Rough-In Dimensions and Installation Information (in inches)

Installation Tips to Maximize the Built-In Look

- All wall/floor molding should be removed prior to installation.

- Water recess on rear wall recommended to prevent water line damage. 48" minimum length, 1/4" diameter water line tubing recommended.

- When possible, recess both copper water line and electrical outlet. (See local codes)

- Front and rear leveling legs are adjustable for the built-in look. (See owner's manual)

*The rough-in dimensions of 70" for 23 cu. ft. models and 72-1/2" for 25 cu. ft. models are minimum and measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/4") to height of opening for 23 cu. ft. models and 1/8" (72-5/8") for 25 cu. ft. models to allow for additional clearance between the cabinet doors and the top of refrigerator trim when the cabinet doors are in open position.
