PREPARING CABINET OPENING

- This dishwasher is designed to fit a standard dishwasher opening. An opening may be needed on both sides to route plumbing and electrical connections.
- To ensure proper drainage, install the dishwasher no more than 12 ft. (3.65 m) from the sink
- The location must have sufficient space for the dishwasher door to open easily and provide at least 0.1" (2 mm) between the dishwasher and the cabinet sides.
- If installing the dishwasher in a corner, leave a minimum of 2" (50 mm) between the dishwasher and the adjacent wall.
- The adjacent wall must be free of obstructions.
- For flush installations only, you may remove the cabinet brace inside the cabinet.

Choosing the Proper Location

- Select a location as close to the sink as possible for easy connections to water supply line, drain hose and electrical connection.
- To allow for proper clearance of plumbing and electrical, use the template included with the literature to determine the clearance on the side of the cabinet where the cabinet meets the back wall. Using a 2 1/2" diameter hole saw, drill a hole in the target area as shown on the template

WARNING

- Installation damage is not covered by the warranty, and leaks caused by improper installation may result in property damage.
- Do not use existing holes unless they are in the target area.
- Failure to properly locate the hole for the water and drain lines may prevent the dishwasher from installing flush with the cabinets and could result in kinked, pinched, crushed, stressed or damaged lines.

PREPARING WATER AND ELECTRICAL CONNECTIONS

WARNING

Water Connection

Do not reuse an old hose. Use only a new hose when installing the dishwasher. The old hose could leak or burst causing flooding and property damage. Contact an LG Customer Information Center for assistance in buying a new hose.

Electrical Connection

- Use a time-delay fuse or circuit breaker.
- Operate this appliance with the correct voltage as shown in this manual and on the rating plate
- The wiring must be grounded properly. If in doubt, have it checked by a qualified
- The appliance and outlet must be positioned so that the plug is easily accessible.
- Do not use an extension cable or adapter with this dishwasher.
- Do not overload the outlet with more than oneappliance.
- It is the personal responsibility and obligation of the product owner to have a proper outlet installed by a qualified electrician.

CAUTION

- When connecting the dishwasher water supply line to the house water supply, sealing tape or compound should be used on pipe threads to avoid leaks. Tape or compound should not be used on compression fittings.
- Connect the dishwasher to a hot water supply with a temperature range between 120 °F (49 °C) and 149 °F (65 °C). This temperature range provides the best washing results and shortest cycle time. To prevent damage to dishes, the temperature should not exceed 149 °F (65 °C).
- Water supply pressure must be between 20 psi and 80 psi (140-550 kPa). If the water supply pressure exceeds 80 psi, a pressure reducing valve must be installed. Otherwise premature failure of the inlet valve may occur.

CHECKING THE CABINET PANEL

- This dishwasher is designed to work with a cabinet front panel (not provided) which slides up as the door is opened. Before installing the dishwasher, check the weight and dimensions of the cabinet front panel you have selected.
- The dishwasher can support panels weighing 5.5 - 24.2 lb (2.5 - 11 kg)
- If the cabinet panel weighs between 17.6 lb (8 kg) and $\overset{\cdot}{2}$ 4.2 lb ($\overset{\cdot}{1}$ kg), adjust the door spring tension to make the door easier to open. See the Adjusting Door Spring Tension topic in the Owners Manual.
- For best results, the width of the wood panel should be 1/4" (6 mm) less than the width of the cabinet.

Installing Fleece Tape

- Attaching fleece tape between the dishwasher door and the cabinet panel will reduce the friction when the door slides up and down.
- Install the fleece tape close to the bracket openings to make sure the door slides smoothly.
- Peel the fleece tape strips off the carrier and attach them to the door
