, the One-Year Warranty excludes the cost of shipping, or service calls to your home. Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state's Attorney General.

# ADA requirements\*

#### **Refrigerators/Freezers**

Top-freezers and side-by-sides

Regulation #/ Description:

4.2.6\* Side Reach—If the clear floor space allows parallel approach by a person in a wheelchair, the maximum high side reach allowed shall be 54" (1370mm) and the low side reach shall be no less than 9" (230mm) above the floor.
4.27.4 Operation—Controls and operating mechanisms shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no greater than 5 lbf (222N).
4.34.6.8\* Refrigerators/Freezers—Refrigerator/freezers shall comply with 4.34.6.3. Provision shall be made for refrigerators which are: (1) Of the vertical side-by-side refrigerator/freezer type; OR (2) Of the over-and-under type and meet the following requirements: (a) Have at least 50 percent of the freezer space below 54" (1370mm) above the floor. (b) Have 100 percent of the refrigerator space and controls below 54" (1370mm).

#### Wall ovens

Single self-clean ovens

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

4.34.6.7-ovens shall have controls on front panels; they may be located on either side of the door.

#### Slide-in/Drop-in ranges

Electric and gas

#### Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

**4.34.6.6**—if ovens or cooktops have knee spaces underneath then they shall be insulated or otherwise protected on the exposed surfaces to prevent burns, abrasions, or electrical shock. The location of controls for ranges and cooktops shall not require reaching across burners.

#### **Electric cooktops**

Front control

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

**4.34.6.6**—if ovens or cooktops have knee spaces underneath then they shall be insulated or otherwise protected on the exposed surfaces to prevent burns, abrasions, or electrical shock. The location of controls for ranges and cooktops shall not require reaching across burners.

#### Gas cooktops

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

**4.34.6.6**—if ovens or cooktops have knee spaces underneath then they shall be insulated or otherwise protected on the exposed surfaces to prevent burns, abrasions, or electrical shock. The location of controls for ranges and cooktops shall not require reaching across burners.

#### Free-standing ranges

Electric and gas

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

**4.34.6.6**—if ovens or cooktops have knee spaces underneath then they shall be insulated or otherwise protected on the exposed surfaces to prevent burns, abrasions, or electrical shock. The location of controls for ranges and cooktops shall not require reaching across burners.

#### Microwave ovens\*\*

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf.

\*\*ADA compliant in the built-in configuration

#### Dishwashers

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

**4.34.6.9**—all rack space shall be accessible from the front of the machine for loading and unloading dishes.

#### Laundry

Regulation #/ Description:

**4.2.5**—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf;

4.34.7.2—washing machines and clothes dryers shall be front loading. Room air conditioners

#### Regulation #/ Description:

4.2.5—maximum high forward reach for controls and operating mechanisms is 48", minimum low forward reach is 15";

**4.27.4**—controls and operating mechanisms must be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate controls shall be no more than 5lbf.

# Parts list

	Part Number	
Stainless steel		Cerama Bryte® stainless steel appliance
maintenance	PM10X311	cleaner
Refrigeration	IM6	GE® icemaker kit
	MWF	GE SmartWater™ replacement water filter
	MSWF	GE SmartWater replacement water filter
	GSWF	GE SmartWater slim replacement water filte
	WX08X10006	GE SmartConnect tubing for icemakers— 6 ft. length
	WX08X10015	GE SmartConnect tubing for icemakers— 15 ft. length
	PM14X10056	Appliance brush set
	WX10X10206	Cerama Bryte fridge cleaner
	WX10X25	Smells Begone®
Cooking	WB48X10056	Broiler pan/rack set—large (12-3/4 in. × 16-1/2 in.)
	WX9X6	4 ft. 3-wire 40-amp electrical range cord
	WX9X35	4 ft. 4-wire 40-amp electrical range cord
	WX10X300	Cerama Bryte glass-ceramic cooktop cleane
	WX10X117GCS	Cerama Bryte cleaning kit—includes scraper, cleaning pads and 10 oz. bottle of cooktop cleaner
Microwave	WB2X9883	Recirculating charcoal over-the-range filter
ovens	WB2X4267	Recirculating charcoal over-the-range filter
	WX10X3030	Micro Bryte <sup>®</sup> microwave/appliance cleaner
Dishwashers	PM28X319	Universal 6 ft. dishwasher connector kit
	WX28X320	10 ft. drain hose/10 ft. universal connector k
	WD35X151	Citric Acid cleaner
	WX10X10200	Dishwasher Magic®
	WX10X10019	Lemishine cleaner and deodorizer
Disposers	WX10X18	Disposer Care®
	PM3X211	Splash guard and stopper
	PM3X214	3-bolt mount adapter kit
Clothes care	PM14X10002	Rubber washer hose, 2-pack
	PM14X10005	Stainless steel washer hose, 2-pack
	PM8X73	UL-approved universal flexible dryer duct
	PM08X10084	UL-approved semi-rigid dryer duct kit—8 ft.
	PM15X104	Universal 48 in. gas dryer installation kit
	WX9X18	4 ft. 4-wire 30-amp electrical dryer cord
	WX9X2	4 ft. 3-wire 30-amp electrical dryer cord
	WX10X10201	Washer Magic <sup>®</sup>
	WX10X10011	Tide® washer cleaner

Clearance required to remove fresh food full size pan without disassembling is 4'

ALL MODELS AVAILABLE IN U.S. AND CANADA.

#### **Built-in refrigerators**

#### Installation space

\*The finished cutout width must be: 41-1/2" for 42" models and 47-1/2" for 48" models

#### Panel-required refrigerators

Panel-required refrigerators are designed to be customized with decorative panels. Field-installed custom and grille panels are required. You may install 1/4"- or 3/4"-thick custom panels from your cabinet manufacturer.

#### **IMPORTANT NOTE: dispenser trim**

The refrigerator is supplied with factory-installed dispenser trim. • If panel is less than 1/4" thick, a noticeable gap will be created around the

dispenser trim. Foam tape may be applied on the door to improve the fit. • If panel is more than 1/4" thick, the panel will not fit behind the trim.

#### **IMPORTANT NOTE:** panel weight

Maximum weight for Fresh Food panel is 70 pounds, 45 pounds total for Freezer (both upper and lower panels) and 15 pounds for grille panel. .250 + .750 = 1.000 Maximum Total Panel Thickness

Door

#### 1/4" framed panel dimensions

If you choose to install framed panels, they must be cut to the dimensions shown. The panels will slide into the frame on the door and grille.

#### 3/4" custom panel dimensions

For a more custom appearance, 3/4" custom panels must be installed on trimmed models. The custom panel must be cut to dimensions specified below. The custom panel then slides into the trim.

- 5/16"

Trim

top-to-bottom offset.

Backer Pane

#### Front panel dimensions (in inches)

	Α	В	С	D	E	F	G
42" models	39-15/16	10-3/4	67-7/8	16-7/16	22-11/32	17-13/16	35-5/32
48" models	45-31/32	10-3/4	67-7/8	18-15/32	26-15/32	17-13/16	35-5/32

#### Side panels

Side panels (not supplied) must be used whenever the sides of the refrigerator will be exposed. The 1/4" side panels will slip into the side case trim. Order side panels from your cabinet manufacturer.

\*Depending on installation height.

#### Flooring

\*Installation information:

Before installing, consult installation instructions packed with product for current dimensional data

> For proper installation, this refrigerator must be placed on a level surface of hard material that is at the same height as the rest of the flooring. This surface should be strong enough to support a fully loaded refrigerator, or approximately 1500 lbs.

#### Water and electrical locations

The opening must be prepared with the electrical and water supply located as shown.

The cutout depth must be 24"

The refrigerator will project forward, slightly beyond adjacent cabinets, depending on your installation.

#### Additional specifications

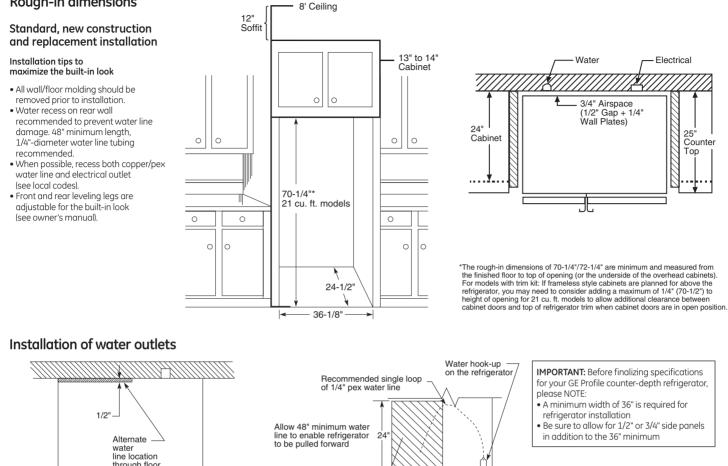

• A 120-volt, 60Hz, 15- or 20-amp power supply is required. An individual properly grounded branch circuit or circuit breaker is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall. Electrical must be located on rear wall as shown.

• Note: GFI (ground fault interrupter) is not recommended.

• Water line can enter the opening through the floor or rear wall. The water line installed should be 1/4" O.D. copper tubing or GE SmartConnect™ tubing between the cold water line and water connection location. The line should be long enough to extend to the front of the refrigerator. Installation of an easily accessible shutoff valve in the water line is required.

through floor

Rear Wall View

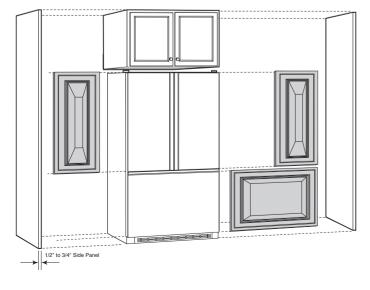

18'

#### Create a custom look for your GE Profile counter-depth bottom-freezer refrigerator

Recommended water line

location using recess in rear wall

Still another advantage offered by GE Profile counter-depth refrigerators is ease of installation. For a refrigerator that does so much to enhance the beauty of your kitchen, the "behind-the-scenes" preparation and installation are surprisingly simple

#### Fabricating the enclosure

- The drawing shows an 84" cabinet elevation. Adjust dimensions accordingly for other cabinet elevations
- Cabinet pieces to order: (2) side panels and (1) wall cabinet.
- Side panels will typically be attached to adjacent cabinets and/or cleated to rear wall and floor.
- Refer to GE refrigerator installation instructions for proper plumbing, and electrical and air clearances
- (1) Some framed cabinet lines will make a refrigerator enclosure with a cabinet 12" high  $\times$  39" wide with sides and 1-1/2" face frame extended down to floor to create the refrigerator space. This will replace the above construction. (2) A tall cabinet on either side of the refrigerator can replace a side panel.
- Counter overhangs on either side of the refrigerator should have clipped corners to allow for full door swing
- If the refrigerator has a wall returning beyond the front of the refrigerator on either side, a 2" tall filler will help allow for movement of the door.

#### Door Panels

- See drawings for exact dimensions of the fresh-food and freezer door panels.
- Refrigerator door fronts from stock and most semi-custom cabinet manufacturers will be supplied as 1/4"-thick panels cut to dimensions, with closest available standard door sizes applied to front.
- -This will leave a "reveal" at top/bottom and sides. Width of "reveal" will depend on manufacturer's standard door sizes.
- -Door will be affixed on the 1/4" panels at factory or in the field by the local supplier, depending on manufacturer.
- Local shop-built or custom cabinet supplier may fabricate custom 3/4" panels. In this case, edges must be routed.
- Follow notes on drawing to assure room for fingers/hands to open handles

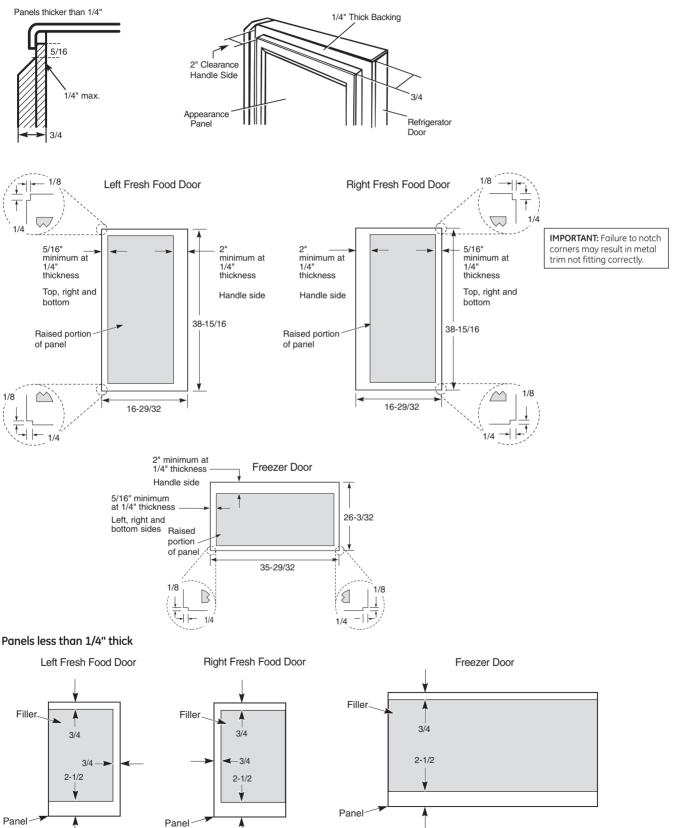

\*Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

Refrigeration

#### Door panel dimensions (in inches)

Order your own custom wood panels to match cabinetry or other decor. Panels up to 1/4" thick or panels with 1/4" thick flanges will fit into your new counter-depth refrigerator. Follow these patterns to ensure they will fit securely. Add filler behind panels (see below) to ensure they will not rattle. Weight Limits: Total weight of panels—Fresh Food = 10 lbs. each, Freezer = 18 lbs. max. Note: Panels up to 3/4" will require special routing area around handles. Dimensions may vary depending on depth of panel.

#### Dimensions for custom wood panels

# GE Profile™ and GE® counter-depth side-by-side installation information & specifications

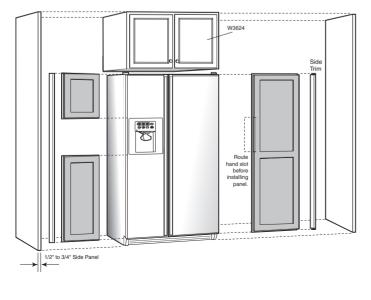

#### **Rough-in dimensions**

Rear Wall View

#### Create a custom look for your GE Profile counter-depth side-by-side refrigerator

Still another advantage offered by GE Profile counter-depth refrigerators is ease of installation. For a refrigerator that does so much to enhance the beauty of your kitchen, the "behind-the-scenes" preparation and installation are surprisingly simple

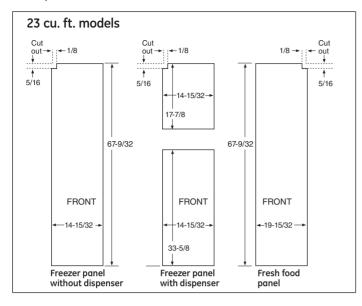

#### Fabricating the enclosure

- The drawing shows an 84" cabinet elevation. Adjust dimensions accordingly for other cabinet elevations
- Cabinet pieces to order: (2) side panels and (1) wall cabinet.
- Side panels will typically be attached to adjacent cabinets and/or cleated to rear wall and floor.
- Refer to GE refrigerator installation instructions for proper plumbing, and electrical and air clearances
- (1) Some framed cabinet lines will make a refrigerator enclosure with a cabinet 12" high  $\times$  39" wide with sides and 1-1/2" face frame extended down to floor to create the refrigerator space. This will replace the above construction. (2) A tall cabinet on either
- side of the refrigerator can replace a side panel. • Counter overhangs on either side of the refrigerator should have clipped corners to allow for full door swing.
- If the refrigerator has a wall returning beyond the front of the refrigerator on either side, a 2" tall filler will help allow for movement of the door.

#### Door Panels

- See drawings for exact dimensions of the fresh food and freezer door panels.
- Refrigerator door fronts from stock and most semi-custom cabinet manufacturers will be supplied as 1/4"-thick panels cut to dimensions, with closest available standard door sizes applied to front.
- -This will leave a "reveal" at top/bottom and sides. Width of "reveal" will depend on manufacturer's standard door sizes.
- –Door will be affixed on the 1/4" panels at factory or in the field by the local supplier, depending on manufacturer.
- Local shop-built or custom cabinet supplier may fabricate custom 3/4" panels. In this case, edges must be routed.
- Follow notes on drawing to assure room for fingers/hands to open handles

\*Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

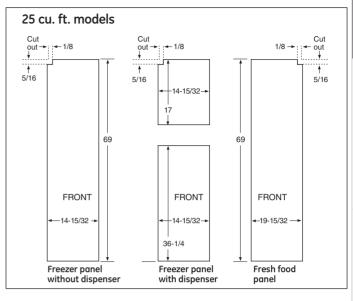

#### Order your own custom wood panels to match cabinetry or other decor.

Panels up to 1/4" thick will fit door frame with no special preparation. Add filler behind material thinner than 1/4" for proper fit.

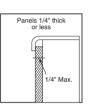

Weight Limits: Total weight of panels (i.e., both freezer panels)—Fresh Food = 38 lbs., Freezer = 28 lbs.

**Note:** Panels up to 3/4" will require special routing area around handles. Dimensions may vary depending on depth of panel.

#### Detail C

# 1/8" Image: Strain St

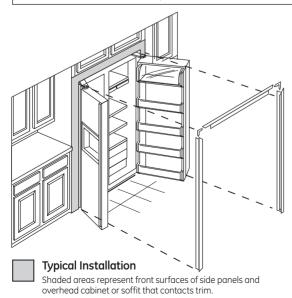

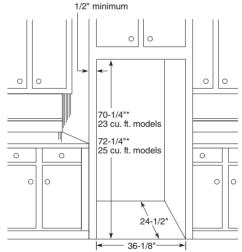

#### Collar trim installation

An enclosure is **required** to match up to the trim (see Typical Installation). To obtain the most integrated look, the cabinet or soffit above the refrigerator should extend out to the same depth as the side panels. The refrigerator opening must have minimum dimensions of 70-1/4" high x 36-1/8" wide x 24-1/2" deep for 23 cu. ft. models and 72-1/4" high x 36-1/8" wide x 24-1/2" for 25 cu. ft. models, as shown at right. If there is an overhead cabinet, allow 1" for cabinet door clearance with the top trim piece so the cobinet doors can be opened without hitting the top trim. If 1/2" side panels are used, then side trim and panel will be even. If 3/4" side panels are used, then some of the side panel will extend beyond the trim and must be finished.

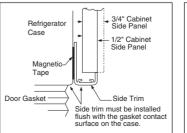

**IMPORTANT:** Before finalizing specifications for your GE Profile counter-depth refrigerator, please NOTE:

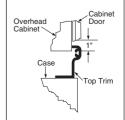

- A minimum width of 36-1/8" is required for refrigerator installation with collar
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36-1/8" minimum

\*The rough-in dimensions of 70-1/4'/72-1/4\* are minimum and measured from the finished floor to top of opening (or the underside of the overhead cabinets). For models with trim kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4' (70-1/2') to height of opening for 23 cu. ft. models and 1/8' (72-3/8') for 25 cu. ft. models to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

Above illustrations intended for dimensional reference only. Refer to photography for actual product appearance.

Underwriters Laboratories

### Undercounter installation dimensions (in inches) Models PTD915 and PKD915

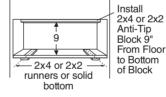

Note: When installing the warming drawer below a cooktop, a solid barrier must be installed at least 1" from the lowest point of the bottom of cooktop burner box to the top of the cutout. Use any solid material such as 1/4"-thick plywood. Allow at least 1/4" air gap between the barrier and the top of the warming drawer. See label on top of the warming drawer for approved cooktop models.

Note: Door handle protrudes 3" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

Note: Use of drawer with ZXD30B and ZXD27B custom panel kit will result in the panel not being flush with adjacent cabinet doors and drawers.

(Must support 150 lbs.)

#### When installed under a cooktop:

Warming drawers are suitable for installation below only certain specified cooktop models. See the label attached to the top of the warming drawer for suitable models. A solid barrier and air gap between cooktop and warming drawer are required

#### Counter installation dimensions (in inches)

#### Built-in CleanDesign cooktops

Requires a 5" free area between the bottom of the cooktop to any combustible material, i.e., shelving. Free area not required when installing wall oven underneath cooktop. Refer to installation instructions. Units are furnished with a 48" flexible armored cable.

36" ribbon cooktops are approved for use over GE 30" single wall ovens and warming drawers. 30" ribbon cooktops are approved for use over GE 30" and 27" single wall ovens and warming drawers. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

#### Built-in induction cooktops

Requires a 12" min. free area between the bottom of the cooktop to any combustible material, i.e., shelving. Free area not required when installing wall oven underneath cooktop. Refer to installation instructions. Units are furnished with a 36" flexible armored cable.

30" and 36" induction cooktops are approved for use over GE, GE Profile™ and GE Monogram® 30" and 27" single wall ovens\*. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

**Notes:** If installing with a 36" GE Profile or GE Monogram telescopic downdraft system, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. Stainless CleanDesign and gas-on-glass cooktops require 23-5/8" flat surface area. In addition, other clearances to the front edge of the countertop must be considered.

**Note:** Consult cabinet and countertop manufacturers' specs for flush mount installation prior to install.

#### Filler trim kit

When replacing an old GE 30" cooktop (with larger opening) with new 30" models, use the following one-piece trim kit to fill in the over-size hole. Available at additional cost.

JXTR32W (True White)<sup>†</sup> JXTR32C (True Bisque)<sup>†</sup> JXTR32B (Black)

### Installation information:

Before installing, consult installation instructions packed with product for current dimensional data.

### Counter installation dimensions (in inches)

#### **Built-in electric cooktops**

Required free area between the bottom of the cooktop and any combustible material, i.e., shelving, is 5" minimum on models JP626/328 and 1-1/2" minimum on models JP201/202.

Free area not required when installing wall oven underneath. Requires an 18" minimum from cooktop to adjacent overhead cabinets. Units are furnished with a 48" flexible armored cable.

Cooktop model JP328 is approved for use over select GE 27" or 30" single wall ovens. JP626 is approved for use over GE 30" single wall ovens only. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

Cooktop models JP256, JP201CB and JP202D are approved for use over GE undersink dishwasher model GSM2100. Refer to cooktop installation instructions packed with product for current dimensional data.

**Note:** JP328 cooktop cannot be installed in countertops that cannot accept screws, such as granite or marble, etc.

**Note:** JP626 may be installed with a GE Profile telescopic downdraft system. Consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

**Note:** The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. In addition, other clearances to the front edge of the countertop must be considered.

Filler trim kit—When replacing an old GE 30" cooktop (with larger opening) with models JP328WF, JP328CF, JP328BF, JP328SF, use the following one-piece trim kits to fill in the over-size hole. Available at additional cost. JXTR32W (White) JXTR32C (Bisaue)

JXTR32B (Black)

#### Installation information:

Before installing, consult installation instructions packed with product for current dimensional data.

Built-in electric and gas cabinet dimensions (in inches) Models PP989 and PGP989

#### **Receptacle location**

Install an approved junction box within shaded area shown in diagram. Junction box must be at least 10-1/2" below top of cabinet.

### Preparing the cabinet for installation

In some cabinets, the sides may need to be scooped or cut down 5-3/4" as shown and the corner braces removed in order to accommodate the cooktop.

Above illustrations intended for dimensional reference only. Refer to photography for actual product appearance.

### Built-in electric and gas cutout dimensions (in inches) Models PP989 and PGP989

Note: These cooktops 20-5/8 are approved for indoor use only. 28-7/8 1-7/8" MIN. Required

Note: A 5" minimum spacing to adjacent side wall is required on PGP989. A 6" minimum spacing to adjacent side wall is required on PP989.

Note: JXCK89 cord kit needed for the installation of model PP989.

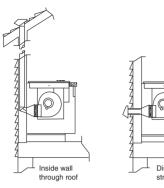

**Note:** Gas and electric coil cooktops cannot be installed over the PT925 due to the top of the oven preventing the gas cooktop from fitting into place.

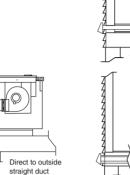

Note: All gas cooktop models require 7/16" free area below cooktop height to combustible material. Require 18" minimum from countertop to adjacent \*AGA requirement. overhead cabinets.\*

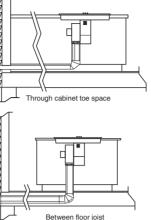

Note: If installing with a GE Profile telescopic downdraft system, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/ electric supply may need to be re-routed to install downdraft.

Note: Shipped with one sealed aas burner module: can be placed in right or left bay. Left side accepts optional modules that must be ordered and are available at additional cost.

### Installation information (in inches)

### Wall installation

Wall installations require 25" countertop depth. When cabinet is flush against the wall, the fan housing can be rotated to the horizontal position for direct venting through rear wall. Make a countertop cutout in the range cabinet according to unit dimensions and installation type. Duct hole is positioned in back of cabinet for through-the-wall ducting. Requires special offset adapter JXRW89

### Peninsula or island installation

For peninsula/islands, a minimum 26" countertop depth is suggested. Blower should be in vertical position. Island or peninsula cabinets may require adjustment in cutout depth and/or location within the width dimensions. Duct hole is positioned in bottom of cabinet for island or peninsula installation.

#### Slab installation

For peninsula or island installation and rear wall ducting, 6" PVC duct or locally approved piping should be used if installing under a poured concrete slab.

Note: Electrical cable is not supplied with unit.

JXRW89 rear wall installation kit

Optional accessories may be ordered for installation on rear wall.

### JXCK89 electrical connection kit

Optional accessory kit for PP989 electric downdraft cooktop only, includes junction box and conduit.

Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

#### Installing the ductwork

Use galvanized or aluminum duct in 6" round or 3-1/4" x 10" size, or combination of both. PVC duct or locally approved piping should be used if installing under a poured concrete slab. Local building code must be followed in specifying type and schedule of all duct used.

Note: Ductwork must be vented to outside. Do not vent into a wall, ceiling, crawlspace, attic or any concealed space. Always use an appropriate roof or wall cap with damper. Laundry-type wall caps should never be used. For maximum efficiency use the shortest and straightest duct run possible, with as few fittings as possible. For satisfactory performance the duct run should not exceed 100 feet equivalent length. Refer to the table of equivalent lengths (shown in installation instructions) for various duct configurations

> **Optional modules** (Available at additional cost)

Two-burner gas module (sealed hurners)-JXGB90W—White on white

JXGB90B—Black on black JXGB90S—Stainless steel Gas arill module—JXGG90L

Front- and rear- controlled heating element. One-piece grill grate is non-stick coated.

Griddle–JXGL90L (For use with optional grill module sold separately) Place over heating element and reflector pan for optional grill module. Griddle accessory has a non-stick coating and is self-draining.

Note: Left module sold separately

Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

Above illustrations intended for dimensional reference only. Refer to photography for actual product appearance.

### KTOP, WALLS

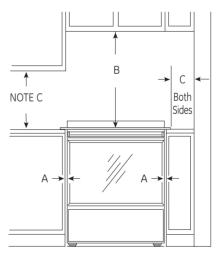

- op, flooring and and the heat (up
- n surface units netal cabinet, or wood or metal 4" thick flame ess than No 28 ainless steel, table electrical so the length is
- C. This appliance has been approved for 0" spacing to adjacent surfaces above the cooktop. However, a 6" minimum spacing to surfaces less than 15" above the cooktop and adjacent cabinet is recommended to reduce exposure to steam, grease splatter and heat.

To reduce the risk of burns or fire when reaching over hot surface elements, cabinet storage space above the cooktop should be avoided. If cabinet storage space is to be provided above the cooktop, the risk can be reduced by installing a range hood that projects at least 5" beyond the front of the cabinets. Cabinets installed above the cooktop must be no deeper than 13".

\*Depth including door handle is approximately 28-7/8".

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

Countertop

Note: Cabinets installed adjacent to slide-in electric ranges must have an adhesion spec of at least a 194°F temperature rating.

**Note:** To reduce possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation. Note: Door handle protrudes 3" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

Receptacle locations: For all 30" slide-in ranges, locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

If the countertop area is not flat, excess tension may be applied to the glass cooktop, causing breakage

and voiding the warranty. Make sure the wall covering, countertop, flooring and cabinets around the range

A. Allow 30" minimum clearance between surface units and bottom of unprotected wood or metal cabinet, or allow a 24" minimum when bottom of wood or metal cabinet is protected by no less than 1/4"-thick

flame-retardant millboard covered with no less than No. 28 MSG sheet metal (.015" thick), .015"-thick

However, a minimum 6" spacing to surfaces less than 15" above the cooktop and adjacent cabinetry is recommended to reduce exposure to steam, grease splatter and heat. Allow 1/4" minimum

To reduce the risk of burns or fire when reaching over hot surface elements, cabinet storage space above the cooktop should be avoided. If cabinet storage space is to be provided above the cooktop, the risk can

be reduced by installing a range hood that projects at least 5" beyond the front of the cabinets. Cabinets

#### **Optional kits for drop-in electric ranges** (Available at additional cost)

Maintop filler

(Fills gap between cooktop and wall when unit is installed in 30" free-standing cutout) WB07T10680—Stainless/Black WB07T10681—White WB07T10682—Bisque Note: Cabinets installed adjacent to drop-in electric ranges must

Note: Cabinets installed adjacent to drop-in electric ranges must have an adhesion spec of at least a 194°F temperature rating.

Note: Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

**Note:** To reduce possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation.

**Note:** Drop-in configuration is also approved for 34" countertop heights.

Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

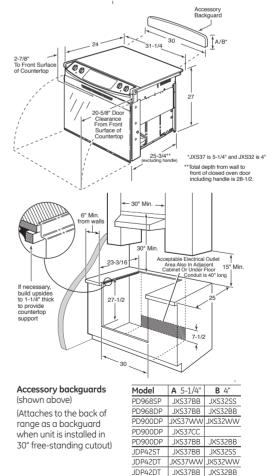

IMPORTANT: 30" DROP-IN RANGES ARE DESIGNED TO HANG FROM THE COUNTERTOP. THEY DO NOT REST ON THE FLOOR. FOR INSTALLATION ALTERNATIVES, REFER TO INSTALLATION INSTRUCTIONS PACKED WITH PRODUCT.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

Drop-in ranges are not approved for installation with a plug and receptacle. They must be hard wired in accordance with installation instructions.

### Dimonsions (in inchas)

30" self-clean gas ranges installation
information

#### Optional gas range accessory drip pans for sealed and standard burner models

(Available at additional cost) To order these accessory drip pans, call toll-free 800-626-2002.

#### Installation Information:

Before installing, consult installation instructions packed with product for current dimensional data. There must be a minimum of 30" between unprotected cabinets above a free-standing gas range and countertops.

### All 30" GE gas and electric range backguards are 30-7/8" wide.\*

Note: 30" ranges conform to UL requirements for 0" spacing from adjacent walls below countertops. To reduce possible scorching of walls, engineering recommends a minimum of 1-1/2" spacing to allow for possible extended, high-heat, no-load heating element operation.

\*Except these models: JGBS07, JGBS04, all GE Profile™ free-standing electric and gas ranges.

Fits most countertop backsplash applications. Consult use and care manual for detailed installation instructions

### Dimensions and specifications (in inches)

#### Custom insert liner

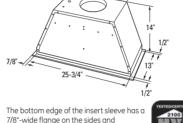

The custom canopy must be sized to fit the insert sleeve. Construct the canopy with an opening that is:  $26"W \times 13-3/16"D$  The opening must be constructed of 3/4" thick material to allow the sleeve

locking clips to engage. Custom cabinet opening width depth

ZVC30LSS 13-3/16" 26" 13-3/16" ZVC36LSS 26"

7/8"-wide flange on the sides and 1/2"-wide flange on the front and back

The supplied liner Δ 7-1/2 21-1/4" В width width ZVC30LSS 1-1/4" 28-1/2" ZVC36LSS 4-1/4" 34-1/2"

A stainless steel liner is shipped with each hood insert. This non-combustible liner protects the underside of the canopy. Custom Liner

If you are not using the supplied liner, you may construct a custom noncombustible liner. Use the supplied liner as a template. The opening must be 26"W x 13-3/16"D. 3/4"-thick material must surround the opening to allow the sleeve locking clips to engage. The insert sleeve inside the cabinet should be positioned 1/2" from the rear wall so that the center of the 8" duct is 5-1/2" from the rear wall.

### Remote location for the control

The control may be removed from the hood and installed into a wall or countertop. A 30-ft. length of wire is supplied to accommodate most installations. A blanking plate covers the opening when the controls are removed. The overall size of the control is 4-1/4" wide and 2-1/4" deep.

We recommend that the cutout in granite or other hard surfaces be made before the countertop is installed.

### In-cabinet discharge (down)

### Approved for use with the following GE Profile and GE® cooktops—36° and 30° electric models, 36° and 30° gas sealed burner models and 36° and 30° GE Profile induction models. Before installing, consult installation instructions packed with product for current dimensional data. Not approved for use with standard burner gas cooktops.

Note: The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. In addition, other clearances to the front edge of the countertop must be considered. Note: Dimensions shown are for reference only. Before cutting out countertop, refer to instructions packed with downdraft and cooktop.

Note: Installation in cabinets/countertops against the wall will not be possible in most applications. Against-the-wall installations are limited to dimension requirements. Refer to installation instructions packed with product for further details.

JXRB67 Indoor Remote Accessory. Optional accessory may be ordered for installation of motor and blower assembly in an indoor remote location.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

The vent is designed for a 3-1/4"  $\times$  10" duct size. A 3-1/4"  $\times$  10" rectangular to 6" round transition duct is available at your local building supply store.

### Optional kits for 36" designer hoods and 30" designer/commercial hoods CV966, CV936, JV966, JV936

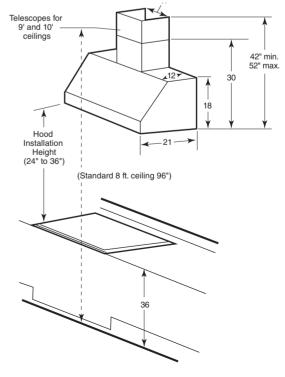

JXCHSS—Stainless Chimney Kit JXDW1—7" round to 3-1/4" × 10" rectangular duct transition for rear wall discharge.

### Installed above a range (shown with optional chimney kit) Dimensions (in inches) CV966, CV936, JV966, JV936

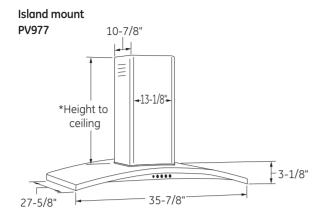

**Note:** Typical overhead cabinets are 12" deep. For cabinets of greater depth, place spacer of non-combustible material behind hood.

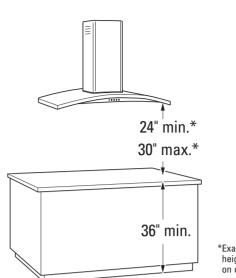

Installed above a cooktop (shown with optional chimney kit) Dimensions (in inches) CV966, CV936, JV966, JV936

Above illustrations intended for dimensional reference only. Refer to photography for actual product appearance.

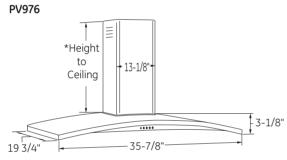

\*The supplied duct cover fits 7'11" to 9'10" ceiling heights (10' in recirculation mode).

NOTE: Installation height should be measured from the cooking surface to the bottom of the outer glass portion of the hood. This hood must be installed 24" min. and 30" max. above the cooking surface. The cooking surface should be at least 36" above

the floor. This hood may be vented to the outdoors, or it can be installed for recirculating operation.

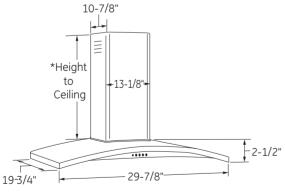

\*Exact installation height depends on ceiling height.

36" Models Require a 36"-Wide Opening

\*The Supplied Duct Cover Fits 7'11" to 9'10" ceiling heights (10' in recirculation mode)

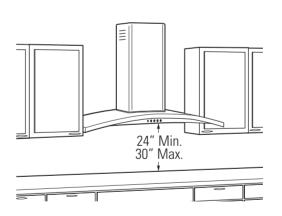

- 30" Models Require a 30"-Wide Opening
- \*The supplied duct cover fits 7'11" to 9'7" ceiling heights
- (10' in recirculation mode).

Note: Vent hoods should be of the same or greater width of the cooking surface.

Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

The vent hood must be installed 24" min. and 30" max. above the cooking surface. The hood installation height above the cooking surface depends upon ceiling height. The telescopic duct cover conceals the ductwork running from the top of the hood to the ceiling. The supplied duct cover is sized to reach 8' to 10' ceiling heights.

**NOTE:** Installation height should be measured from the cooking surface to the lowest part of the hood. This hood may be installed onto a wall and vented to the outdoors, or it can be installed for recirculating operation. All necessary parts for recirculating operation are supplied with the hood. No kits are required.

### Advantium wall oven dimensions and cabinet installation (in inches)

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least 194°F temperature rating. Note: 2" minimum between cutouts when installed above warming drawer or single wall oven.

A=Allow 1" overlap of oven over top and bottom edges of cutout. B=Allow 11/16"-3/4" for overlap of oven over side edges of cutout. \*Required for UL approval on models PSB2200/1 and PSB1000/1. PSB1200/1 may be installed at a minimum of 5" from the floor.

### GE Profile cooking tower dimensions and cabinet installation (in inches)

¢

21-5/8"

over centerline of cabinet

(Must support 130 lbs.)

A=Allow 1" overlap of oven over top and bottom edges of cutout B=Allow 11/16"-3/4" for overlap of oven over side edges of cutout.

Limited five-year magnetron warranty\*\*

\*SS = Stainless steel, WW = White on white, BB = Black on black \*\*See written warranty for details.

240-volt electric wall ovens are not approved for installation with a plug and receptacle. They must be hard wired in accordance with installation instructions. Important: Before installing, consult installation instructions packed with product for current dimensional data.

•

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least a 194°F temperature rating

<sup>†</sup>Optional for units that are not set as recirculating from the factory

### Ventilation options

The Spacemaker convection/microwave and Spacemaker microwave ovens are designed for adaptation to the following three types of ventilation:

Outside exhaust (Vertical—as shown above)

Outside exhaust (Horizontal)

Recirculating (Non-vented ductless—see Filter Kit Drawing, order JX81B, JX81C, JX81D, JX81H or JX81J) Requires 120V grounded outlet. Electrical receptacle must be located in cabinet above Spacemaker microwave/convection and Spacemaker microwave ovens. No additional wiring, venting or cabinet rebuilding necessary in many cases. Complete detailed, easy-to-follow installation instructions and convenient full-size templates are packed with product

Important: When installing these overs over a range, allow minimum of 2" from bottom of microwave oven to top of range backguard to allow for removal of light covers.

### **Optional accessories** (sold separately)

Filler panel kit See below for part numbers. When replacing a 36" range hood, this kit fills in the additional width to provide a custom built-in appearance. For installation between cabinets only; not for end-of-cabinet installation. Each kit contains two 3"-wide filler panels.

### Built-in trim kit for 1.0 cu. ft. microwave ovens

Built-in trim kits allow installation in a wall, cabinet alone, or over a 27" GE electric wall oven. This kit should not be installed over a gas wall oven. Do not install microwave lower than 36" above the floor.

### 27" deluxe trim kits for models PEM31 and JEM25

B - Overlap of trim kit over bottom of cabinet	1-1/4"
C - Overlap of trim kit over sides of cabinet	1-1/4"

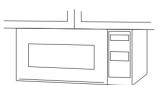

This information is not intended to be used for installing unit described.

Before installing, consult installation instructions packed with product/kit for current dimensional data.

### Undercabinet mounting kit (Part No. JXA019K) for Spacemaker II and microwave oven Models PEM31, JEM25 and JE740 (sold separately)

Not to be used over a thermal oven.

### Undercabinet Installation

Install Spacemaker II microwave ovens in just a few easy steps with the mounting template, which provides all the necessary measurements. These microwave ovens can be installed on practically any wood or metal cabinets. Installation may vary depending on cabinets.

Note: 120V, 60-cycle, grounded power receptacle location optional on back within cabinet opening.

### 30" deluxe trim kit for 2.0 or 1.8 cu. ft. microwave ovens

This trim kit allows for built-in installation of the 2.0 or 1.8 microwave oven in a wall or cabinet alone, or over a GE Profile 30" single electric wall oven. Do not install microwave lower than 36" above the floor.

### 30" deluxe trim kits for models PEB2060 or JEB1860

GE Café and GE Profile built-in dishwasher dimensionsexcluding PDWT502VII/ PDWT302VII (in inches)

###Add 1/2" for deepest part of contour door. Allow an additional 2" for the handle on PDWT580/PDWT500 and PDWT480 model. ‡‡Allow an additional 2.525" for the handle on CDWT980VSS Series models.

GE Profile built-in dishwasher dimensions-PDWT502VII/ PDWT302VII (in inches)

#### Add 3/4" for custom panel and additional room for custom handle.

Note: Custom panels are required for model PDWT502VII/PDWT302VII. See page 272 for details.

### GE Café and GE Profile dishwasher electrical rating

Voltage	.120
Hertz	60
Total connected load amperage	9.1
Calrod heater watts max	.875
For use on adequately wired 120-volt, 15-amp circuit having 2-wire service with a separate ground wire. This appliance must be grounded safe operation.	for

\*In accordance with CEE specifications for residential distinguises in a series of the series of the

See page 272 for rough-in information.

### Electrical rating

Voltage	120
Hertz	60
Total connected load	
amperage	10
Calrod heater watts ma	x875

For use on adequately wired For use on adequately wired 120-volt, 15-amp circuit having 2-wire service with a separate ground wire. This appliance must be grounded for safe operation.

### GLDA696/GLDA690/ GLDT696/GLDT690 electrical rating

Voltage AC120	
Hertz60	
Total connected load	
amperage9.1	
Calrod heater watts max875	

For use on adequately wired 120-volt, 15-amp circuit having 2-wire service with a separate ground wire. This appliance must be grounded for safe operation.

### \*\*Based on DOE test procedure, ANSI/AHAM DW-1

### Figure 1

### Dishwasher rough-in information

Note: Dishwasher must not be installed more than ten feet from sink for proper drainage. All plumbing and electrical work must be in accordance with local codes.

Dishwasher Counterto

Most of the installation work should be done before the dishwasher is moved into place. First, select a location as close to the sink as possible for ready access to water and drain lines. For proper operation and appearance of the dishwasher, the cabinet opening should be square and have dimensions as shown in Figure 1. If the dishwasher is to be installed in a corner, there must be sufficient clearance to open the door as shown in Figure 2. A minimum clearance d. 2° is recommended.

Rough-in the water, electrical, and drain lines before proceeding with installation. The lines should run straight to their connections on the dishwasher.

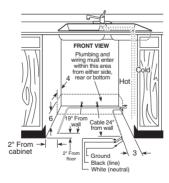

Note: Make sure that the lines do not cross in front of the dishwasher motor or its legs.

Note: Under-the-sink dishwash under GE cooktop models JP25	

under GE cooktop models JP256, JP201C and JP202D. Refer to cooktop installation instructions.

# Plumbing/electrical rough-in (in inches)

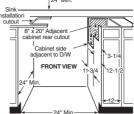

**Plumbing:** Hot Water Only: Use 3/8" O.D. copper tubing min. inlet line. Water valve has 3/8" internal threads. Hand cut-off valve is recommended.

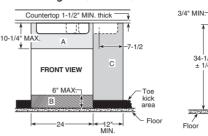

Electrical: Fuse circuit with 15 amp or 20 amp standard fuse or circuit breaker. Total amp load is 6.2. Dishwasher operates on 120V, 60 Hz power. Two-wire cable (14 ga. min.) with ground must be installed.

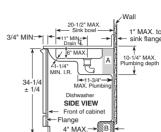

Note: All rough-in, both plumbing and electrical, must be completed before the dishwasher is installed. All plumbing and electrical work must be in accordance with local codes.

**Specifications:** Inlet Water Temperature Recommended: Minimum 120°F at dishwasher. Inlet Water Pressure Required: 15 to 120 lbs./sq. in. Cabinet cutout for sink (in inches)

### Cabinet rough-in (in inches)

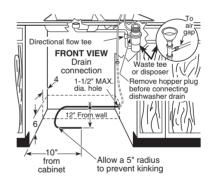

\_\_\_\_24" \_\_\_\_ min. cabinet

Cabinet cutouts for offset single- and double-

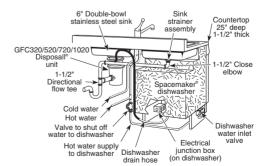

bowl sinks. Dishwasher not provided with complete enclosure. Enclosures for sides, top, bottom, and back must be provided by installer at time of installation.

Either single- or double-bowl sink may be used, centered or offset, as shown in the front illustration above. The  $20-1/2^{"}$  max. dimension from wall to front of sink bowl must be accurate if dishwasher is to fit properly under sink. Water lines to sink faucet and drain from sink can be run through area "A". HOT WATER line to dishwasher is installed in area "B". Garbage disposer, water lines to faucet, trap, waste air gap and water cut-off valve are installed in 12" wide cabinet shown in area "C". Sink opening for garbage disposer must be dimensioned as shown in front view, area "C" above (7-1/2"). This will provide clearance for disposer and plumbing in cabinet "C" when using double-bowl sink. If the sink bowl is more than  $20-1/2^{"}$  max. specified distance from the wall, or if the base cabinet is less than the  $24^{"}$  min. depth from the wall, a gap between the tub front flange and the front of the base cabinet may result.

### Rough-in for installation with disposer (in inches)

### Rear view plumbing arrangement (in inches)

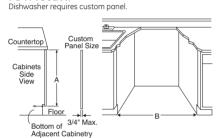

A close-fitting elbow or special shallow sink strainer is necessary to provide clearance between sink drain and dishwasher. Dishwasher furnished with 1/2" I.D. drain hose, 78" long. If using copper tubing, 2" length of 1/2" I.D. rubber hose must be provided to connect copper tubing to pump outlet. Disposer should have 7/8" I.D. dishwasher drain connector.

# Custom panel information Custom panel for model PDWT502VII/

PDWT302VII

# The most common panel dimensions are 30-1/4"H and 23-3/4"W.

### STEP A: Determine custom panel height

 Measure Dimension A from underside of countertop to bottom of adjacent cabinets.
 Subtract 1/4". This allows a 1/4" clearance gap between the

underside of the countertop and the top of the dishwasher door. Height is equal to A minus 1/4"

### STEP B: Determine custom panel width

Measure dimension B, the rough opening width.
 Subtract 1/4" for clearance (1/8" on each side).

Width is equal to B minus 1/4" **Note:** The panel height must be between 30-1/16" and 30-1/4". If the panel height is more than 30-1/4" it will prevent the door from swinging open. If the panel height is less than 30-1/16" it will not even the discussion of the panel height is less than 30-1/16" it will not

cover the dishwasher door frame. A panel template, Pub. No. 031-305691, is boxed with each dishwasher or is also available at additional cost. Contact your local appliance dealer to order.

### Custom Panel Size Requirements for Model PDW1800NII Height

Panel height should be 26-25/32" (68 cm)

• The top of the custom panel must be flush with the top of the door. The  $\frac{1}{2}$  minimum gap between the top of the door and the bottom of the countertop must be maintained.

### Width

272

Panel width must be 17-1/2" (44.4 cm).

• If the panel width is less than 17-1/2", it will not cover the dishwasher frame.

IMPORTANT: To ensure optimum door balance performance, the custom panel must not weigh more than 8 lbs.

# Installation information

### Dishwasher rough-in information

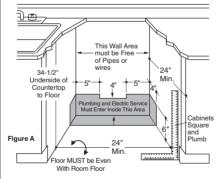

**Note:** Dishwasher must not be installed more than ten feet from sink for proper drainage. All plumbing and electrical work must be in accordance with local codes.

**Note:** If a flush look is needed, a 25" base cabinet needs to be used. (Except Profile Models).

The power cord and connections must comply with the National Electrical Code Section 422 and/or local codes and ordinances. The cord must be no longer than six feet from the junction box to the receptacle.

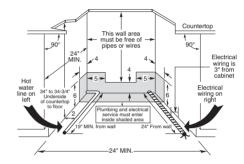

# GE<sup>®</sup> dishwashers installation information (in inches)

 The rough cabinet opening must be at least 24" deep, 24" wide and approximately 34-1/2" high from floor to underside of the countertop.

# GE Profile<sup>™</sup> dishwashers installation information (in inches)

# GLDA690/696 and GLDT690/696 installation information (in inches)

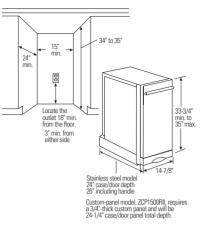

• The rough cabinet opening must be at least 24" deep, 24" wide and approximately 32-1/2" to 34-3/4" high from floor to underside of the countertop.

GE Profile frontload dryer

\*WW = White on white, MG = Champagne.

### Dryer specifications

### Exhaust options:

**Electric:** 4-way via rear, right, left and bottom.

Gas: For 7.5 cu. ft. dryers, when viewed from the front of the unit, exhaust 3-way via rear, left and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

### Circuit requirements:

**Electric:** An individual, properly grounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse is required.

### Electric dryer rating:

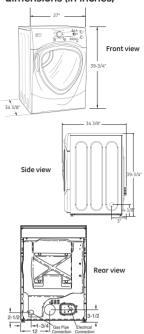

240V, 5600W, 24A, 60Hz—7.5 cu. ft. dryers 208V, 4400W, 22A, 60Hz—7.0 cu. ft. dryers

**Gas:** An individual, properly grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15- or 20-amp circuit breaker or a time-delay fuse is required.

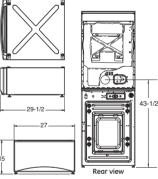

### NEMA receptacle codes:

3-prong dryer cord/30A/4' long (cat #WX9X2) is for NEMA10-30R receptacle 4-prong dryer cord/30A/4' long (cat #WX9X18) is for NEMA14-30R receptacle

### Frontload dryer dimensions (in inches)

# Storage pedestal dimensions (in inches)

For 4.3 cu. ft. GE Profile frontload washers and 7.5 cu. ft. GE Profile frontload dryers. SPSD157JWW-White SPSD157JMG-Champagne

# **Gas dryer electric rating:** 120V, 60Hz, 6A

Gas (BTU/HR): 22,000 for 7.5 cu. ft. dryers. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires an optional conversion kit: 7.5 cu. ft. model kit is WE25M46. Have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Note: An extra-length (10 ft.) communication cable, Pub. No. 14-A013 is available for 7.5 cu. ft. dryers.

**Dryer note:** Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

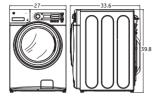

### Stacked installation

Brackets for stacking dryers PFDS450EL/GL, PFDS455EL/GL are available at additional cost. Order part no. WE25X10028 or GEFLSTACK.

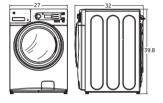

for residential clothes washers (effective 1/1/2011). †WW = White on white, MG = Champagne.

### Drver specifications Exhaust options:

Electric: 4-way via rear, right, left and bottom.

Gas: For 7.1 and 7.3 cu. ft. dryers, when viewed from the front of the unit. exhaust 3-way via rear. left and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

Circuit requirements:

Electric: An individual, properly arounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse is required.

### Electric dryer rating:

240V. 6000W. 28.5A. 60Hz—7.3 cu. ft. dryers 240V, 5600W, 24A, 60Hz-7.1, 7.5 cu. ft. dryers 208V, 4400W, 22A, 60Hz-7.1, 7.5 cu. ft. dryers Gas: An individual, properly grounded branch circuit, with a three-prong grounding-type

receptacle, protected by a 15- or 20-amp circuit breaker or a time-delay fuse is required.

NEMA receptacle codes: 3-prong dryer cord/30A/4' long (cat #WX9X2) is for NEMA10-30R receptacle

4-prong dryer cord/30A/4' long (cat #WX9X18) is for NEMA14-30R receptacle

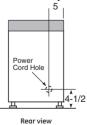

### Gas dryer electric rating: 120V, 60Hz, 6A

Gas (BTU/HR): 22,000 for 7.1 cu. ft. dryers and 25,000 for 7.3 cu. ft. dryers. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires an optional conversion kit: 7.1 cu. ft. model kit is WE25X0217; and 7.3 cu. ft. model kits are WE25X10026 (available through parts only). Have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Dryer note: Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

Important note: To convert a 7.3 cu. ft. dryer from rear exhaust to bottom or side venting, Part WE25X10015 is required.

### **Power cord locations** 7.3 cu. ft. dryers

### Washer dimensions (in inches)

### Washer specifications

Circuit requirements: An individual, properly grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15- or 20-amp circuit breaker or time-delay fuse is required.

Electrical rating: 115V, 60Hz, 10A

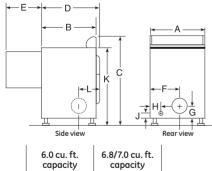

Washer note: Washer wall outlet must be located within 36" of service cord entry. Wall outlet must not be located behind dryer.

### **Power cord locations** 6.0, 6.8 and 7.0 cu. ft. dryers

### **Dryer specifications**

### **Exhaust options:**

Electric: 4-way via rear, right, left and bottom. Gas: For 6.0 and 7.0 cu, ft. dryers, when viewed from the front of the unit, exhaust 3-way via rear, left and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

### Circuit requirements:

Electric: An individual, properly grounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse is required.

### Electric dryer rating:

240V, 5600W, 24A, 60Hz-6.0 and 7.0 cu. ft. dryers

208V, 4400W, 22A, 60Hz-6.0 and 7.0 cu. ft. dryers

Gas: An individual, properly grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15- or 20-amp circuit breaker or a time-delay fuse is required.

### Gas dryer electric rating:

### 120V, 60Hz, 6A

Gas (BTU/HR): 22,000 for 6.0 and 7.0 cu. ft. dryers. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires an optional conversion kit: 6.0 and 7.0 cu. ft. model kit is WE25X0217. 7.3 cu. ft. model kits are WE25X1006. Have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Dryer note: Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

### geappliances.com

# Special installation requirements

### Alcove or closet installation

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer MUST be exhausted to the outdoors. See
- installation instructions.Minimum clearances between dryer cabinet and adjacent walls or other surfaces are:
- 0" either side
- 3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc., is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- No other fuel-burning appliance shall be installed in the same closet with a gas dryer.
- The closet should be vented to the outdoors to prevent gas pocketing in case of a gas leak in the supply line.

### Bathroom or bedroom installation

- The dryer MUST be exhausted to the outdoors. See installation instructions.
- The installation must conform with the local codes, or in the absence of local codes, with the National Electric Code, NFPA70, and National Fuel Gas Code, NFPA54 for gas dryers.

# Minimum clearances other than alcove or closet installations

- Minimum clearances to combustible surfaces
   0" both sides
- 3" rear

### Side or bottom exhaust

• For 7.3 cu. ft. models, order part WE25X10015

# Dryer exhausting information—use metal duct only vertical and horizontal ducting

DSKS433EB DSKS333EC DSKP333EC	0 1 2	46 ft. 38 ft. 31 ft.	37 ft. 30 ft. 22 ft.

• For 7.5, 7.0 or 6.0 cu. ft. models, see installation instructions

 Unitized models do not require a kit for side venting.
 For more information on venting kits and accessories, please call 1-800-GE-CARES.

# Dryer exhausting information

For complete information see installation instructions packed with dryer.

Important note: To convert a 7.3 cu. ft. dryer from rear exhaust to bottom or side venting, part WE25X10015 is required. 6.0 cu. ft. and 7.0, 7.5 cu. ft. dryers require additional parts to convert to side venting. GTUP240EM/GM does not require a kit for side venting.

### **Ducting materials**

For best performance, this dryer should be vented with 4" diameter all-rigid metal exhaust duct. If rigid metal duct cannot be used, then UL listed flexible metal (semi-rigid) ducting can be used (Kit PM08X10084). In special installations, it may be necessary to connect the dryer to the house vent using a flexible metal (foil-type) duct. A UL listed flexible metal (foil-type) duct. A UL listed flexible metal (foil-type) duct. A UL listed semi-rigid) ducting cannot be used ONLY in installations where rigid metal or flexible metal (semi-rigid) ducting cannot be used AND where a 4" diameter can be maintained throughout the entire length of the transition duct. Please see installation instructions packed with your dryer for complete instructions when using flexible metal (foil type) ducting.

### Exhaust length calculation:

- 1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
- The maximum length of 4" rigid (aluminum or galvanized) duct which can be tolerated is shown in the table.
   A turn of 45° or less may be ignored.

Two 45° turns within the duct length should be treated as a 90° elbow.

A turn over 45° should be treated as a 90° elbow. Dryers **must** be exhausted to the outside.

Caution: For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down.

# Special installation requirements for frontload models

### Stacked installation

- Brackets for stacking dryers, PFDS450EL/GL, PFDS455EL/GL and GFDN110EL/GL are available at additional cost. Order part no. WE25X10028 or GEFLSTACK.
- Brackets for stacking dryer, DCVH480EK is available at
   additional part. Order CE2(CTACK
- additional cost. Order GE24STACK.
- Custom under-counter installation template

  Order Pub. No. 14-A025 for models GFWN1100L, GFDN110EL/GL.

### Alcove or closet installation

- If your dryer is approved for installation in an alcove
- or closet, it will be stated on a label on the dryer back. • The dryer MUST be exhausted to the outdoors with
- Ine aryer MUST be exhausted to the outdoors the exception of a condensing dryer.
   See EXHAUST INFORMATION above and on pages 278 and 280.
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are: 0" either side
  - 3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc., is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- No other fuel-burning appliance shall be installed in the same closet with a gas dryer.

### Bathroom or bedroom installation

- The dryer MUST be exhausted to the outdoors with the exception of a condensing dryer. See EXHAUST INFORMATION above and on pages 278 and 280.
- The installation must conform with the local codes, or in the absence of local codes, with the National Fuel Gas Code, ANSI Z223.

# Minimum clearances other than alcove or closet installations

\*Condensate tube must be directed into a drain below 36" from floor, or a condensate drain pump (not included) is required.

\*\*See written warranty for details.

**Note:** This unit is designed for any common indoor installation including: garage, closet, utility room, attic etc. With the installation of a louvered door, it can be installed in rooms smaller than 10' x 10' x 7' (700 cu. ft.). Please consult installation instructions for details. The GeoSpring 2 water heater produces sound during heat pump operation due to the operation of the evaporator fans. This may be different from standard electric water heater ers which may not make sound.

### Front & back clearance requirements:

A 7" clearance is recommended with a minimum of 5-1/2" air space between any object and the front and back of the water heater and 7" on each side. Clearance is needed to allow for removal of the front and back covers in the event service is needed.

# $\begin{array}{c} 5^{-1/2^{\circ}} \\ 14 \text{ cm} \end{array}$

### Top filter removal clearance requirements

A minimum 6" clearance is required at the top of the water heater to pull the filter up and remove it for cleaning. It is critical that the hot and cold water plumbing and the electrical connections **do not** interfere with the removal of the filter.

### Condensate drain required

A primary drain pipe must be installed at the top right side of the water heater. The primary drain is intended to carry all condensate away.

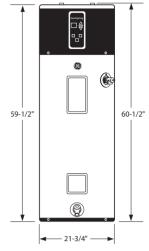

# Dimensions and Installation Information (in inches)

### Local Installation Regulations

This water heater must be installed in accordance with these instructions, local codes, utility codes, utility company requirements or, in the absence of local codes, the latest edition of the National Electrical Code. It is available from some local libraries or can be purchased from the National Fire Prevention Association, Batterymarch Park, Quincy, MA 02169 as booklet ANS/NFPA 70.

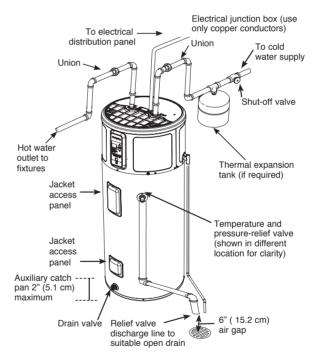

Note: Place the water heater in such a manner that the air filter, cover and front panels can be removed to permit inspection and servicing, such as removal of elements or cleaning of the filter. The water heater and water lines should be protected from freezing temperatures and high-corrosive atmospheres. Do not install the water heater in outdoor, unprotected areas.

### Typical installation

### Water Supply Connections

Refer to the illustration below for suggested typical installation. The installation of unions or flexible copper connectors is recommended on the hot and cold water connections so that the water heater may be easily disconnected for servicing if necessary. The HOT and COLD water connections are clearly marked and are 3/4" NPT on all models.

**Note:** Install a shut-off valve in the cold water line near the water heater. This will enable easier service or maintenance of the unit later.

**IMPORTANT:** Do not apply heat to the HOT or COLD water connections. If sweat connections are used, sweat tubing to adapter before fitting the adapter to the cold water connections on heater. Any heat applied to the hot or cold water connection will permanently damage the dip tube.

### Dehumidifier warranty

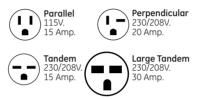

One-Year Limited Product Replacement Warranty. See written warranty for details.

### Wall case dimensions

D = Distance from front of case to side louvers (excluding grille). **Note:** When installing slide-out chassis units in through-the-wall applications, keep louvers free. Do not restrict airflow areas. Fixed-chassis units are not suitable for through-the-wall applications.

### Wall outlets

### Wall Outlets

All wiring, including installation of receptacle, must be made in accordance with local electrical codes and regulations. Electrical outlet should be in reach of line cord.

**Note:** Aluminum building wiring may pose special problems—consult a qualified electrician.

### Air conditioner tips

Airflow–Keep air filters clean. Do not block airflow areas.

**Roomside view**–J-models feature concealed power cord storage; this eliminates excessive cord exposure when receptacle is located close to unit.

### Accessories

Other accessories are available—they include: Fedders and Whirlpool sleeve adapters; drain kits and chassis adapters for old Hotpoint cases.

# Built-in room air conditioners wall opening for RAB46A/47A/48A cases

A finished opening of  $26-1/8" \times 15-3/4"$ , clear of intrusions, is required. Keep clearance of 4" from side walls. Brick veneer or frame walls should have wood studding surrounding case to provide firm anchoring with screws. Case can be fastened directly to brick or block walls with screws sunk in lead expansion shields.

Note: Units should be caulked on all four sides of case to the building exterior to assure building integrity.

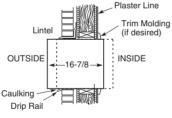

with mortar Brick Block and Brick or insulation Frame Construction

Make frame if desired or caulk

Frame Construction

Flexible Mounting Position

### Wall outlets

All wiring, including installation of receptacle, must be made in accordance with local electrical codes and regulations. Electrical outlet should be in reach of line cord.

Note: Aluminum wiring may pose special problems—consult a qualified electrician.

Note: Some models may not be available in your area due to local legislation. Contact your local dealer.

Note: When installing slide-out chassis units in through-the-wall applications, keep louvers free. Do not restrict airflow areas. Fixed-chassis units are not suitable for through-the-wall applications.

### Two wall cases for tenant option installation

When the air conditioner is offered as a tenant option, these wall cases provide protection against outside elements.

RAB47A-includes wall case, exterior grille and steel closure panels.

RAB48A—includes wall case, exterior grille, steel closure panel and two layers of insulation.

### Standard wall case RAB46A

Solid-sided wall case fabricated of galvanized steel with baked-enamel finish. Welded areas are coated with a sealing compound to help resist rust and corrosion. Polymer gasket surrounds opening to assure tight weather seal. Aluminum grille (RAG13) is included. Panels on interior and between case and grille provide weather protection prior to installation of chassis.

### AHAM Underwriters Laboratories

### Total capacity and E.E.R. ratings are calculated based on the Association of Home Appliance Manufacturers' standards.

### Built-in air conditioner warranty

Listed by

One-Year Limited Warranty on entire unit. In-home service. Parts and labor included. Five-Year Limited Warranty on sealed refrigerating system. In-home service. Parts and labor included. See written warranty for details.

Above illustrations intended for dimensional reference only. Refer to photography for actual product appearance.
