4	REFRIGERATORS
46	COOKING
112	DISHWASHERS
120	LAUNDRY
172	VACUUMS
184	GLOSSARY
186	WARRANTY

Elevate your kitchen with style and innovation. Keep every day foods at eye level. Available in 3 and 4-Door models.

SUPER CAPACITY

With the largest capacity for standard 36" width refrigerator at 31 cubic feet, the LFX31925 can store more food than ever before.*

*Standard width French Door Refrigerator, excludes other LG manufactured products.

SLIM SPACEPLUS™ ICE SYSTEM

Ice makers are great, but not if it means you can't fit all of your food in the fridge. The Slim SpacePlus™ Ice System provides maximum shelf space and allows even more space for door bins.

Linear
Compressor

10-YEAR WARRANTY ON LINEAR COMPRESSOR

The Linear Compressor motor uses fewer moving parts and operates more efficiently. LG confidently backs this exclusive technology with a 10-year warranty.

SMART
DIAGNOSIS™

SMARTDIAGNOSIS™ TECHNOLOGY

It's unlikely you would experience any problems with your LG refrigerator, however, this may eliminate a service call, saving you both time and money.

SMART COOLING PLUS SYSTEM

Smart Cooling Plus technology maintains optimal humidity and temperature levels so your food stays fresher, longer. Digital sensors constantly monitor conditions within the refrigerator, while the Linear Compressor reacts quickly to help keep humidity and temperature at a level that's best to keep your food fresh. Meanwhile, a Fresh Air Filter, Dual Evaporator for freshness and Multi-Air Flow Technology design means strategically-placed vents in every section surround your food with cool, fresh air no matter where you put it. (select models)

ENERGY STAR RATED

When your refrigerator uses at least 20% less energy than required by federal standards, you're going to make an impact—on your energy bill, your energy consumption, and most importantly, the environment.

Two separate full-length compartments side-by-side. Fresh foods go in the refrigerator on the right side, and a tall freezer is on the left.

SOPHISTICATED STYLE AND PERFORMANCE

Contoured doors, hidden hinges, and a host of great interior features give your refrigerator a look as sophisticated as it is functional.

TALL ICE & WATER DISPENSING SYSTEM

The dispenser is over 12" tall, with an easy access water tap and slide out pitcher rest making it easy to fill most pitchers and glasses.

Linear
Compressor

10-YEAR WARRANTY ON LINEAR COMPRESSOR

The Linear Compressor motor uses fewer moving parts and operates more efficiently. LG confidently backs this exclusive technology with a 10-year warranty.

SPACEPLUS™ ICE SYSTEM

LG's SpacePlus™ Ice System is located on the inside door freeing up valuable space in the fresh food shelf compartments.
(on select models)

BOTTOM FREEZER REFRIGERATORS

With full-swing doors, the refrigerator goes on top so the foods you use every day are easily accessible. Your frozen foods go below. Available with either a pull-drawer or a swing-door freezer section.

EASY ACCESS

By keeping the freezer on the bottom, LG refrigerators give you easy, eye-level access to all of your favorite fresh foods.

DESIGN-A-DOOR

Our unique flexible shelving system allows you to slide the door bins horizontally and vertically for flexible organization. The shelves are also dishwasher safe for easy cleaning.

ICEPLUS™

Provides accelerated freezing for up to 24 hours to produce 6 lbs. of ice (4.5 lbs. without IcePlus™) and lock-in freshness of all your frozen foods.

ELECTRONIC TEMPERATURE CONTROLS

Provides precise temperature control in the refrigerator and freezer compartments. Located up front, the electronic temperature controls are easy to reach and adjust. There are two temperature adjusters controlling the refrigerator and freezer compartments separately.

ENERGY STAR RATED

When your refrigerator uses at least 20% less energy than required by federal standards, you're going to make an impact—on your energy bill, your energy consumption, and most importantly, the environment.

The most traditional door style features the freezer section on top, full-width swing doors, and – of course – LG's refined approach to design.

SOPHISTICATED STYLE AND PERFORMANCE

Contoured doors, premium finishes, and a host of great interior features give your refrigerator a look as sophisticated as it is functional.

ELECTRONIC TEMPERATURE CONTROLS

Provides precise temperature control in the refrigerator and the freezer compartments. Located up front, the electronic temperature controls are easy to reach and adjust. There are two temperature adjusters controlling the refrigerator and freezer compartments separately.

HUMIDITY CRISPERS

LG's Top Freezer Refrigerator features two humidity controlled crispers that aid in maintaining the freshness of your fruits and vegetables. Consumers have the option to separate and store highly perishable produce in more optimal settings.

ENERGY STAR RATED

When your refrigerator uses at least 20% less energy than required by federal standards, you're going to make an impact—on your energy bill, your energy consumption, and most importantly, the environment.

LG has taken cooking to the next level by perfecting the way you cook. From an array of enhanced features to the look and style, our ranges are a great addition to any kitchen.

LARGE OVEN CAPACITY

With one of the largest oven capacities available, LG's ranges provide more space for cooking large meals.

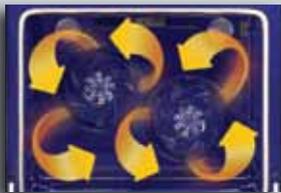

InfraGrill™

INFRAGRILL™ SYSTEM

LG's first infrared heating element gets your oven to broil temperature more quickly and cuts over 20% off your cooking time on common

items like hamburgers and chicken breasts. Infrared cooking – which uses the same technology as premium outdoor grills – also allows your food to be juicier than traditional thermal cooking. (LDE3017)

DUAL TRUE CONVECTION

Two fans combined with two built-in heating elements provides a 30% faster preheat time* with the added benefits of even heat distribution for overall

uniform baking and roasting. (select models)

*Based on testing results comparing a standard LG convection range to the dual convection range (325°F) mode.

LDE3017ST

INTUITOUCH™ CONTROL SYSTEM

Easy to use and easy to clean, the IntuiTouch™ Control System makes operating your range a snap. The left side of the panel mirrors the cooktop elements, while the right side controls the oven functions.

WIDEVIEW™ WINDOW

Allows you to easily check the progress of a meal in the oven without having to open the door.

LG's beautifully designed Gas Ranges feature superior cooking performance and the ultimate in design and technology. LG Gas Ranges are a great addition to any kitchen.

LARGE OVEN CAPACITY

The size of your oven shouldn't dictate what you can cook or for how many people. LG's Large Capacity Ovens give you more space so you have the flexibility to cook more dishes at the same time.

SUPERBOIL™ BURNER

Spend less time waiting and more time cooking. The powerful Superboil™ 17,000 BTU Burner brings water and other liquids to a boil quickly.

CONVECTION COOKING

LG's high-end gas ranges feature the EvenJet™ Convection fan for more even cooking and heating. (select models)

InfraGrill™

INFRAGRILL™ SYSTEM

LG's first infrared heating element gets your oven to broil temperature more quickly. Over 20% faster cooking time on common items like hamburgers and chicken breasts. Infrared cooking – which uses the same technology as premium outdoor grills – also allows your food to be juicier than traditional thermal cooking. (LDG3017)

LDG3017ST

INTUITOUCH™ CONTROLS

IntuiTouch™ display, makes operating your gas range a snap. The left side of the panel mirrors the cook top elements, while the right side controls the oven functions.

EASYSOIL™

LG brings you the next generation of oven cleaning. With the new EasyClean™ Enamel coating, you can have quick and high performance cleaning inside and out without the smell or high temperatures of chemicals or self clean.

WIDEVIEW™ WINDOW

Allows you to easily check the progress of a meal in the oven without having to open the door.

WARMING DRAWER

While preparing the rest of your meal, the warming drawer with 3 heat settings can be used to keep cooked foods at serving temperature. (select models)

LG's premium built-in wall ovens offers the perfect harmony between style and performance. These are beautifully designed combined with features benefiting the chef in you.

STYLE AND DESIGN

Available in a premium Stainless Steel Finish, LG's built-in wall ovens are sleek, modern, and high quality. The distinct door handle and brilliant blue interior bring forth the look of sophistication LG users expect.

LARGE OVEN CAPACITY

The large 4.7 cu.ft. oven capacity is smartly accentuated with a vivid convection glow. The recessed broiler element provides more usable space and a more visually pleasing oven interior.

CRISP CONVECTION

Continually distributes heat precisely so cooked foods such as biscuits, scones or pizza can remain delicious on the inside and crisp on the outside.

4 Mode Convection System

- Crisp Convection
- Convection Bake
- Convection Roast
- Healthier Roast

SELF-CLEANING

Ovens come with a self-cleaning mode that virtually eliminates the need to scrub.

SMOOTHTOUCH™ CONTROLS

Using your oven has never been easier. Intuitive, digital controls allow heat and function adjustments to be made with the touch of a finger.

WIDEVIEW™ WINDOW

Allows you to easily check the progress of a meal in the oven without having to open the door.

6.3" LCD TOUCH SCREEN CONTROL SYSTEM

The intelligent touch screen is highly intuitive and easy to use. Just a touch of a finger controls all cycles and cooking options. (select models)

ST	ST

LG's premium cooktops offer the perfect harmony between style and performance. These sleek, state-of-the-art cooktops have premium looks combined with great features benefiting the chef in you.

RADIANT COOKTOPS

STEADY HEAT ELEMENTS

Steady Heat cooking elements deliver constant heat at any temperature for more precise heat control, and respond quickly to every power setting adjustment.

DUAL & TRIPLE ELEMENTS

LG's premium cooktops offer versatile elements that fit different sized cookware for convenience and even heating.

SMOOTHTOUCH™ CONTROLS

Easy to use with just a touch. At a quick glance of the centralized electronic

controls users can see which heating element is activated and the smooth surface easily wipes clean.

30" INDUCTION COOKTOPS

INDUCTION TECHNOLOGY

Induction technology delivers more efficient cooking times and fast speed-to-boil performance, thus it's more energy efficient. Only the pan is heated, and not the ceramic cooktop surface for a safer cooking environment.

The innovative Induction Bridge Element links the left front and left rear elements together to evenly heat longer pans and griddles. LG is among the few manufacturers with a 100%

Induction Bridge Element on their induction cooktops.

LG's premium cooktops offer the perfect harmony between style and performance. These cooktops offer premium looks combined with features benefiting the chef in you.

STYLE AND DESIGN

Adding to an already premium line, LG's Gas Cooktops continue in the

tradition of premium style and design with intuitive controls and heavy-duty aesthetic nuances. The LG gas cooktop knobs feature blue LED backlighting to keep the user informed of burners that are on or hot. (select models – LCG3091, LCG3691)

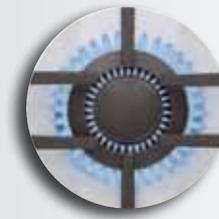

VERSATILITY

With 5 sealed burners and 3 continuous heavy-duty cast iron grates, you have endless cooking options. It is easy to cook with large skillets, woks, soup pots, and even griddles.

HIGH HEAT GOURMET COOKING

LG's premium 30" and 36" Gas Cooktops offer an array of features that any cook would love. Cooks and chefs alike have the opportunity to cook gourmet meals on heat settings that range from 5,000 BTUs for a slight constant simmer to a 19,000 BTU UltraHeat™ center burner.

The UltraHeat™ double-stacked burner is premium in form and function. The unique styling gives the user a visual indication of the high heat cooking.

Always versatile and stylish, LG microwave ovens give you more reasons to use your microwave, with innovative features like Sensor Cook technology, and a low-wattage Melt/Soften setting.

SENSOR COOK

Sensor cooking technology senses humidity levels within the oven and automatically adjusts cooking time and performance to provide optimal heating performance. (select models)

TRUECOOKPLUS™

TrueCookPlus™ is patented technology that does all the calculations for you, ensuring the food cooks safely and to perfection every time. True Cook numbers can be found on leading food distributor's packaging. (select models)

EASYSOFT™ INTERIOR

With the new EasyClean™ interior, you can have quick and high performance cleaning inside and out without using chemicals. (select models)

1400 WATT BAKING OVEN WITH AUTO PIZZA FEATURE

Allows you to both microwave and bake in one appliance. Cook small items like frozen foods, biscuits and cookies without heating a large oven. Automatically adjusts cooking times for fresh or frozen pizzas. (LCSP1110ST)

CHILD LOCKOUT

Enables you to lock the keypad to prevent the oven from being accidentally started.

LG is revolutionizing microwave cooking with the introduction of the first ever Warming Lamp. This innovation allows you to keep entrees warm and ready to serve.

STYLE AND DESIGN

With LG's OTRs, expect the ultimate in premium styling. By adding stylish controls and a hidden venting system, we've elevated our OTRs to a new level of sophistication.

WARMING LAMP

Keep your food warm and ready to serve for up to 90 minutes. The warming lamp uses a radiant heating lamp to keep food warm.

SENSOR COOKING

Eliminate the guesswork in cooking. Humidity-sensing technology determines when food is cooked and automatically turns off the microwave to prevent the over- or under-cooking of meals.

EXTENDA™ VENT

Most over-the-range microwaves only capture smoke from the back burners of a cooktop or range. The Extenda™ Vent from LG covers the entire cooking surface, including the front burners, for better, more complete ventilation in your kitchen. (select models)

ONE TOUCH SETTINGS

Makes it easy to cook and warm a variety of foods – from a cup of coffee to chicken nuggets.

LG's line of dishwashers offer industry leading large capacity with quiet operation, along with remarkably intelligent cleaning performance and outstanding design.

TRUESTEAM™ TECHNOLOGY

LG's SteamDishwashers™ thoroughly clean baked on foods while using less energy than other power scrub methods. TrueSteam™

enhances performance when cleaning fine china and stemware in the SteamDelicate™ cycle. LG uses a TrueSteam™ Generator to produce its steam and then injects it directly into the tub. The gentle power of Steam!

CAPACITY

Every LG dishwasher has a usable capacity of up to 16 place settings* and can fit a variety of large pots, pans, and bowls. The upper racks can accommodate up to 12" dishes and the lower racks can fit up to 14" dishes.

*On the LDF9932, 16 place settings is achieved by removing the Adjustable 3rd Rack.

LODECIBEL™ QUIET OPERATION

With quiet levels ranging from 45dB to 52dB, LG's line of premium dishwashers are some of the quietest on the market. The multiple layers of sound dampening materials and tall stainless steel tub provide for superior insulation.

ADJUSTABLE 3RD RACK

The convenient 3rd rack is perfect for large kitchen utensils and smaller delicate items resulting in more practical capacity. The two maneuverable baskets within the 3rd rack can be clasped together or used separately for customizing the dishwasher's interior space.

SIGNALIGHT™ CYCLE INDICATOR LIGHTS

Featured on select models, the exterior LED lights provide a subtle and simple way to check the cycle status. Blue lights indicate the

wash cycle process, and the final green light glows to show the cycle is complete.

DESIGN-A-RACK™

Provides flexible storage features such as 3-in-1 cutlery baskets and stemware holders. On select models, there are fold down and removable tines for added storage benefits. By allowing you to customize the interior space, you achieve optimum capacity which means fewer loads and less water and energy usage.

LG develops remarkable innovations that deliver the ultimate in High Performance, Energy Efficiency, and Advanced Steam features for superior cleaning performance.

COLDWASH™ COLDWASH™ OPTION

Now using the cold temperature on your washer doesn't mean compromising how clean your clothes are. ColdWash™ uses cold water and enhanced washing motions to penetrate deep into fabrics, giving you cold water savings with warm water performance.

6MOTION™ 6MOTION™ TECHNOLOGY

Get your clothes clean and experience a smarter way to wash with our innovative 6Motion™ Technology. Each wash cycle combines up to 6 different wash motions to provide a revolutionary cleaning experience.

Inverter
Direct Drive

DIRECT DRIVE MOTOR

When you buy a washer, you want something reliable that you can count on. Because the Direct Drive Motor uses fewer moving parts and operates more efficiently, LG confidently backs the motor with a 10-year warranty.

TrueSteam™ TRUESTEAM™ TECHNOLOGY

LG's TrueSteam™ Technology gently but powerfully penetrates fabrics. In fact, LG uses a real steam generator to drive hotter, smaller particles of steam, for our most advanced cleaning ever.

Steam is simulated

ALLERGIENE™ ALLERGIENE™ CYCLE

The Allergiene™ cycle uses the power of steam to gently remove over 95% of common household allergens, like dust mites and pet dander, from even the most delicate fabrics.

TRUEBALANCE™ TRUEBALANCE™ ANTI-VIBRATION TECHNOLOGY

You shouldn't know your washer is on from the next room. The LG TrueBalance™ anti-vibration system is designed to reduce washer noise and vibration for smooth, quiet performance in any room of the house – even on the second floor.

SMARTDIAGNOSIS™ SMARTDIAGNOSIS™ TECHNOLOGY

It's unlikely that you'll experience any problems with your LG washer, however, if you do, this may eliminate a service call, saving you both time and money.

LG develops remarkable innovations that deliver the Performance, Energy Efficiency, and Advanced Steam features for revolutionary drying performance.

TRUESTEAM™ TECHNOLOGY

A lot of those drying headaches can be a thing of the past. TrueSteam™ Technology generates real steam to reduce wrinkles and odors, and practically eliminates the need for ironing.

STEAMFRESH™ CYCLE

Late for the party and no time to iron your favorite outfit? The SteamFresh™ Cycle refreshes and reduces wrinkles in up to five garments at a time with one 20-minute dryer cycle.

STEAMSANITARY™ CYCLE

SteamSanitary™ cycle refreshes and sanitizes dry items in the SteamDryer™. The SteamSanitary™ cycle kills bacteria on your clothes and is great for decorative pillows and other non-washable items.

REDUCESTATIC™

Injects steam late in the drying cycle to virtually eliminate the static electricity caused by dry fabrics rubbing together.

Steam is simulated

ULTRA-LARGE CAPACITY

Do laundry a little less often. With 7.1 to 7.4 cubic feet of capacity, this dryer handles really large loads, saving you time and energy.

SENSOR DRY SYSTEM

What's worse than pulling clothes out of the dryer and finding they're still damp? Our Sensor Dry system measures the moisture levels during the cycle and automatically adjusts the drying time, assuring you get dry laundry every time.

SMARTDIAGNOSIS™ TECHNOLOGY

It's unlikely that you'll experience any problems with your LG dryer, however, if you do, this may eliminate a service call, saving you both time and money.

PICK UP MORE, EMPTY LESS.

Discover vacuums that don't just make your house cleaner, but also makes your life easier. No more messy vacuum bags or having to empty them constantly with KOMPRESSOR® technology.

KOMPRESSOR® SYSTEM

Goodbye messy vacuum bags. The KOMPRESSOR® system uses a unique wiper blade within the bagless bin to keep it clean while compressing dust intake. That allows you to store up to 3 times more dirt, dust and pet hair vs. non-compressor models, and means there's an easy-to-dispose-of cake of dust when you empty it.

DUALFORCE™ & DUALFORCE+™ SUCTION

DualForce™ suction uses two additional air pathways plus an enhanced motor (DualForce+™) to pick up dirt from both sides, in addition to the traditional center section.

This allows you to capture dirt and dust over a wide surface area, and is ideal for picking up dust in hard-to-reach edges.

HEPA FILTER

True HEPA filtration that captures dust mites and pollen.

CLICK 'N GO™ WAND

Hard-to-reach spots just got easy. The Click 'N Go™ Wand detaches from the base – providing up to 15 feet of additional reach – for easier cleaning of stairs, upholstery, and other out-of-the-way spots. (select models)

PET HAIR TURBINE TOOL

Air-turbine powered brush is great for stairs and interiors, as well as removing pet hair from fabrics and carpets.

AAFA CERTIFICATION

Certified **asthma and allergy friendly™** by the Asthma and Allergy Foundation of America (AAFA) on the basis of scientific testing by physician-led testing organization. It is proven to reduce common allergens in carpeting, such as dust mites and domestic animal dander. (select models)

Bottom Mount Freezer Refrigerator

A two-door configuration, with the refrigeration section placed at eye-level for easy access to the food used the most. The freezer section is available in either of two door types—swing or drawer.

Bridge Element

A cooktop accessory that combines three cooktop heating areas into one, allowing for easy use of griddles and oversized pans.

Built-In

The appliance is custom-installed, directly into your kitchen, to fit seamlessly with your space and décor.

Counter Depth

Also called "cabinet-depth," counter-depth models are designed to fit flush with standard kitchen cabinets, providing an integrated look without the need for built-in installation.

Energy Star®

The US Government's international program that sets energy-efficiency standards and encourages use of more energy-saving consumer products. Most LG products meet or surpass the Energy Star standard.

Four (4) Door Refrigerator

Building on the convenience and efficiency of a 3 Door Refrigerator, the 4-Door Refrigerator comes in with the freezer drawer divided into two, providing the ultimate in organization and easy access.

Induction Heat

A pioneering cooktop technology that saves energy and heats with unrivaled speed — by generating electromagnetic energy.

KOMPRESSOR® System

The KOMPRESSOR® system uses a unique wiper blade within the vacuum's bagless bin to keep it clean while compressing dust intake. That allows you to store up to 3 times more dirt, dust and pet hair vs. non-compressor vacuum models, and means there's an easy-to-dispose-of cake of dust when you empty it.

Side-by-Side Refrigerator

A two-door configuration with the refrigeration and freezer sections placed side-by-side in a vertical orientation. This refrigerator boasts a large freezer capacity, and it is the perfect type to be installed in a narrow kitchen.

Single Oven

One large-capacity, high-performance oven to meet all of your home cooking needs.

Three (3) Door Refrigerator

Combines the convenience and efficiency of both side-by-side and bottom freezer models, with two top doors and a large-capacity freezer.

Wash Program

Multiple Wash Programs allow you to perfectly calibrate your wash cycle according to the size of the load and the type of garments being washed.

WARRANTY

REFRIGERATORS

1 year parts and labor,
7 years on the sealed system

ELECTRIC RANGES

1 year parts and labor, 5 years limited
on cooktop and radiant surface units

GAS RANGES

1 year parts and labor, 5 years glass cooktop,
electric elements and sealed gas burners

BUILT-IN WALL OVENS

1 year from date of purchase parts
and labor during first year

ELECTRIC BUILT-IN COOKTOPS

1 year parts and labor, 5 years parts on cooktop
and induction coils
