

INSTALLATION INSTRUCTIONS FOR FILLER PANEL KITS JX48AL, JX48BL, JX48CT, JX48WH

FOR 36" INSTALLATIONS:

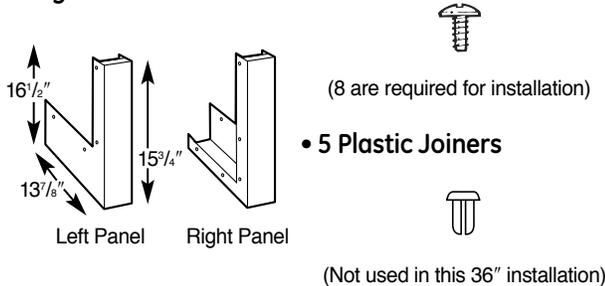

NOTE: For 36" installations you will require 1 Filler Panel Kit.

TOOL YOU WILL NEED

- Phillips screwdriver

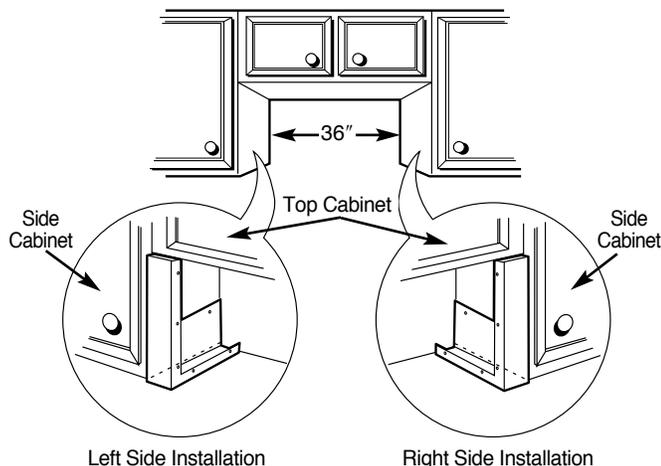

PARTS INCLUDED

- 1 Left Filler Panel
- 1 Right Filler Panel
- 10 Phillips Head Screws

INSTRUCTIONS

1. Place the left panel against the side of the left side cabinet and push it up against the bottom of the top cabinet and back against the back wall. The panel will protrude out slightly from the front face of the cabinet so that it will line up with the case on the microwave oven when it is installed.
2. Mount the panel to the left side cabinet using 4 screws.
3. Repeat the above steps for the right panel on the right side cabinet.
4. Refer to microwave oven installation instructions to complete the installation procedure.

FOR 42" INSTALLATIONS:

NOTE: Two Filler Panel Kits will be required for a 42" installation.

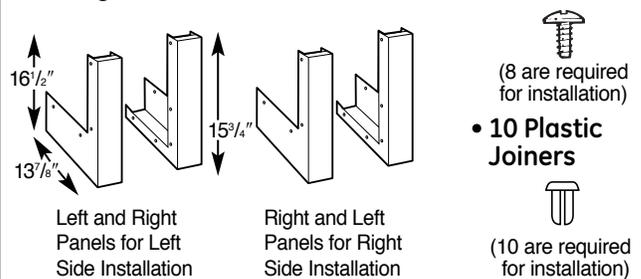

CAUTION: When installing the 42" configuration, this unit should not be installed over a cooking appliance greater than 36" wide.

TOOL YOU WILL NEED

- Phillips screwdriver

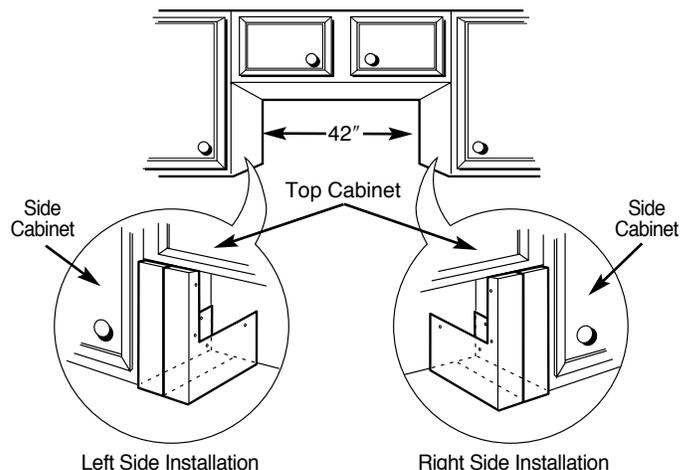

PARTS INCLUDED (from 2 kits)

- 2 Left Filler Panels
- 2 Right Filler Panels
- 20 Phillips Head Screws

INSTRUCTIONS

1. Using five plastic joiners, attach a left and a right panel together.
2. Place the attached panels against the side of the left side cabinet and push them up against the bottom of the top cabinet and back against the back wall. The attached panels will protrude out slightly from the front face of the cabinet so that they will line up with the case on the microwave oven when it is installed.
3. Mount the attached panels to the left side cabinet using 4 screws.
4. Repeat the above steps for the right side cabinet.
5. Refer to microwave oven installation instructions to complete the installation procedure.
