# ELECTRIC RANGE

## LG Design

This range is comprised with an abundance of stainless steel for a striking presentation. The stainless steel backsplash, control panel, cooktop surface, door and handle all add to the contemporary and modern look.

## Spacious 5.6 cu.ft. Capacity

Cooking for a full house is no longer a tight squeeze with LG's 5.6 cu.ft. electric range. Not only can you cook a large turkey, but you'll have room for biscuits and a casserole too. The elegant blue interior complements the exterior styling and gives your range a more premium look.

## Convection System

Fan and heating element deliver a faster preheat time\* and insures even heat distribution for uniform baking.

## IntuiTouch™ Control System

Easy to use and easy to clean, the IntuiTouch™ Control System makes operating your range a snap. The left side of the panel mirrors the cooktop elements, while the right side controls the oven functions.

## Warming Drawer

While preparing the rest of your meal, the warming drawer can be used to keep already cooked foods at serving temperature. With 5 heat settings, you can warm everything from rolls to pork chops so they can be served hot and fresh.

\* Based on testing results comparing standard LG convection range to the dual convection range (325°F) mode.
