Infrared Grill

ELECTRIC RANGE

Cook Faster

With Infrared Grill, the infrared heating element gets your oven to broil temperature more quickly and takes 20% off your cooking time on common items like steaks and chicken breasts. Infrared cooking – which uses the same technology as premium outdoor grills – also allows your food to be juicier than traditional thermal cooking.

Expand Your Options

The size of your oven shouldn't dictate what you can cook or for how many people. This Large-Capacity Oven gives you more space so you have the flexibility to cook more dishes at the same time. One of the largest oven capacities available at 6.3 cu.ft.

Boil Faster

LG's fastest boiling element offers the most powerful element in the market at 3200 watts*.

*among leading brands, non-induction elements

Bake and Roast Like a Pro

Great cooking takes time, but at least with this oven it takes less time. The True Convection Oven lets you pre-heat faster and provides even baking and roasting for delicious results.

Keep It Warm

With three temperature settings, the warming drawer keeps your food hot and delicious until you're ready to serve.

The Smart Touch

Easy to use and easy to clean, the IntuiTouch™ Control System makes operating your range a snap. The left side of the panel mirrors the cooktop elements, while the right side controls the oven functions.
